

"THOU HAST MADE SUMMER."

How thou dost love this earth of thine,
 Father beneficent, whose sun,
 Ordered by thee to bless and shine,
 Cheers the day long till night is won!
 On moor and mountain, lake and sea!
 All happy things give thanks to thee!
 Thy meadow-gardens, full of flowers,
 Thy corn-fields daily gathering gold,
 The bracing breezes, the soft showers,
 The merry things of wave and wold,
 Bless thee alike in sun and shade,
 So glad the summer thou has made.
 And yet more glad are we, O Lord,
 Who from the winter of our fear,
 Come into summer at thy word.
 And see thy star of peace appear!
 O Father, may our joy-time be
 One long thanksgiving unto thee!
 —Marianne Farmingham.

GRATEFUL FOR ADVERSITY'S

Can we be grateful for adversity? There are three hundred and sixty-five days in the year, and two hundred of them are more or less cloudy. Would you have all sunshine? Then what would we do for the showers and the fruits of the earth, the flowers and verdure of the lawn, and the pleasant streams? There are twelve months in the year, but only three of them are in the summer season. Would you have summer all the year? Where, then, would be the autumnal glories and ingathering, the winter's pleasurable evenings, and the springtime's glad awakenings. There are twenty-four hours in the day, but half of them are between sunset and sunrise. Would you have it high noon forever? What would become of the quiet rest from toil, and the dear amenities of the hours by the evening's fire? "In everything give thanks."—United Presbyterian.

Believe always that every other life has been more tempted, more tried than your own; believe that the lives higher and better than your own are not so through more ease, but more effort; that the lives lower than yours are so through less opportunity, more trial.—Mary S. R. Andrews.

WHAT SULPHUR DOES

For the Human Body in Health and Disease.

The mention of sulphur will recall to many of us the early days when our mothers and grandmothers gave us our daily dose of sulphur and molasses every spring and fall.

It was the universal spring and fall "blood purifier," tonic, and cure-all, and mind you, this old-fashioned remedy was not without merit.

The idea was good, but the remedy was crude and unpalatable, and a large quantity had to be taken to get any effect.

Nowadays we get all the beneficial effects of sulphur in a palatable, concentrated form, so that a single grain is far more effective than the crude sulphur.

In recent years research and experiment have proven that the best sulphur for medicinal use is that obtained from Calcium (Calcium Sulphide) and sold in drug stores under the name of Stuart's Calcium Wafers. They are small, chocolate-coated pellets, and contain the active medicinal principle of sulphur in a highly concentrated effective form.

Few people are aware of the value of this form of sulphur in restoring and maintaining bodily vigor and health; sulphur acts directly on the liver, the excretory organs and purifies and enriches the blood by the prompt elimination of waste material.

Our grandmothers knew this when they dosed us with sulphur and molasses every spring and fall, but the crudity and impurity of ordinary flowers of sulphur were often worse than the disease, and cannot compare with the modern concentrated preparations of sulphur, of which Stuart's Calcium Wafers is undoubtedly the best and most widely used.

They are the natural antidote for liver and kidney troubles and cure constipation and purify the blood in a way that often surprises patient and physician alike.

Dr. R. M. Wilkins while experimenting with sulphur remedies soon found that the sulphur from Calcium was superior to any other form. He says: "For liver, kidney and blood troubles, especially when resulting from constipation or jaundice, I have been surprised at the results obtained from Stuart's Calcium Wafers. In patients suffering from boils and pimples, and even deep-seated carbuncles, I have repeatedly seen them dry up and disappear in four or five days, leaving the skin clear and smooth. Although Stuart's Calcium Wafers is a proprietary article, and sold by druggists, and for that reason tabooed by many physicians, yet I know of nothing so safe and reliable for constipation, liver and kidney troubles, and especially in all forms of skin disease as this remedy."

At any rate people who are tired of pills, cathartics and so-called blood "purifiers," will find in Stuart's Calcium Wafers a far safer, more palatable and effective preparation.

How to be Cured.

WITHOUT PAIN.

Don't wait until you are a helpless invalid, for a seemingly simple case of hemorrhoids, or piles, may, if neglected, rapidly lead to worse. The unnatural formations become tumorous and permanent, and the inflammation grows until abscesses form; the disease burrows into the tissues, forming tubular growths, which discharge pus; cancerous conditions, and general gangrenous degeneration appear.

What is needed at the start, or at any stage, is something to soothe this inflammation, reduce the swelling and distension, and at the same time restore the diseased parts to normal condition. These three things are accomplished perfectly by the Pyramid Pile Cure. It checks all progress of the disease, and rapidly restores the affected parts to health, besides relieving at once the pain and fearful irritation.

"I began using Pyramid Pile Cure, and in order to make sure of a cure, bought five packages; for the past six weeks I have not been troubled in the least, and I had been bothered for thirty-five years, and had spent more than fifty dollars for different remedies; this is the first permanent help I have had, and no one could feel more grateful than do,"—E. M. Williams, Conneaut, Ohio.

Pyramid Pile Cure is sold by druggists generally for fifty cents a package, and we urge all sufferers to write Pyramid Drug Co., Marshall, Mich., for their valuable little book describing the cause and cure of piles.

A speed of 189-kilometers, or over 118 miles an hour, was reached during the recent experiments over the specially constructed electric railway between Marienfelde and Zossen, Germany. The power of 13,500 volts was brought a distance of thirteen kilometres.

LIFE'S STRANGE UNCERTAINTY.

No lesson is oftener impressed upon us than this of life's strange uncertainty, and no other lesson are we so slow to learn. We act as if we were to live forever. We plan and build for years ahead, and, lo! we are crushed before the month, and our houses, that we fancied were on rock foundations, are consumed by fire, or swept away by flood, and the places where they stood yesterday are vacant to-day. Our very names seem writ in water, and we spend our years as a tale that is told.

At times, with sharp and terrible insistence, this lesson of life's terrible incertitude presses upon our souls. A dear one in the prime of youth and joy is snatched hence by death, while the aged and feeble remain. A fortune that had appeared safe from accident melts away like snow in a thaw. A good name that had been stainless is darkened by reproach. Friendships that had been cemented by years of pleasant association are shattered by misunderstanding. Life's grim uncertainty is accentuated when physical health is undermined by an unsuspected malady. We grow melancholy when we dwell on this aspect of life, and we tread as those do who walk on a lava crust, or whose lightest misstep may start a falling avalanche.

Another and more cheering aspect there is to those who look upon life as taking hold upon eternity. This strange, panoramic, swiftly fitting life is bearing us out on a tide that seeks a steadfast shore. Our trials are for our good; our losses are to fit us for gains, our disappointments are to be com-

pensated in a future inheritance. The one solution to our puzzles, the one clue to life's strange mazes, the one comfort in our manifold sorrow, is the belief that the Lord reigns, and the assurance that we belong to him and are precious in his sight.

Earthly life is uncertain. Let this fact that no one denies teach us to be more considerate of others, gentler, less selfish, more solicitous to plant the gardens of our mortal life with flowers that catch their fragrance from those radiant coasts where evermore life thrills, and knows no ending.—Margaret E. Sangster.

Sir William Lyne, home secretary of the Australian Commonwealth, has lately decided that women are eligible for seats in the Commonwealth parliament, and Miss Goldstein, president of the Women's Federal Political Association, of Melbourne, has announced her intention of standing for the Senate at the forthcoming general elections.

ALLEN'S LUNG BALSAM
 will positively cure deep-seated
COUGHS, COLDS, CROUP.
 A 25c. Bottle for a Simple Cold.
 A 50c. Bottle for a Heavy Cold.
 A \$1.00 Bottle for a Deep-seated Cough.
 Sold by all Druggists.

BETTER STYLE

Is What We Give You In Furs.

IF YOU WANT GOOD FURS—better have them made in this season's shapes don't you think? If you buy the ready-to-wear kind made six months before the late styles are shown, you can only expect to get "a last season's garment." The general dealer may be anxious to do his best for you, but if he's not a Fur Specialist, you cannot expect him to give you new ideas about Fur Styles. Generally speaking, you do not go to a grocer for your millinery, or a shoemaker for your tailoring, and if you're particular about styles and want the most reliable you'll go to a Furrier for your Furs.

The Jack-of-all-trades has had his day—this is the age of the specialist. Our business is Furs—and nothing but Furs. We devote our whole time, skill and intelligence to Furs—from the raw material to the finished product. The patronage of the best people in three provinces has made a name for our Furs, that has given us the lion's share of the finest business. We are not satisfied to make as good Furs as we made last season—every year finds us with new ideas—new ways of making better Furs than ever. Our experience and skill are yours for nothing if you buy here, and when you buy direct from us, you are dealing direct with the manufacturers—no middlemen's profits.

Four gold medals for the finest Furs—the highest possible awards.
