

REGULAR ATTENTION CUTS COST OF CAR OPERATION

Neglect, Ignorance and Abuse Are Unholy Trinity Responsible for High Cost of Maintenance, Impaired Efficiency and Short Life of Many Cars.

There are many little expenses about running a car which total a considerable sum. A wheel, a tire, a quarter, a dollar do not seem much at the time, but they pile up the cost per mile.

A car which lasts with ordinary care three or four years if given intelligent care by the owner might be made to last from eight to ten more years. This means taking extraordinary care and a thorough knowledge of the working parts, and how to keep them in condition, and it means doing faithfully and persistently the things necessary to keep everything in order.

We might be as well to take care of the cars we have rather than let them go to rack and ruin for lack of care. We have heard about waste of fuel and food, and it is about time we heard something about waste of automobiles. A good many automobiles are wasted more than they are used. In some cases this is due to carelessness, and in others to lack of knowledge of what to do and how to do it.

Take three, for instance. The cost of neglect is often greater than the cost of actual wear. Some of the things which cause excessive wear and deterioration of tires are: Driving in holes in the street or in deep ruts; turning corners at too high speed; stopping the car so quickly with the brake that the wheels slide on the pavement and a harsh clutch jerks the car suddenly from a standstill, causing needless wear. Then there are such things as letting the front wheels get out of alignment, so that they do not run parallel, or nearly so, the action being that the tire is slid instead of being rolled over the road. There should be a slight toe in for

mechanical reasons, but if this is allowed to go beyond the proper limit it costs money.

Adjusters tell us that a very large percentage of tire failures is caused by under-inflation, which allows the tire to flatten and break the side walls. Every tire should be tested with a gauge and not with the eye or hand, and kept to the pressure named by the tire-maker.

To get the greatest life out of a tire it should be watched continually for small cuts through the rubber to the fabric. Most tires will be found after a short service to have from two to a dozen such cuts. These will allow sand to work in and loosen the rubber, and then moisture gets in and rots the fabric. There are preparations with which these cuts may be healed in a few minutes. Serious cuts, especially where the rubber is loosened from the fabric, should be taken at once to the vulcanizer.

While oil and grease of good quality cost money, their proper use will save many times their price in replacement of parts. On the other hand, a waste of lubricant makes unnecessary expense. Especially with a new car, oil and grease should be watched carefully until the bearings have time to work in. That is the time when expense for replacement of bearings is most likely.

It is not generally realized that a large number of things enter into the economical use of gasoline. To get the most out of a gallon of gasoline all moving parts must work properly. This means proper lubrication. The brakes should not drag; each cylinder of the engine should fire properly; the clutch should not slip, and the car

should be in proper adjustment. It is not well to adjust the carburetor unless sure it is at fault. Excessive carbon in the cylinder causes a decided loss of power, and the partial clogging of the muffler indirectly consumes extra gasoline. The importance of keeping the muffler free is not usually understood.

Some time ago I was riding in a car that could hardly make headway against a strong wind blowing. This meant frequent use of the second speed gear, which in itself caused an undue use of gasoline. I found on experimenting that the muffler cut-out pedal could be used in place of the accelerator pedal; that is, when the muffler cut-out was open the engine had considerably more power and immediately speeded up. The fact is that we kept that cut-out open most of the way home and had no more trouble in bucking the head-wind. It led to the discovery that the muffler was almost totally clogged with carbon.

To insure each cylinder getting its proper power without waste, the engine should be driven with the spark lever advanced as far as possible without causing back pressure. The spark plug gaps should be adjusted properly to insure a thorough ignition of the charge; the spark plugs should be kept clean to prevent the loss of a charge of gas through non-ignition. Likewise the interrupter points, and the distributor should be kept clean and properly adjusted.

To use all the gas that is taken into the cylinder there should be no loss of compression through leaky valves or weak valve springs, or poor gaskets on spark plugs or valve cars, and it is equally important that petcocks, cylinder head, where there is one, and piston rings are tight, so that gas will not be wasted.

It is not safe to leave these things to the chauffeur, and the garage man. The owner should learn how himself and see that everything about his car is adjusted right, and he ought to know how to keep them in order. If he gets this knowledge inside his thinking machine he will find that his propelling machine will work better.

USE OF TRAILERS IS NOW FAVORED

Enables Truck Owner to Increase Capacity at Small Expense.

A recent canvass of the leading truck manufacturers in the United States has disclosed the fact that a large majority now not only recommend the use of semitrailers in connection with their standard truck equipment, but are also manufacturing special trailers to be used in conjunction with the semitrailer. It has been found that more than one-half of the largest truck manufacturers are either building a short wheel base truck or a special tractor for use in this manner.

Husky Affairs. These tractors and trucks are designed especially for draft work, having very short wheel base, extra strong frames, heavy axles, wheels and springs, larger tires, lower gear ratios and special built-in attachment devices for the trailers or semitrailers.

One dealer who has given the question special attention says: "I have found that on ordinary roads with moderate grades almost any good truck has a sufficient excess or reserve power to haul, in addition to its own capacity load, a trailer with an equal load, or by the substitution of a semitrailer with a fifth wheel, for the truck body, to haul a load of double or triple its rated capacity."

Real Talent. "A great many truck and trailer companies now employ transportation engineers who have made a special study of all phases of hauling and whose duty it is to analyze the customer's requirements and recommend the particular equipment best suited to meet them. By calling such experts into consultation the prospective purchaser of haulage equipment finds a solution for the most difficult trans-

portation problems, and avoids costly mistakes such as the purchase of trucks that are too large, more trucks than are needed, or trucks that would have to stand idle for several hours in the working day while loading or unloading.

"As it is to the best interest of

both truck and trailer manufacturers to deal honestly with the customer and sell him only such equipment as will give him most satisfactory service, their transportation engineers will recommend the use of tractors and trailers only when his analysis of the requirements and operating conditions show that they will be most efficient and economical."

"The use of trailers enables the truck owner to greatly increase the capacity of his truck at a very slight additional expense and in many cases makes truck operation economical where otherwise they could not be used to advantage or compete with haulage by them."

We Make St. Croix Auto Truck Bodies

---the kind that is so well and favorably known all over the Maritime Provinces

We Carry in Stock Eighteen (18) Different Styles of

Ford Truck Bodies and Cabs

Including Stake, Dump, Express and Furniture Bodies

If you are in need of a Truck Body of any sort, wire or write us

Haley & Son, St. Stephen, N. B.

The Essex Coach \$2075 F. O. B. St. John.

Five Passenger

A New Type Car For All Seasons

You will like the Essex Coach we now show for the first time. You will like its good looks, its utility, fine quality and attractive price.

It fulfills the requirement of business and professional men with economy and satisfaction.

And it also is amply large to meet the family need in both city and country service.

Essex developed the Coach to meet your wants. Now you can get a fine closed car for a trifle more than you pay for an open car.

The performance is the same as that of the open models. It will gratify your demands in utility and reliability.

You Will Enjoy Driving It

There is much about the Essex Coach that will appeal to you beside its attractive appearance. All controls are easy to reach and easy to operate. Clutch and brake pedals re-

quire hardly more than a touch. You will like its response to wheel and throttle.

It is fleet and nimble. It rides easily over rough roads and may be driven in the country the same as an open car.

It is easily turned and parked in narrow spaces. Very little attention is required to keep it in prime condition.

Will Give You Long Service

Both the chassis and body are built to give long service without annoyance or expense. An unusually sturdy frame and the manner of body construction practically eliminates squeaks and rattles. Doors are hung on four hinges and rest on fittings that keep them tight and solid.

The Chassis is the New and Improved Essex, which everyone knows so well for its reliability and endurance.

You will be delighted with the Essex Coach. You cannot ignore its price.

Has These Fine Car Details

Dash controlled ventilator.

Wind and rainproof windshield.

Sun visor.

Luggage and tool locker, opened from rear.

Newest type easy operating crankhandle lifts on door windows.

Four hinges on each door and fittings that hold doors solid—very important.

Fine texture, long wearing upholstery and rugs.

Radiator shutters and motometer for efficient motor control.

Cord tires.

Come See the Coach—You Will Like It
At the Motor Show

Motor Car and Equipment Co., Ltd.

Distributors for New Brunswick

Showroom: Corner Charlotte and Duke Streets

Service Station: 108-112 Princess Street, St. John, N. B.

Chandler Six A Powerful Car

You need only to look at the Chandler to be convinced that it is a Supremely Fine Motor Car.

Do more than admire its beauty—Analyse its value—Learn of its faithful and dependable performance.

When buying a car be honest with yourself. Take a demonstration behind the wheel of a Chandler—Take a demonstration in any other car of any price or size, and then—DECIDE.

Arrange for that demonstration at once.

The sooner you buy a Chandler the longer you will realize the top joy of automobiling.

The Most Closely Priced Fine Car

When at the Motor Show come and see us. We will be pleased to show and explain to you the special Chandler features and also the additional equipment. This equipment goes only with cars ordered during the show.
