

WANT BOUNTIES ON IRON RESTORED

Conservative Pleas to Aid Industry

Finance Minister White Says It Will Mean Higher Duties

Agricultural Implements Such Like Will Bear the Burden—Lively Debate on Proposal to Appoint Two New Senators for Manitoba.

Ottawa, March 10.—Once again the iron industry has been asked to make up its mind. Hon. W. T. White today in the House of Commons told parliament that ever since the administration took office they had been considering the question of aiding the iron industry by the granting of bounties and had not yet got through considering it. He would consider some more, he said. In the meantime, however, it was made clear that Liberalism in parliament has a very clear-cut idea as to fiscal economics and that aid to special industries at the expense of the masses of the people is not likely to secure much support from their side of the House.

Tory Blue-Ribbons

On the other hand the high protectionist Conservatives in a series of blue-ribbon speeches, maintained that unless bounties were given the industry could not be maintained and that the Government was Mr. Carrick's journal on existing conditions. And this after a brief two years of the present protectionist government.

Dr. Michael Clark, of Red Deer, in stating the general principles of the tariff policy, maintained that the first consideration must be the primary industry of agriculture and the need of wider markets without tariff protection.

New Senators Proposed

Ottawa, March 10.—At the opening of the House this afternoon Premier Borden introduced his resolution providing for two additional members of the Senate from the province of Manitoba. He said that in the act of 1912 providing for extensions of the boundaries of Manitoba there had been provision for such increase. Similar provisions had been incorporated in the Alberta act and in the Saskatchewan act.

Sir Wilfrid Laurier said that so far as the Province of Saskatchewan was concerned there was no disposition to question the authority to make the addition. The Imperial act of 1871 provided for the creation of new provinces on such conditions as Parliament should choose.
