Calendar, Aspects, &c.	
<i>Circumcision.</i>	
Snow and stormy.	
<i>2nd Sun. after Christmas.</i>	
Continues snowy.	
Hard frost, but pleasant.	
<i>Epiphany.</i>	
Stormy weather, or very unsettled for some days.	
More snow yet.	
<i>1st Sunday after Epiphany.</i>	
The aspects of this part of the month are rather squally. If wind be South or S.W. for more than six hours you will have thaw and wet for a few days.	
<i>2nd Sun. after Epiphany.</i>	
There is, however, good ground for supposing that the thaw may not come before the 23rd, and then the roads will become more settled and satisfactory.	
<i>Septuagesima.</i>	
<i>Conversion of St. Paul.</i>	
The last week of this month promises to be fair but frosty.	
Generally fine but very severely cold.	
<i>Sextagesima.</i>	

**JANUARY.**—I was once led to believe that pumpkin-seeds were good for feeding milch cows, and commenced to feed them out to a cow at the rate of half a bushel per day. At that time she was giving eight quarts of milk per day, but instead of this increasing the quantity, it diminished it. I increased the feed to a bushel a day, still there was a decrease in the quantity of milk, until the pumpkins froze up, when she did not give but four quarts per day. The cow did not fatten. I then took out all the seeds, when lo, the change! Instead of five quarts of milk a day I got nearly nine in a short time.

And National School Books.
