Ontario District Representatives in Conference (Continued from Page 2.)

(Continued from Page 2.)
ried gangs for the past 10 years. The
gang consists of 10 men and the owner of the outfit,—two grain men, one
man on the blower, one fireman, six
mow men and the owner who is enginmow mon and the owner who is engineer and supervisor. The outfit consists of a traction engine, separator, tank wagon, team of horses and sleeping van. The farmes provides not more than two men for the atraw mow. The average threshing is 800 bushels a day and the price is five cents a bushel all round. Probably 20 per cent. of the grain will be wheat. Up to last season the charge was four cents, but then wagon went up \$10 a month all round.

month all round.
"I never worked as hard as these
men do," said Mr. Macdonald. "They
start threshing at 6.30 a.m. and throsh

siart threshing at 6.30 a.m. and thresh one hour till breakfast. Until October ist they thresh till sight o'clock at night and thereafter till sich o'clock." Wages to the men have been 350 and more may be paid this year. There is practically no lost time due to wot weather and no Sunday hoard as the men gathered locally, go home on Sunday. The farmer boards them during the week. In extending the gang method its. Nacolocated believed that method Mr. Macdonald believed that farmers are willing to try the method but that threshers are distrustful of the class of help that will be supplied. the crass of near that will be supplied.
Dr. Riddell was sure of the quality of the men available. "I have one man with me and six others who want to thresh in Ontario this fall," said one caller at his office. This man had add six seasons threshing in the west and wanted to spend his holidays in this work. There are many others like him and this fall there will be threshing gangs in eight or ten counties.

The "Standard Feed" Situation, Mesers. C. F. Balley and A. Leiteth told of the progress made in providing standard dairy and hog feeds. The hog feed situation is most satisfactory and this ten well as sows in the province, so Mr. Balley claffmed, have increased 30 per cont. since last £41 and the lead will be needed. Feede purchased to date for manufacturing chased to date for manufacturing. chased to date for manufacturing standard feeds are 510,000 bushels of corn, 6,250 tons of oil cake, 6,000 tons of cottonseed, 4,500 tons gluten feed and 500 tons tankage representing in all \$1,000,000. Nine millers out of 35 all 11.000.000. Nine infliers out of 38 and 11.000.000. Nine infliers out of 38 aread to manufacture bog feed. The fact will be about 157 a ton and 157 a to

feed in sight; in fact, just 30 per cent, of the total has been secured. Millers are afraid to carry expensive con-

of the total has been secured. Milies are afraid to carry expensive concentrates from now to next February
with the possibility of the market declining. The department is in a posttion to assure distrymen, however, that
the feed will be available next winter
as the continuous security of the

Mr. Todd stated very definitely that no one is authorized by his Board to

inspect people's tables and have them fined, and no 'unspectors' of that floard are now visiting private homes. "If any such come along ask for their credentials," advised air. Todd. "If they haven" redentials throw them out." Representative Work in the U. S.

The United States has 6,000 paid men engagor in agricultural extension work. Of these 2,500 are county agents ongaryo' in agricultural extramination work of these 5,000 are county agents and 1,400 women county agents. Mr. C. B. Smith, head of the service, was on hand to tell shout it. The movement there is on a different basis from the representative movement here in the United States the Farm Bureau, an organization of farmers in each county, was 900 or more men, control county, was 900 or more men, control county, was 900 or more men, control county, which is the same county of the service of the servi woman representative and the aim is to have a man and a woman engaged in extension work in each county of the mation. Mr. Coryell, one of the assistant state leaders in New York, told of county agent work in that state and invited his Canadian audi-ence, individually or en masse to come across and pay their Yankee cousing Live Stock at the O. A. C.

Prof. Wade Toole, the new head of the Animal Husbandry Depart-ment at Guelph, outlined his plans for or he Animal Husbandry Department at Guelph, outlined his plans for the department. Horse breeding is to be extended, or rather, it is to be extended, or rather, it is to be started anew. Seven of the Clyde started anew. Seven of the Clyde and the control of th abandoned and reactors slaughtered.
The contagion stable is too near the
dairy stable and to continue the Baug

dairy stable and to continue the Baug appeters would necessitate a new barn. In sheep, flocks of Shropshires and Lelcoators will be maintained, and representatives of all other common representatives of all other common representatives of all other common of the place acres of the highest land of the place on a four-year rotation as a sheep farm. In hoge, Yorkshires and Berkshires will be bred and representatives carried of Tamworths, Chesters, Duroo-Jerseys and Poland Chinas, Prof. Toole's idea is that the educational value of the place of the profession of the profession of the place of the pla

be kept to the fores and the stock and farm will be managed with this stock in view rather than profit. It is that in view rather than profit. Comprehensive experiments have been planned to determine the relative feeding value of bucks, even and wether, and of pure-bred, grade cross-fired, scrub and dairy-bred steers. Whether this comprehensive program Whether this comprehensive program of the pure of the plant of the plant will be course, depend on the course of the plant of the p

culsist for his plans.

To Eliminate Grade Stallions.
In 1914, when the Stallion Eurolment Act came into force in Ontario,
there were 1,118 grade stallions an
the Province; in 1915 there were
1,032; in 1916, 836, and last year, 640.
Under the Stallion Eurolment Act
as it now stands, all such stallions
are to be prohibited from service
to be prohibited from service
to the prohibited from service
to the conference of
representatives, with the conference of
representatives, with the conference of
representatives.

samics in gathering the
three's no reason, therefore, why any Ontario farmer should lose
part of his crop for want of labour.
If you want help, all you need to do is to apply to your Agricultural
Representative and tell him the kind of man you need; when you want
him; for how long; and what you are willing to pay. The Agricultural
Representative will got a man for you, or if he hasn't one available ha
will refer your inquiry to us and we will see that you are supplied.
Or you may fill out and mail the coupon below and address it as indious proposed to the supplementative, or we will send you a man direct from headquarters.
