

CASTORIA

The Kind You Have Always Bought, and which has been in use for over 30 years, has borne the signature of and has been made under his personal supervision since its infancy. Allow no one to deceive you in this. All Counterfeits, Imitations and "Just-as-good" are but Experiments that trifle with and endanger the health of Infants and Children—Experience against Experiment.

Chas. H. Fletcher

What is CASTORIA

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is Pleasant. It contains neither Opium, Morphine nor other Narcotic substance. Its age is its guarantee. It destroys Worms and allays Feverishness. It cures Diarrhoea and Wind Colic. It relieves Teething Troubles, cures Constipation and Flatulency. It assimilates the Food, regulates the Stomach and Bowels, giving healthy and natural sleep. The Children's Panacea—The Mother's Friend.

GENUINE CASTORIA ALWAYS
Bears the Signature of

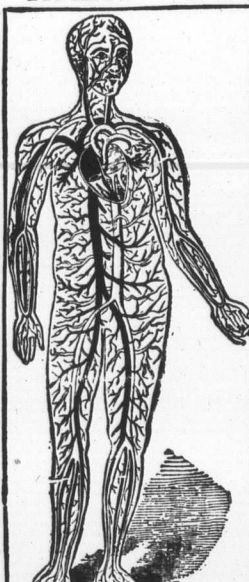

Chas. H. Fletcher

The Kind You Have Always Bought
In Use For Over 30 Years.

THE CENTAUR COMPANY, 77 MURRAY STREET, NEW YORK CITY.

MEN—YOU NEED NERVE

EARLY INDISCRETIONS AND EXCESSES HAVE UNDERMINED YOUR SYSTEM

The nerves control all actions of the body so that anything that debilitates them will weaken all organs of the system. Early Indiscretions and Excesses have ruined thousands of promising young men. Unnatural Drains sap their vigor and vitality and they never develop to a proper condition of manhood. They remain weaklings, mentally, physically and sexually. How do you feel? Are you nervous and weak, despondent and gloomy, specks before the eyes with dark circles under them, weak back, kidneys irritable, palpitation of the heart, bashful, debilitating dreams, sediment in urine, pimples on the face, eyes sunken, hollow cheeks, careworn expression, poor memory, lifeless, distrustful, lack energy and strength, tired mornings, restless nights, changeable moods, premature decay, bone pains, hair loose, etc.

This is the condition our New Method Treatment is GUARANTEED TO CURE. We have treated Diseases of Men for almost a lifetime and do not have to experiment. Consult us FREE OF CHARGE and we will tell you whether you are curable or not.

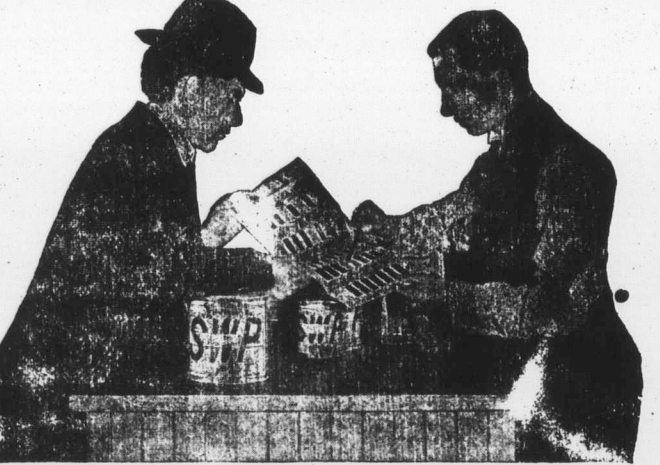

We guarantee curable cases of NERVOUS DEBILITY, VARICOSE VEINS, BLOOD AND SKIN DISEASES, GLEET, BLADDER URINARY AND KIDNEY COMPLAINTS. Free Booklet on Diseases of Men. If unable to call write for QUESTION LIST FOR HOME TREATMENT.

Address all letters as follows: **DRS. KENNEDY & KENNEDY, Windsor, Ont.** Write for our private address.

A 'CROSS COUNTER TALK.

Customer: "How do you know the colors in Sherwin-Williams Paint, Prepared, are durable?"
Dealer: "The colors in S.W.P. are durable and lasting because of the high qualities of raw materials used, the care taken in manufacture and the skill employed in mixing and grinding. The S.W. Co. has its own dry color plant and produces dry colors second to none for brilliancy and strength; operates its own linseed oil mill and manufactures all pure linseed oil for S.W. Products; has its own lead and zinc mines, and employs a large staff of chemists to maintain the standard of all raw materials and finished products."
"With materials of such quality, combined with the thorough assimilating they receive in mixing and grinding, it is insured the most permanent and durable colors it is possible to manufacture. S.W.P. wears as long as any paint can wear and retains its brightness and freshness for the greatest possible time."

PROTECTING THE FISH.

Canada Has a Fleet of Sixteen Little Vessels.

In order to protect Canadian fisheries from the encroachment of foreign fishermen, and to protect insular waters from poaching, illegal fishing, and the use of prohibitive tackle and gear, the Dominion Government maintain a little navy of some sixteen vessels, of which little is known to the ordinary citizen. Armed with one or two quick-firing guns and searchlights, these little craft patrol their respective waters, and, besides their fishery protection duties, they are also the embodiment of Dominion law among the many citizens of the fishing world. With the Grand Bank fleets, the sealers, and the lobstermen of the east coast, and the white fish trawlers of the Lakes and the salmon, herring and halibut fishermen of the Pacific, there is always to be seen trim little yellow-funnelled steamers cruising among the fishing craft pursuing their vocations. They are ubiquitous, and have an unhappy knack of turning up in unexpected places—a fact which makes the fish poacher's work exciting, and causes him to keep a watchful eye upon the horizon. As soon as the tell-tale smudge of smoke smears the sea line, he prefers to abandon trawls, seines and gear, and fly, to ranging on and trusting that the steamer's identity may be other than that of a fishery cruiser.

The finest vessel of the Protective fleet is the "Canada"—a small, third-class cruiser. She was the first vessel of Canada's navy, and is a twin screw vessel. Her speed is 17 knots, which makes her especially feared, as no sailing schooner or fast steam trawler can get away from her, and, besides, she has other arguments in the shape of four 1-1/2 pound automatic quick-firing guns.

Her station is principally off the Nova Scotia coast and in the Gulf of St. Lawrence.

The cruiser Vigilant is employed upon the Great Lakes, and has been the means of capturing many of them while fishing within the three-mile limits. The Vigilant carries a crew of 30 officers and men.

In the Gulf and River St. Lawrence the cruiser Progress makes her patrols. The Curlew is also employed patrolling the Gulf of St. Lawrence and New Brunswick waters. And the Constance—a similar vessel to the Curlew—is employed around Prince Edward Island. She was built at Owen Sound in 1891.

The east coast of Nova Scotia station and Cape Breton Island is patrolled by the cruiser Petrel—a vessel of similar dimensions to the Curlew and Constance. During the season of 1909 she boarded American fishing vessels over one hundred and thirty times, and seized over five thousand miles while on patrol.

Smaller vessels patrolling inshore waters of the east coast are the Hudson, 34 tons; Nelson, 19 tons; Thirty-Three, 79 tons; and the Ostrera, which is employed in the Prince Edward Island oyster culture service.

Upon the waters of Lake Winnipeg the screw steamer Lady of the Lake maintains the fishery laws.

Upon the Pacific waters of Canada are five fishery protection vessels, the largest of which is the wooden screw steamer Kestrel, built at Vancouver in 1908. She is 126 feet long, 24 feet beam, 19 feet deep, and 311 tons gross, with a mean sea speed of 10 knots. Although she is assisted by the smaller steamers Falcon, Georgia, Restless, and Alcedo, the Kestrel is probably the hardest worked fishery cruiser in the service. Not only employed in protecting the fisheries, the little cruiser is kept busy preventing smuggling, assisting at strandings, locating sunken wrecks, and inspecting life-saving stations and local customs houses along a mighty stretch of dangerous coast. It is to the credit of her officers and crew that in all her seven years' commission she has never had an accident.—Canadian Courier.

PIONEER ON PRAIRIES.

Archibald McDonald Was a Power With the Indians.

With the retirement from the service of the Hudson Bay Co. of Mr. Archibald McDonald, chief factor at Fort Qu'Appelle, there disappears the last officer of the old company to bear the title with which readers of books of northern travel and of northwest history are so familiar. As for many years there have been no resident commissioners of the H. B. Co., so, in future, there will be no chief factors. They will be known in future as managers or agents. Mr. McDonald is a veritable pioneer among pioneers. He is believed to have lived longer in the region which is now known as the Province of Saskatchewan than any other white man now living, and as such was accorded special honor at the inauguration of the new province. He is also the oldest member of the Manitoba Club, Winnipeg, having joined it in 1874, the year of its formation.

Mr. McDonald is a native of Inverness, Scotland, and came to Canada by way of Hudson Bay fifty-seven years ago. He was on the site of what is now the city of Winnipeg in the winter of 1854, and before the beginning of the "sixties" had travelled over all the trade routes in the far West. Before 1870 he made thirteen trips with York boats from Lake Winnipeg to York Factory on Hudson Bay, taking down furs for export to England and carrying back supplies for the posts along the Saskatchewan and in the Red River Valley. When Wolsey's expedition went out to the Red River settlement in 1870, to put down the first Riel uprising, Mr. McDonald was already considered an "old-timer," and his services in keeping the Indian tribes in the Qu'Appelle Valley quiet were acknowledged.

When General Middleton, in 1855, organized at Qu'Appelle the little force with which he smashed Riel's last rebellion, he naturally depended much for advice upon the old Chief Factor at the H. B. Co. fort, and the veteran's advice was sound. Mr. McDonald has always exercised great influence over the Indians, to such an extent, in fact, that Lord Strathcona is credited with having remarked that Mr. McDonald's presence at Qu'Appelle was worth 1,000 additional men in the field. Mr. McDonald was present at Fort Qu'Appelle in 1874, when Treaty Number One was negotiated with the Indians. This was the first of the Canadian treaties with the natives of the Northwest, and considerable diplomacy was necessary to obtain the consent of the Indians, for the Dominion Government was an unknown institution to them, and the treatment meted out to their brothers in the U. S. made them suspicious of every body but the British Government and H. B. Co. There were assembled at Fort Qu'Appelle to discuss this treaty no less than 5,000 Indians, and the Canadian Commissioners were Lieutenant-Governor Morris, of Manitoba, and the Hon. David Laird, afterwards Governor of the Northwest Territories. The Northwest Mounted Police had not yet been organized, and as an escort for the commissioners a portion of the Canadian permanent corps, then in garrison at Garry, was marched across the prairie. That the treaty was successful was largely ascribed to the influence exercised over the Indians by Mr. McDonald and his brother Chief Factor, Mr. J. W. McLean. The territory ceded by the Indians under this treaty included the western part of Manitoba, and practically the whole of the present province of Saskatchewan. Surely Mr. McDonald is entitled to be classed among the makers of the Canadian West.—Charterfield in Family Herald and Weekly Star.

'Twas His Brother.

Hon. J. J. Foy is Attorney-General for Ontario, and his brother, "Gus," is a police court clerk for Toronto.

It came to the ears of the police officials of Toronto that some of the city's Jews were got out summonses, were making offers to the summoned ones to not press cases if money were paid to those who had got out the much-feared papers. That using of the papers as a club had to be stopped. The police officials decided that summonses would not be issued unless there was some clear evidence of the need for giving out the papers.

To "Gus" Foy fell the duty of refusing some of the men who wanted a summons. To the ones who were refused, that looked like injustice, so they got a deputation together, saw Hon. Mr. Foy and asked him to remove "that man" who refused to issue summonses. The Attorney-General listened carefully to the complaint and promised to look into it.

"Jackie" Cohen, one of Toronto's best known Jews, is a police magistrate for the city and knows well the condition of the Jews who believe they have occasion to go to the police court clerk.

So the Attorney-General had "Jackie" go to see him and explain matters.

"By the way, who is 'that man' they want removed?" asked Mr. Foy.

"Why," said "that's 'Gus'—Canadian Courier.

Moosejaw's Big Bill.

Four hundred thousand dollars for a small city like Moosejaw, Sask., is a huge amount to expend on one civic improvement in one year. But that is the sum issuing out of the civic treasury for a new sewage system plant to be ready this fall, and guaranteed to make sewage water as pure as drinking water.

Would Have Been Just the Thing.

Imagine you seem to be enjoying your vacation. You had known there would have been so many young men to get engaged to. You had brought along my camera system from the office.

Doughbors Doing Well.

This year the Doughbor colony at Verigin has ten thousand acres in crop, seven thousand in oats, and three thousand in wheat. Flax is also grown to some extent. Horse ranching as an industry has also grown to considerable proportions. A few years ago cattle and sheep farming was an important factor, but the Doughbors felt that such a practice was inconsistent with their religion, which forbids the taking of life. Now only enough cattle and sheep are kept to supply milk and wool to the colony. This spring Mr. Verigin intimated that all the men between the ages of 18 and 60, except those needed for the manning of the brickyard, etc., should go out among "the English" and bring back this fall each \$200 to his own village. Of course they went. "Their not to make reply."

The brick yard employs 14 men, and this season will export 1,000,000 bricks. Into the great mixing bins the clay is dumped where the power of the great engines mixes it freely. Then into the moulds and on to the trays it goes, after which the formed bricks are shipped along the trolleys to the drying sheds. After so many days there, according "as the sun she is," they are carried to the immense kilns where for nine days and nights 235,000 are at one time kept under steady fire.—Manitoba Free Press.

Tablets For Cabinets.

Tablets giving the names of the members of the Cabinets of Ontario Confederation are to be placed in the new library wing of the Parliament Buildings at Toronto. They will be placed in the corridor leading from the main staircase in the old building to this new wing to the north. It is understood that it is proposed to erect tablets giving the names of the members of the Legislatures since 1867. But it is feared that there is not sufficient space for this big undertaking.

George W. Gounlock, the architect of the new wing, confidently expects to have it ready for occupation by the New Year. The stone work is now complete, save for the carving. The roof is now on and the floors are all in now.

The whole building is absolutely fireproof. The outside window casings are all metal, the window glass is wire meshed and fireproof and each window has a metal curtain which drops automatically when fire breaks out. The library will have fireproof fittings as well as the various offices on the ground floor.

The Parting of the Ways

comes to individuals as well as nations. We are ready to send information, to give advice, or to share our experience with any young person who may be perplexed regarding the choice of a school career. Our last year's record was a wonder. We need office workers every day to fill the calls that come to us.

Book-keepers, Stenographers, Civil Servants and Office Assistants thoroughly trained.

Send for catalogue. Fall term now. New Year Term January 2.
