to pull it backward and forward. If you wish to draw a thing towards any place with the least force, you must pull directly in the line between the thing and the place; but if you wish to draw it as quickly as possible and with the most convenience, and do not regard the loss of force, you must pull it oblique-ly, by drawing it into two directions at once. Tie a string to a stone, and draw it towards you with one there a string to a stone, and there at the attemation of thought would a stone at there makes a loss on a parthere attime at the stone of the place is the place in the prices current. If a writer to entirely conceal the man within, like the atto manton chess-player, and sentences were record ed by a wooden, instead of a living hand, the ex-ter at the place is not entirely would be atto manton the stone manton the st hand; and then make a loop on another string, and, running the first through it, draw one string in one hand, not towards you, but sideways, till both strings are stretched in a straight line; you will see how

Albert, Prince of Wales. Albert, fourth son. Alice, second daughter. Beatrice, fifth daughter. Every son and daughter of the Queen, born before the present year, has one name, at the least, begin-ning with the letter A; and some of them more. Her Majesty evidently thinks her family to be A 1, and a trifle beyond—a right good motherly feeling, in palace or in cot. In April, when the last was born, A being exhausted, her Majesty moved on to B." Tonnirs FOR FIGS.— This crop is more general-ly fed to cattle and sheep than to swine. For stor-pigs it makes a cheap and excellent feed. Our practice is to boil a large kettleful of them, and si fed on cob meal alone. A root diet is much-better for growing pigs than pure corn meal.
