Produce and Provisions.

Harbor Breton), all of the latter per barrel.

Common oil were shipped from St. John's as was the case this week. will have to be substituted. of Codliver Oil 2,577 gallons were

lean by the end of May. The price barrels, and of the Village Belle 180 olds at \$30 per case in the St. John's market and this will be about the opening price for new catch. The be good this season as Nfid. had prac- day. P. E. potatoes to arrive next tically a close season the past three month will be \$5.50 per half sack or years. Repors from Notre Dame Bay in particular, says that Lobsters are very plentiful there where the lobfishery has been abandoned since 1915.

PORK .-- A dull feeling still pervades the pork market, and purchases of Spring supplies are being made reluctantly by the St. John's Importers. There is a feeling that the indications all point to lower prices. Reports sent here by Cable from Chicago from day to day all continue to show a gradual decline in the Pork

market. The Trade realizes, however, that they must have pork in time for Spring fishery supplies, and even if lower prices are probable they deem it preferable to meet the loss than to be without sufficient Pork to meet the fishery demand. Those who so vehemently denounce wholesale profiteers would do well to note this. Ham Butt to-day is \$57.50 to arrive, Mess and Fat Back \$49, per barrel.

BEEF.-Local situation is the same as it was last week. In the U.S. market there has been a slight stiffening from the low quotations noted a week ago. It must be remembered that Beef at the present time costs about half the price of Pork, consequently it is only reasonable to believe that it has already gone down to a point which precludes the possibility of a much further de-cline. In fact when we survey the general list of food stuffs to-day we just concede that Beef is comparatively cheap at present prices. Libby's special Family is \$38, Boss Flank, \$37, and Boneless, \$32 to \$35 barrel, according to quality, and

legular Plate is \$29. FLOUR.-Market is unchanged and ve are not likely to see lower flour here the coming Summer. The Unit-ed States Report issued last week firms the shortage of the crop of Winter Wheat. Last year 751

year the total is only 485 millions, such a big deficit is bound to influecne the market. Every possible ef- as Texas, and the excitement conse-CODFISH. - The exports from fort is being made to increase the quently on competitive demand has Nfld. for the week just closed am- Spring wheat harvest, but so far the put prices up to this inprecedented ounted to 28,776 quintals; 13,218 weather has been impossible. Local level. The situation is made worse from St. John's, and 15,558 quintals price of leading brands is \$16.75 by the fact that the P.E.I. crop last from the Outports. Household Notes.

To restore the original whiteness to ivory articles which have turned yellow, rub with a flannel moistened with turpentine.

In frying cooked cornmeal, add a little flour to hold meal together, and a little sugar to make mush

brown more quickly. A delicious drink is made by heating up an egg in a glass, adding the juice of an orange and two tablespoons maple sugar.

While roasting pork, slit is now and then and insert pieces of tart apple. The apple cuts the grease and makes the gravy delicious. If a creamed soup scorches, add a

teaspoon of peanut butter, and the burned taste will not be noticed. while a pleasant flavor will be added. Grapefruit cocktail is made with one grapefruit, one tangerine, three tablespoons shredded cocoanut and three tablespoons maple syrup. To clean soiled or discolored white

enamel furniture, dissolve one tablespoon soda in one quart boiling water, and cool. Use with flannel Maple frosting is made by boiling

two cups maple syrup until it threads

and adding slowly to stiffly beaten

white of one egg. Beat until cool

THE WAY UNDER HEEL!

Fishermen!

Here's the Boot for You!

Excel Boots

Have Pliable Uppers. Weather Proof and Weather Resisting. Tire-Tread Soles. Hard to Wear Out.

For Men and Boys.

Pliable Uppers, Weatherproof and Wear-Resisting, Tough Tire-Tread Soles. Hard to wear out.

You know from experience what happens to ordinary boots when used in fishing. You've seen how salt water seems to take the life out of the rubber and how the rubbers crack and the soles wear through in a surprisingly short

The "EXCEL" is a different and better kind of boot. It has been made especially to stand up under the unusually hard use a fisherman's boot gets.

The rubber and fabric in "EXCEL" boots are of the very highest quality. But it is the special method of curing, under tremendous pressure, that makes the "EXCEL" so wear-resisting. The pressure forces the layers of rubber and fabric together so that they are actually "one-piece", without losing the least bit of the life of resiliency of the rubber. Salt water has practically no effect on "EXCEL" boots. The UPPERS remain pliable and weatherproof, and resist the drying-out action of sun, heat and cold far longer than other boots, consequently they don't crack anywhere so quickly. The SOLES are almost wear-proof, because they are made like an Auto Tire, with 8 plies of rubber and fabric welded by tremendous pressure into a "tire-tread"

sole that rivals an automobile tire for toughness and dur-

These are exclusive features of "EXCEL" boots.

The picture at the left, of an "EXCEL" boot, with every detail of construction visible, shows how "EXCEL" boots are reinforced at every point of strain. There is not a single feature but what has been proved necessary and desirable by tests of severest use. Your own experience will tell you that a boot with these features simply must be a better

Study this picture. Learn these features. Remember them when you compare "EXCEL" boots with ordinary boots. And remember, too, that very important point which the picture cannot show, namely, that "EXCEL" boots are cured under tremendous pressure which leaves the rubber pliable, weather-proof, and wear-resisting. It is only by the use of this tremendous pressure combined with high-est quality materials that the best results are obtained.

Below are listed seven special features which make "EXCEL" boots superior. Read them carefully so that when you need boots you will know how to get the best value for vour money.

Seven Special Features that make the "Excel" Best.

FEATURE No. 1-The entire boot is cured under heavy pressure, forcing all parts together in "one-piece", and retaining the full life and resiliency of the rubber.

FEATURE No. 2-An 8-ply double sole of tough, durable rubber, made like an Auto Tire, running all the way under the full moulded heel. This sole and heel are so wearresisting that they are commonly called the "tough on rocks" sole and heel.

FEATURE No. 3—A heavily reinforced boot which will withstand the hardest kind of wear.

FEATURE No. 4—Six plies at the instep relieves strain and prevents wrinkling or cracking.

FEATURE No. 5-Reinforced five-ply leg for extra wear. Just the right amount of strength to stand up, yet not be uncomfortable.

FEATURE No. 6-Four-ply top, very pliable.

FEATURE No. 7-Heavy duck lining, and a heavy insole prevent dampness and keep feet dry and comfortable.

Most reliable dealers sell "EXCEL" boots. Be sure to look for the name "EXCEL". Substitutes and "just as good" boots will not give you "EXCEL" service. If your dealer does not have them in stock, write us for name of nearest dealer.
