And in All Electricity is the

An Electric Bedside Table is for the

Nervous Man Who Can't Sleep-

Feet Warmed in Winter by Elec-

tricity-An Instrument for

Measuring Time.

One thing the big national electrical

exposition in New York did was to bring to public view a lot of novel

contrivances for the convenience of

mankind. Everyone knows, or ought

to know, that electricity in the kitchen

has been brought to a wonderful state

of perfection, lacking only the one es-

sential of economy. Electric chafing dishes, electric water heaters, electric

electric ovens,

boilers and broilers, electric ovens, are all on the market. But not everyone knows of the many other conventences and luxuries to which the mystal At this

terious fluid is being adapted. At this

exposition there was shown a pretty

little table, one which could be easily

placed by any bedside, whereon are a

little clock and two or three ornamen-

tal contrivances in silver. If one wakes at any time of the night and is

moved by the slightest degree of curi-

and, presto! one of the little silver con-

made for them are yet expensive, and

without attention. The batteries are placed in a box 18 by 7 by 9 inches.

These batteries can be readily renewed

by anyone, as such renewal does not

require either electrical skill or knowl-

cited to indicate the great possibilities

## The Business Outlook.

Electioneering Hinders Trade on Both Sides of the Border.

and a Quiet Feeling the the present year are Features.

New York, May 30.-Dun & Co.'s review says: Continued exports of gold, amounting to \$3,900,000 this week are recognized as natural results of the borrowing and importing early in the year, but caused no serious apprehension. When the political conventions are over the field for doubt will be much narrowed. A great many men will then begin to act on what they consider certainties. It seems probable at present that a majority after the conventions have acted will be a more hopeful humor than they are now. Markets for products are weak, rather than stagnant. fallen 3 cents. Cotton has fallen 1-8 cent in spite of continued reports that the musical profession famine is near. Decrease in manufacture of 30 per cent at the north and perhaps more at the south show the real nature of estimates based on continued manufacture at maximum rates. Receipts still indicate a crop of 7,000,000 bales; a yield is promised much greater than consumption in any year. Many cotton mills have stopped, and many more have reduced hours or looms, and yet the market for goods is lifeless. There has been a reduction of indigo blue prints, 1-2 cent to 4 cents, the lowest on record, being the chief features. Wool sales, exclusive of a few speculative transactions based on extreme low prices, are less than 40 per cent of a week's fair consumption, and for May have been 12,711,300 pounds, against 20,800,750 last year, and 20,153,350 in 1892. Prices are weaker. Dress goods are quiet, except for wheeling use, and dealings in men's wear are still exceedingly unsatisfactory. Silk is a shade stronger for Italian, but a large auction sale of silks realized low prices. Boot and shoe shipments, 6 per cent larger than last year-then the largest on record-indicate that in some branches makers are catching up with their orders, and many are discharging cutters. Yet many others have orders for months ahead, and sales still run large for the season, and manufacturers quite generally insist upon a slight advance in prices, which buyers do not yet pay. While hemlock, sole and union leather are stronger, the average of all quotations is slightly lower. Hides at Chicago have another spasmodic advance—in five weeks nearly

have been 239 in the United States, against 215 last year, and 30 in Canada, against 34 last year. Bradstreet's report says: The im provement in the trade situation is confined to the demand for hides, leather and shoes, the tendency of prices of the same to advance, and an improvement in request for drygoods, hats and shots from wholesalers at some western and southern points. General business continues quiet, and at larger financial centers less commercial paper is making even at lower rates. A between season's trade has begun to assert itself, and from a number of points mercantile collections are less satisfactory. Exports of wheat, flour included as wheat, from both coasts of the United States during the week, amount to 2,064,000 bushels, as compared with 1,906,000 bushels last week, 2,426,000 bushels in the week one year ago, 2,401,000 bushels in the week two years ago, and with 3,253,000 bushels three years ago. The industrial situation, except boots and shoes, is unimproved. Bank clearings throughout the United States for the past six business days amount to \$918,000,000-a falling off as compared with the preceding week of 7.3 per cent, but an increase of 12 per cent, as compared with the fourth week of
