Some ladies in England propose starting for Egypt to relieve the native poor here and elsewhere. There are no such people in this city. The natives here are the lowest class and are enriched with plunder. Respectable natives are not allowed to enter the city. When the difficulties are, settled they will return to their quarter of the town quite unipjured and the necessity of rebuilding the European quarter with the increased demand for all sorts of labor, will considerably raise wages and probably place the natives in more flourishing circumstances than they have been for the last stances than they have been for the last ten years.
