Dr. Mallory wrested East Northumberland from Mr. Cochrane last February by a majority of thirteen, indicating that the electors of the riping are pretty well divided in their political epinions. But there is understood to be considerable dissatisfaction in the Conservative ranks with Mr. Cockburn personally, which is one reason why Dr. Mallory expects to be able to hold the fort.

Elsewhere a correspondent draws attention to the prevalence of American flags in our toy shops. Now, as the Yankee is said to have remarked on quite another kind of an occasion—"It may be all right, but it looks odd"—to see our own flags crowded out, and a foreign flag put in its place. But it will be said: "Are you so ha monster of intolerance? Have you no pathorly feeling about you?" Our answer is offer a very simple test of how the matter alls stands. WHO WROTE SHAKESPEARE? ent of "Doubt" Leads

The world is full of doubting Thomases The world is full of doubting Thomases.

The man who has been successful in exciting the present momentary interest in the subject is, like most successful agitators, an Irishman. He claims to have discovered a cipher running through the Shakesperian plays which proves them to have been written by Lord Bacon. It is also claimed that there is a cipher in the enitarph on the moss. ere is a cipher in the epitaph on the moss wan tombstone, which, properly interpreted ds to the same conclusion.

This age shows a decided inclination to pr nto mysteries. It can make no differ ow whether the world believes he wrote the s that bear his name or not.

DEFORE

AS MAYOR FOR 1888.

The plays are immortal.

Ignatius Donnelly cannot rob us of these grand works, even though he should succeed in robbing Shakespeare of his glory.

Were it not for doubting Thomases many of man's great accomplishments would never have been brought to successful issue.

Men have been stricken down without warning. Doubs put in motion the investigation which ascertained the cause. After the discovery of the cause the world was ignorant of any remedy with which to skay the terrible slaughter of humanity, and medical science said it was impossible. Doubt led the way to the light, and Warner's safe cure solved the seemingly unsolvable problem. Its friends tell us with conclusive proof that the unsuspected kidney disease befouls the blood and causes most of our diseases!

For years the heart was looked upon as the most important organ in the body, but doubt must with not a shiring success, but as car companies appear to know of no means of making their patrons comforta winter, the saving in straw must be put as one of the economies of this mild Dent.

It is now a recognized fact that if they are put in a healthy state by the use of that remembers and the seally overcome, since their canse will be removed.

How unimportant, in comparison with such problems, is the present discussion as to the authorship of Shakespeare? One and without a problems are investigated in robing blood puriant of any remedy with which to shay the terrible shaughter of humanity, and medical science said it was impossible.
