

ARTICLE 5

In accordance with Article IX.2 of the Cooperation Agreement, Canada will, in international bodies, take careful account of the interests of the Agency concerning deployment of the Galileo system and more particularly the frequencies required for that purpose.

ARTICLE 6

The Development and Validation of GalileoSat Programme will be carried out in accordance with the rules of the Agency and with the terms of the Declaration. However, in the placing of contracts which may contain developments covered by security conditions, the Agency shall give preference to industry and organisations of the Member States, in accordance with guidelines of the relevant Agency organs competent for such matters. Such limitations will be defined in the Invitations to Tender.

ARTICLE 7

Canada's participation in the GalileoSat Programme beyond its development and validation activities will be covered by further Arrangements, subject in particular to the conditions to be laid down for participation by non-Member States of the European Union in the European Galileo initiative.

ARTICLE 8

Canada and the Agency may by mutual agreement amend the provisions of the present Arrangement. Amendments shall come into effect on the thirtieth day following the date on which the parties give notification that the internal conditions required for the amendments to come into effect have been met.

ARTICLE 9

In accordance with Article XIII of the Cooperation Agreement any dispute arising out of the implementation or interpretation of the present Arrangement that cannot be settled amicably by the parties shall, at the request of either party, be submitted to arbitration. The provisions of the Agency's Convention shall apply unless otherwise agreed by the parties.
