

SUPPLEMENT TO THE MCGILL NEWS

QUESTION 15. The summary given below shows the extent to which an engineering course is deemed likely to promote or develop in the students the qualities indicated.

	<i>Little</i>	<i>Moderate</i>	<i>Great</i>
	%	%	%
Integrity and dependability.....	25	40	35
Habits of accuracy and thoroughness.....	3	21	76
Diligence.....	21	47	32
Powers or initiative and originality.....	25	48	27
Qualities of leadership.....	46	33	21

More interesting than the necessarily dry summary of formal replies are the individual comments frequently accompanying them, and which space limitations make it impossible to publish. On some points indeed diametrically opposite opinions fairly balance one another, but in many instances weak points are unerringly bared and ideas capable of development suggested. Both the general trend of opinion indicated and the individual suggestions and criticisms have been and will continue to be most useful to the Faculty in the process of readjustment which is now going on.
