The Health of the Store is Perfectly Normal

In view of the circulation of sensational reports regarding an outbreak of diphtheria in this store, it is due to the public, to our staff, and to ourselves to publish the following facts:

Beginning about three weeks ago, among the reports of cases of diphtheria sent to the Medical Health Department, some stated that the patients had been employed in this store, and the Health Department very promptly made inquiry and investigation to see if the store were in any way responsible for the development of the disease.

After a most careful inspection and investigation, the Medical Health Department emphatically state that not a case of diphtheria has been traced to any neglect or defect in the sanitation of this store.

As a precautionary measure, swabs of the throats of all the members of our staff in one department were taken, and one person was found WHO WAS A CARRIER OF THE GERMS, though healthy in other respects. This member of the staff was no longer employed, with the result that no other case developed.

For the past ten days no one employed in any capacity by this Company has developed diphtheria, with the exception of a member of the Highlanders, who worked all Monday night with the Ambulance Corps in attendance on the Thanksgiving Day wreck, he not having been in the store for the previous two days.

Several months ago, when the Medical Health Officer issued an ordinance prohibiting the public drinking cup, vendors supplying individual drinking cups were immediately installed throughout the store, so removing any possibility of conveying infection in that way.

The facts, therefore, fully bear out the statement made above, viz., that the health of the members of the staff, and the employes of this Company, is perfectly normal, that the matter of sanitation receives most careful attention, and that at no time has there been any ground for apprehension regarding the safety of customers shopping in this store.
