NE SHOWS GAIN IN BUILDING WORK.
Building permits for the month of June, which totalled \$83,000 showed a substantial advance in building construction over the same month last year. The total was \$15,000.

Building permits issued in 1922 and of June gave the value of action work at \$295,000, while that of June was set at \$237,200.

Crocodile Devours Bracelets and All

Contents of Stomach Form Interesting Exhibit.
London, June 18.—(By Mail).—For many years the population near the Duma River, Tanganyika, East Africa, suffered serious diminution owing to the appetite of the man-eating crocodile.
Young and old, of both sexes, were reported missing, but even a wily old crocodile must pay for his misdeeds, and part of the contents of his stomach formed an "exhibit" at the Royal Society's conversation at Burlington House.
Crocodiles are said to have wonderful digestion. But this one had failed to digest a string of beads belonging to one of his lady victims.
Other salvage included half a bushel of porcupine quills and a score of metal bracelets, each weighing several ounces, and once the property of the belles of various tribes.
Even tough-shelled tortoiseshells were not despised, for there was a small leap of "shells" from their backs and a score or more of stones, each as large as a walnut.
Cables, when hauled from the bottom of the ocean, often have a curious story to tell.
A segment of one of them, also in the exhibition, contains half of a tooth left by a shark, which had had the worst of a furious argument.
More serious interest attaches to charts and records illustrating progress in scientific study of child mind and muscle with a view to wise settlement in industrial or other organizations.

PREPARE FOR SCOUTS' CAMP

V. C. Timberley, district secretary, and Guy L. Short, deputy chief of the Boy Scouts Association, visited the site of the scouts' camp at Oak Point on Saturday. Mr. Timberley will go there again tomorrow with a number of boys to prepare for the camp, which will open on July 10 and will continue until August 25. The scouts' camp will be held from July 31 to August 10. Those in command will be F. E. L. Coombs, Guy L. Short, J. Lister and G. S. Davison. Among the others present will be Harry Allan, president of the New Brunswick Guides' Association, or two of his guides; Professor J. D. Tothill, Government entomologist; Dr. William McIntosh, curator of the Natural History Museum, and A. Gordon Leavitt.
The V. C. M. C. annual boys' camp opened yesterday under the direction of V. C. M. C. Gregg, secretary. The camp is situated on the Salmon river, four miles below Chipman. There are about forty boys under canvas and they will remain there until July 16. An advance party went to the site of the camp last Wednesday and put everything in readiness for the main body of boys.
The St. David's church boys went into camp at Holer's Point on Saturday. They are under the direction of F. J. Punter.

MORNING NEWS OVER THE WIRES

The steamer Advance, on the Boston-Halifax-St. John's, Nfld. route, which went ashore on St. John's Island while entering Halifax harbor in a dense fog yesterday morning broke in two yesterday afternoon. Her seventy-five passengers and her crew of sixty-five were taken off in tugboats. The ship was commanded by Captain

Be Careful What You Wash Your Hair With

When you wash your hair, be careful what you use. Do not use prepared shampoos or anything else that contains too much free alkali, for this is very injurious, as it dries the scalp and makes the hair brittle.
The best thing to use is Multifid coconut oil shampoo, for this is pure and entirely greaseless. It is inexpensive and beats anything else all to pieces.
Simply moisten your hair with water and rub the Multifid into it thoroughly. The latter rinses out easily, and cleans the hair and scalp thoroughly. The latter rinses out easily, and removes every particle of dust, dirt, dandruff and excess oil. The hair dries quickly and evenly, and it leaves it fine and silky, bright, fluffy, wavy and easy to manage.
You can get Multifid coconut oil shampoo at any drug store, and a few ounces will last everyone in the family for months. Be sure your druggist gives you "Multifid." Beware of imitations. Look for the name "Watsons" on the package.

W. Nickerson who was making his first trip in command of her, and Frances Dalton, twelve years of age, were drowned at Raynham, near Yarmouth yesterday. They were wading in the river when the little girl got beyond her depth and was carried by the current into deep water. Mr. Knight made a brave attempt to rescue her and himself lost his life. He was carried by his wife and four small children while the little Dalton girl leaves her parents and two young brothers.
Last night was passed in a peaceful way at Sydney after two nights of rioting and raiding by the striking steel workers. On Saturday night a crowd of about 1,000 broke down a big gate and part of a fence surrounding the company's property. The Riot Act was read and troops fired over the heads of the crowd, the people dis-

Watch Your Hungry Man

Home he comes, tired and worn from the day's work and real good and hungry. See how naturally he takes to his slice of Butternut, going at it ahead of the other things. A silent compliment to your judgment in providing the flavory strength of Butternut, richest of breads.
It is easy to understand how Butternut is so much better—more and better ingredients, baked in such wholesome economy the bakers can afford to be more generous in loaf value. Just taste

Butternut Bread

The spray mixture recommended for blight, known as Bordeaux mixture, is made up from copper sulphate or blue vitriol, fresh slaked lime, and water in the proportion of six pounds each of copper sulphate and lime to each fifty gallons of spray mixture. The first application should be made when the plants are six to eight inches high. It is said, and subsequent applications at intervals of ten to fourteen days throughout the growing season, making five to seven applications in all. More detailed information on potato spraying may be had upon application to the station at Geneva.

POTATO SPRAYING TESTS.

Ten-Year Experiment Shows Practice Profitable.
Spraying potatoes for blight has been shown to be a highly profitable practice in experiments conducted over a ten-year period by the potato specialist at the New York Agricultural Experiment Station at Geneva. Some of these tests were made on the station grounds at Geneva, some on station experimental plots on Long Island, and some were conducted in co-operation with farmers in different parts of the state. Taking the ten-year period as a whole, all of the tests showed that spraying potatoes is highly profitable in New York. Tests on the station grounds show 1 an average increase in yield for the ten years of 97.5 bushels per acre; while 208 volunteer experiments, covering seven years, gave an average increase of 54.3 bushels per acre. Records of the financial returns from spraying for the different years show that the practice was profitable in this respect also.
