Oregon is the greatest lumber country in the world. Around one mill, within a circle of three niles, stands timber enough to last a hundred years, the mill all the time cutting 5000 feet a day. The trees are from 6 to 10 feet in dimerter and some of them 300 feet high. They are felled into a lake, forted to the mill, three miles, sawed by water power, and turned out at the other side of the mill, whence a vassel takes them to Cafi-Sprii.
