SPRADIO TAIL

Taking Noises Out Of Radio

Can Be Eliminated Now—
Making Use Of Ordinary
Power Wires.

Chicago, June 16.—Elimination of the crackling and buzzing accompanying radio signals, which have proved one of the greatest obstacles in the development of the science has been accomplished. The invention which separates all static noises from the radio signal, was perfected by Major J. O. Mauborgne, signal officer of the Sixth corps area, and Dr. Louis Cohen, of George Washington University, consulting engineer of the war department, after more than two years' experimentation.

The separation of signals from static noises caused by the electrical charges in the atmosphere is accomplished by a chain coil of wire, the length of which varies with the distance from which signals are received. The strength of the signal is not affected by the draining process, according to Dr. Cohen, and the signals may even be amplified.

Plugged Into Light Socket
Another recent invention is a resonance wave coil by which a radio receiving set may be plugged into an ordinary electric light socket and radio signals received as well as with an aerial. This invention, on which a dozen patents are pending was perfected by Major General George O. Squier, chief signal officer of the army.

A similar invention was announced here by B. F. Miesner several days ago. Miesner, who was a government expert during the war, said his work had been separate from the government investigation. The draining coil was hooked up with Major General Squier's device and found to work perfectly, Dr. Cohen said. Signals were picked up with perfect clarity when static conditions were good or bad. The electric power line method of transmission holds tremendous commercial possibilities according to Dr. Cohen.

Electric Power Line Method
"Eliminating static noise has been one of the most serious problems in radio development," he said, "due to the electrical charges in the atmosphere, especially in summer, when even the largest stations must shut down at times. This device perfected by Major Mauborgne and myself separates the static noises from the signal, grounds the noises and leaves the signal clear and distinct."
"This is a new and radical departure in receiving radio signals. The method consists in receiving the radio signal, passing it through a very long coil which drains off the interfering disturbances and leaves the full strength signal without noise."

Major Mauborgne explained that radio signals received by the electric power line method also could be cleared of noise. Such signals may be received from a broadcasting station sending by the usual aerial, from which the waves hit exposed electric wires, over the city and thence travel

How To Hook-Up A Crystal Set

There is knack in handling a coil of wire that I learned after spending several weeks of my life straightening out kinks. If the wire dealer is a desirable citizen he puts a single strand of rather stiff wire around coil like a collar. By sliding this around and around your coil you can release one turn of wire at a time. If you take the collar off, sooner or later you lay coil down or drop it accidentally and when you try to straighten it out you find it hopelessly tangled.

There are many kinds of aerials: Inverted "L's," "T's," "Z's," "umbrella," "wires," "coils," and "cages." I prefer a single wire partly because I am naturally lazy, and partly because I am satisfied when I can hear what I want to hear. The more elaborate aerials require more time and money.

The inside end of your aerial wire goes into the binding post marked "A" or "Ant" on your receiver, and you turn the screw down tight. Next to this binding post is one marked "G" or "Gnd," which is for "Ground." To this you attach another piece of wire and run it to any convenient pipe or steam radiator. If you have neither, solder the end to any old piece of metal and bury it in the ground. Soldering better any connection. It is easy to do since the invention of the soldering paste that requires only the heat of a match.

Whatever kind of a receiver you are using, when the wires are all connected and the knobs and things adjusted according to the directions, you begin to hear things that your phonograph never thought of. It is a surprise party with unknown friends dropping in from all parts of the world.

IMPROVING CHURCH
The interior of the Waterloo street Baptist church is undergoing a complete renovation this week under the direction of Deacon Amos Gibbs, assisted by an efficient committee. It is hoped the work completed before next Sunday.

EXHIBITION COMMITTEES.
Meetings of the industrial exhibits and advertising committees of the Exhibition Association were held yesterday afternoon at the office of the secretary and manager, H. A. Porter. The former checked up the space already taken and discussed ways and means of disposing of that yet unsold. The latter, owing to the absence of several members, did not transact any business.

over the wires to the receiving set, or could be received from a station, also using the power line instead of an aerial. The only additional equipment needed for this kind of receiving is a set of condensers, which cost less than \$1. Major Mauborgne said.

Tapped Tuning Coils Operate With Great Ease

Many people prefer tapped tuning coils to slide tuning coils for their greater ease of operation and their greater mechanical stability. A tuning coil for short wave reception is here described. The tuning with this coil will not be very sharp, but is satisfactory for ordinary purposes.

Secure a panel, preferably of bakelite, 4 by 6 inches and 1/4 inch thick. Purchase nine taps from your supply store and also a rotary switch with a radius of 1 1/2 inches. Two binding posts complete the list of parts necessary for the panel assembly.

Take the brilliant gloss off the panel by rubbing with a fine grade of steel wool. After this is done, dust the panel by rubbing with an oil rag. Ordinary machine oil will do for this purpose.

Now make the layout for drilling the holes for the switch, taps and binding posts. First locate the center of the panel by lightly drawing its diagonals with a pencil. When this point is found, drop 1/2 inch and use this point for your compass center. Now set your compass to a radius equal to the radius of your switch arm, which in this case is 1 1/2 inches. Draw a line lengthwise of the panel through the point you have made 1/2 inch below center, and with your compass describes a semi-circle above this line and using this line as a terminal. Divide the line of the semi-circle with nine equidistant points. With a 1/8 inch drill, bore ten holes on these points. To prevent the drill from "walking" it is best to indent the marks with some sharp instrument before attempting to drill the holes.

Start drill the switch lever hole the size depending on the size of the shaft of your particular lever. The binding post holes can now be drilled in the position indicated, at about 2 1/4 of an inch from either edge. Insert the various parts in their respective holes.

Secure a tube of cardboard, fibre, or bakelite 2 1/2 inches in diameter and 4 inches long. Wind twenty on this tube some number 22 single cotton covered wire to within 3/8 inch of either end. In winding, provision should be made for a tap every nine turns. This is done by scraping the insulation from a section of wire of a distance of 1/2 inch and running this section over a 1 inch length of empire tubing, or spaghetti, that has been slit through its centre. This bare spot will afford means of easy soldering to the tap lead. Another method of taking off leads is by doubling back and twisting the wire, affording sufficient length to reach to the tap. This method is a continuous winding and eliminates the necessity of soldering extra wires to them.

Bend two little brackets out of brass or copper strip. In each drill one hole for the panel screw and one for a screw that will pass through the tube. Locate and drill two holes on the panel for these brackets.

Netherwood School Closing Exercises

Class of Nine Girls Graduated
—Prizes Awarded—Old
Girls' Association Elects
Officers.

The beautiful weather of an ideal June day, favored the closing exercises of the Netherwood School for Girls, which were held at Rotheray yesterday afternoon.

The class of nine girls who were graduates were: Alice Tilley, Ellen Henderson, Ruth Robinson, Ethel Powell, Isabel Wran, Phyllis Richardson, Helen Armstrong, Byrd Corbet, Mary Vanbuskirk.

The exercises which were conducted in the school gymnasium were opened by the Rev. Canon Daniels with a short prayer. This was followed by a musical programme. Three songs were sung by the pupils of the school, and these were followed by three songs by the school Glee Club, who had been trained by Douglas Baker of Rotheray. Miss Elizabeth Thompson of Rotheray, and Miss Margaret Day of St. John were then heard in piano solos, followed by Miss Marian Lano, with a violin solo.

Following the musical programme Bishop Richardson addressed the graduating class with a few well chosen words and officiated at the presentation of certificates and the awarding of prizes. Following the awarding of certificates and the presentation of prizes, the programme carried out was as follows:

The Daily Dozen, Walter Camp—
"Take a Tiger from the Tiger and Stay Young."
Play Exercises, Pitching, batting, catching, baseball, golf, swimming, bowling, and snow, shot put.
—Senior and Junior Gym. Classes.
Nursery Rhymes, Swedish Folk Dances—Kindergarten.
Dance, Tully Time—Sen. and Jun. Gym. Classes.
Scout Dances—Girls and Boy Scouts.
Country Dance, The Old Mole—Day Girls.
Marching—Day Girls.
Dance, Post's Love—Margaret Tilley, Margaret Page, Ethel Powell, (Post), Constance Watson, Daphne Paterson.
Song—"The Entire School."
Sports, the outdoor programme the parents and friends of the students were afforded an opportunity to inspect the school, and to see the art exhibit of the pupils of Miss Besse Hoyt.

In the evening a meeting of the Old Girls' Association was held at the residence of the president, Miss Mary Armstrong. There were thirty-eight members in attendance, and each member volunteered to make a certain amount of talent money during the summer, to be donated to the Association Fund. It was also decided to make a donation towards a memorial to be erected at the school in memory of the late Mrs. Grace Patterson, a former Netherwood student, and member of the Old Girls' Association.

The selection of officers resulted as follows:
Mrs. A. H. Crowfoot, St. John—President.
Miss Ruth Belyea, Rotheray—Vice-President.
Miss Ethel Powell, St. John—Secretary.
Miss Isabel Jack, St. John—Treasurer.
A list of the prize winners follows:
K—Netherwood—lead to sun proof up.

Winsted School Closing Exercises

Many Parents and Friends of
the Scholars Enjoyed the
Splendid Programme.

The Y.W.C.A. recreational centre, King street east, was the scene of a pleasant event, to the children at all events, yesterday afternoon, when the closing exercises of Winsted school were held. Many of the parents and friends of the scholars were present to enjoy the splendid programme which had been prepared.

Following is the programme rendered:
1—Flag salutation and a song of Glee, by the school.
2—Review of the year, Helen Magee.
3—Presentation of certificates.
4—Gymnasium department physical culture, 50 per cent, prizes, Lillian Price, Viola McAvity, Margaret Hayes, Helen Magee, Jean McAllister, Jean Murray, Leonora Belyea and Marian Curry.
5—Swimming, 50 per cent, prizes, Lois Fairweather, Viola McAvity, June Curry and Marion Curry.
6—Cup for best all round work in the gymnasium department, given by Miss Catherine McAvity, and presented by Miss Littlefield, Marian Curry.
7—Reading, 50 per cent, prizes, Cecily Kirby, Shuna Gilechrist, Frances Frith, Viola McAvity, Margaret Hayes, Helen Magee, Jean McAllister. Ninety per cent prizes, Ruth Anna Foster, June Curry.
8—Readings, by Ruth Anna Foster and Shuna Gilechrist.
9—Spelling, 80 per cent, prizes, Eleanor Foster, Helen Magee, Margaret Hayes.
10—Ninety per cent, prizes, Elizabeth Stead, June Curry, Jean McAllister.
7—English literature, 80 per cent, prizes, Jean McAvity, June Curry.
8—Reading from examination paper, June Curry.
9—English composition, 80 per cent, prizes, Frances Frith, June Curry.
10—Reading from examination paper, June Curry.
11—History, 80 per cent, prizes, Cecily Kirby, Jean McAvity, Jean McAllister.
12—French, 80 per cent, prizes, Jean McAvity.
13—Ninety per cent, prizes, Frances Foster, Ruth Anna Foster.
Junior Class—Conducted by Miss Baulin.
11—Latin; Special Latin prize, given and presented by Dr. H. B. Briggs—June Curry.
12—Arithmetic, 80 per cent, prizes—Shuna Gilechrist, Ruth Anna Foster.
13—Nature Study, 80 per cent, prizes—Jean McAvity, Cecily Kirby.
Junior Class—Conducted by Dr. Macintosh.
14—Singing, 80 per cent, prizes—Ruth Anna Foster, Helen Magee; 90 per cent, Shuna Gilechrist.
Special Improvement—Lat, Frances Frith, 2nd, Audrey Rankine.
Song, Beautiful Rose of England—10 girls.
15—Sewing, 80 per cent, prizes—Jean McAvity, Elizabeth Stead, Helen Magee, June Curry, Viola McAvity.
16—Bible Study, Junior prize, Jean McAvity, Intermediate prize, Frances Frith. Senior prize, given by Archdeacon Crowfoot, Jean McAllister.
Recitation, 91st Psalm—Jean McAvity.
Recitation, from St. John XIV.—Frances Frith.
Reading from examination paper, Ruth Anna Foster.
General average, 80 per cent, June Curry.
17—Star Prize—Junior, Shuna Gilechrist; Intermediate, given by Mr. Secord, Ruth Anna Foster; senior, June Curry.
18—Parvewell of Graduating Class—Marian Curry and Leonora Belyea.
19—Character prize, given by Mrs. A. P. Paterson—Leonora Belyea.
20—God Save the King.

CERTIFICATES
IV Collegiate
Leaving Certificates—Helen Armstrong, Ethel Powell, Phyllis Richardson, Ruth Robinson, Alice Tilley, Mary Vanbuskirk, Isabel Wran.
III Collegiate
Certificates—Ellen Allison, Kathleen Blanchet, Margaret Day, Ruth Fleming, Millie Hibbard, Catherine Lambord, Marion Lunan, Katherine Peters, Betty Thompson.
Doris Armistage, Elizabeth Armstrong, Alda Dickie, Marjorie Harding, Dorothy Hinton, Ethel Lugsdin, Viola McAnn, Daphne Patterson, Margaret Tilley, Jean Williams.

**New Civic Building
And Court House**
Mayor Against Tearing
Down Old Building—Says
It Can Be Repaired.
Mayor McLellan was asked yesterday what his views were about a new civic building and court house, and he expressed himself strongly against the tearing down of the ruins of the old court house in King street east, and replacing it with a large and expensive new municipal building. He believed the walls of the old building were sufficiently strong to repair and would last for at least twenty years, and that the cost of the works would not exceed \$25,000. His worship said that it was ridiculous to propose an expenditure of \$150,000 on a new building when the old one would serve the purpose for the present, and when the money was required for other public expenditures.
More important than a new court house, he thought, was the erection of a civic forum or auditorium where matters of public interest could be discussed and where the people could learn how their representatives looked after their affairs. This kind of building, he said, would be an appropriate one to be erected as a war memorial for besides being a lasting remembrance to the service made by the men of St. John, it would also serve a public purpose.
The Mayor said that after the restoration of the old court house, the application of a sand blast to the outer walls would renew the stone work to its original appearance.
The first expenditure, and a necessary one, which the Council had to face, Mayor McLellan said, was the filling in of the Carleton Mill Pond. He said that in accordance with a request of the Council a report of the cost of filling would be submitted to a committee meeting on Monday. He predicted that the cost of this work would not reach the estimated figures which have been presented to the Council on previous occasions.
In Paris, the higher above the pavement a citizen lives, the higher the taxes he must pay.
