

The Satisfaction of Safety

Your Valuables are never really safe outside a Safety Deposit Box. Theft and fire are not the only dangers. There is always the possibility of losing or misplacing Papers, Jewels or Plate. A Safety Deposit Box in this Bank affords protection for your valuables; and the yearly rental is very reasonable.

TOWN AND VICINITY

A slight frost on Monday morning
the first of the season.

The corn is in the shock, but the
frost is not yet on the pumpkin.

The family of George Blacklock is
under quarantine for scarlet fever.

The annual field day of the Glencoe
high school will be held on Tuesday,
Oct. 11.

Lawns are as green as they were
in June, only there is a little more
dust on them.

John Hick has bought the residence
of John W. Mitchell at the south end
of Main street.

Once again you can ask for ten
cents worth of anything without
being considered a humorist.

Rally Day will be observed at the
morning service next Sunday in the
Glencoe Presbyterian church.

Donald D. Campbell has bought the
residence of the late Duncan McCallum
from Mrs. Godfrey McMurphy for
\$4,500.

County Engineer Talbot was in
town on Tuesday and inspected the
new pavement, which he pronounced
first-class.

On Friday in connection with the
young people's work will be held in
the Methodist church on Sunday.

Rev. David Rogers of St. Thomas will
address both services.

Communion service will be held in
Tait's Corners Presbyterian church
next Sunday at 11 a. m. Sunday
school at 10 a. m. Preparatory
service on Friday at 3 p. m.

A bumper crop was threshed
recently at Wm. Reycraft's, when 500
bushels of wheat and 900 bushels of
oats were turned out in seven and a
half hours by A. D. Munroe's machine.

A bunch of raspberries picked on
the roadside Tuesday morning by David
Webster was enjoyed by the
Transcript. Raspberries at this time
of the year are not uncommon but far
from plentiful.

The Ontario dollar is still a little
over 10 per cent. below par. You
can now buy 30 Russian roubles, that
before the war were worth \$10.10,
for 5 cents. How's that for shrink-
age? That would make our one dollar
bills worth less than half a cent
each.

Thomas Mawhinney has sold his
farm of 63 acres in Ekfrid to James
Yager for \$8,500 and is having a
clearing sale on Oct. 4. Mr. and Mrs.
Mawhinney purchase making their
home in Glencoe where they have
purchased the residence of John Hick
on Dean street.

"All-of-a-Sudden Peggy," a three-act
comedy drama, will be played by the
Thamesville dramatic club in Glencoe
opera house, fair night, Sept. 28th.
Special attractions between acts.
This is the company that made such
a hit in Glencoe a year ago. Plan
of seats at Lumley's drug store. Ad-
mission, 50 cents.

On Friday evening a number of
young people were entertained at the
home of Mr. and Mrs. George Parrott
in honor of Miss Grace Dalgety who
left on Monday to take a nurse's
training course at Victoria Hospital.

of their youngest daughter, Hilda Al-
ice, to Rodrigo Diaz, M. A., Chihuahua,
Mexico, eldest son of Mr. and
Mrs. A. Diaz, Santiago, Chile, the
marriage to take place early in Oc-
tober.

Mr. and Mrs. E. F. Reycraft and
daughter, Mrs. Percy Little, were
suddenly called to Battle Creek owing
to the death of Mrs. Little's daugh-
ter, Betty, aged 3 years and two
months, who has been with her aunt,
Mrs. Dancy, for the past year. She
leaves her mother, father and brother
Ross.

Mrs. Nancy Black of Yale, Mich.,
has returned home after visiting Mr.
and Mrs. Godfrey McMurphy. Mrs.
Black was here to attend the McCallum
reunion, and was also at the celebra-
tion of the Ekfrid centenary at
Appin, where she was awarded first
prize for being the oldest native-born
woman on the grounds.

tage with three lots in the village of
Newbury. For further particulars
enquire of Jennie Weaver, Newbury.

A special meeting of the U.F.O. will
be held at Walkers on Thursday eve-
ning at 8 o'clock to appoint dele-
gates to attend a convention at
Strathroy.

Mrs. Stephen Fennell will give
painting lessons to all who wish to
attend her class from 9 to 12 every
Saturday, beginning 10th inst. Studio
upstairs I.O.D.E. building.

A meeting of the canvassers and
directors and all those interested in
the Glencoe skating rink will be held
in the town hall on Thursday evening
of this week at 8 o'clock.

Mrs. W. A. Currie has added a
ready-to-wear department to her mil-
linery parlors. Just arrived this
week—a new lot of Balkan waists.
Sport skirts in plaid and stripes, or
anything to your measure ordered.

Ekfrid school fair at Appin, Oct. 1.
Special prizes are being arranged for,
including school parade, best decorated
auto, and for teachers of Ekfrid
schools giving best essay of 500
words on Ekfrid. Full particulars
next week.

Lost—on Ontario Motor League
route between Ridgeway and New-
bury, one Goodyear tire, 10 inch dia-
mond tread, carrier with light and li-
cense No. 114-561, Saturday, Sept. 17.
Reward by notifying John Stephenson,
130 Victoria road, Walkerville.

GET NEWS ITEMS IN EARLY

Nearly every week newsy notes
reach the paper late Tuesday after-
noon and Wednesday mornings, but
that is too late to insure publication
for that week's issue. We make an
effort to get to press early every Wed-
nesday in order to catch all the rural
mail. Consequently the late arrivals
have to lie over until the following
week and some of them may be of no
use after that delay. Many of the
items might just as easily be in our
hands on Monday or Tuesday after-
noon, thereby giving plenty of time
to get them in type. Send the news
along by all means, and we are al-
ways glad to get it, but speed up the
time in getting it to our printer and
you will have our double thanks.

Tanlac, that celebrated medicine, is
now sold by P. E. Lumley.

It is something, perhaps, that Ire-
land does not insist that the British
take their island somewhere else.—
Newark News.

Just think, girruls it won't be long
before you can take your skunk skin
out of cold storage and start calling
'em sables again.

"The working class strike-mad, all
classes sport-mad," is the summing
up of the situation in England by a
writer in the London Times.

We'd have more sympathy for the
Irish "cause" if it were led by real
Irishmen, not imported Spaniards like
De Valera.—St. Marys Argus-Journal.

Mothers Value This Oil—Mothers
who know how suddenly croup may
seize their children and how neces-
sary prompt action is in applying re-
lief always keep at hand a supply of
Dr. Thomas' Eucalypti Oil, because
experience has taught them that this
is an excellent preparation for the
treatment of this ailment. And they
are wise, for its various uses render
it a valuable medicine.

If flies are flies because they fly.
And fleas are fleas because they flea.
Then bees are bees—because they bee.

An ounce of bustle is worth a
pound of lucky rabbits' feet.

"Thou shalt not play baseball" is
Zion City's latest commandment.

Sarcasm
Dad (sternly)—Where were you
last night?
Son—Oh, just riding around with
some of the boys.

Dad—Well, tell 'em not to leave
their hairpins in the car.

THE TORTURE OF INDIGESTION

Thousands Made Miserable
By This Trouble

"FRUIT-A-TIVES" Relieves It

What is indigestion and what
causes it? As you know, solid food
must be changed into a liquid by the
stomach before it can be taken up as
nourishment by the blood.

The stomach acts as a churn. It is
covered by a strong, muscular coat
and lined with a soft, delicate
membrane which secretes the gastric
juice which digests or dissolves solid
food.

When food enters the stomach, the
muscular coat squeezes and presses
the food from end to end, or churns
it, with the gastric juice to dissolve
or digest it.

But—if the stomach muscles are
weak—or if the dissolving fluid is
poor or insufficient—then food cannot
be digested properly and you have
indigestion.

"FRUIT-A-TIVES" is the most wonder-
ful medicine in the world for strengthening
the stomach muscles and providing an
abundance of pure, full-strength dissolving
fluid to completely digest every meal.

"FRUIT-A-TIVES" does this because
it keeps the kidneys active, the bowels
regular and the blood pure, which
insures pure gastric juice.

"FRUIT-A-TIVES" will correct
your indigestion or dyspepsia and
enable you to enjoy every meal.
Try it.

50c. a box, 6 for \$2.50, trial size 25c.
At all dealers or sent postpaid by
Fruit-a-tives Limited, Ottawa

AUCTION SALES

On lot 8, con. 2, Ekfrid, on Monday,
Sept. 26, at 1 o'clock—1 horse 8 years
old; 1 horse 6 years old; 6 good cows,
supposed to be in calf; 8 yearling
heifers; 4 calves; 2 pigs; about 100
lbs. each; about 100 hens; about 250
chicks of corn; about 10 tons of hay;
1 acre of potatoes, not dug; 150 bus.
of oats; 1 binder, McCormick; 1
mower, Deering; 1 hayrack, Massey;
Harris; 1 hay rake; 1 drill, Noxon;
1 springtooth cultivator; 1 corn cul-
tivator; 1 set of disc harrows; 1 set
of iron harrows; 1 plow; 1 set of
double harness; 1 set of single har-
ness; 1 buggy; 1 buggy pole; 1 log-
ging chain; a number of cow ties; 1

125 lbs. salt; 1 set of doubletrees; 1
saw; 1 Standard cream separator;
good; 1 washing machine; 1
dash churn; 1 mail box; 1 telephone;
1 forty-roll of Ideal fence, 10
wires; 1 Gray-Port touring car, used
by a sea. When a tile-drained
farm is offered for sale the existence
of a plan of drains adds greatly to
the value of the farm. The plan is
of equal value to both the seller and
buyer. With proper care well-con-
structed tile drains will give good
service for several generations;
therefore for the convenience of our
children and grandchildren it is ne-
cessary to have a plan of our under-
ground drainage work.

There is another way in which a
drainage plan is very helpful to a
farm owner; it is a splendid guide
toward ascertaining the acreage of
any field or part of the farm. Fences
are located on the plan, and the
whole plan drawn to scale, so that
with the aid of a rule it is possible
to measure the area of any part of
the land surveyed. This is of great
assistance in planning a season's
crops as well as in calculating yields
per acre.

The drainage pays; but, before you
start even a small system by all
means secure a plan.—G. Hempel,
O. A. College, Guelph.

Protecting Drainage Outlets.

Tile, particularly clay tile, should
not run out to the mouth of the
drain. If a piece of old gas pipe,
eight or ten feet long, can be secured,
this should be placed in the drain in
place of the last few feet. Failing
this a piece of corrugated steel, or
even a plank trough is much better
than running the tile right to the end,
where they will be broken, washed in
to the outlet, or otherwise destroyed,
allowing the earth to roll in and stop
the flow of water.

Under any condition the bank is
liable to wear away. Animals pastur-
ing in the field may tramp it down,
and block the tile, so in the second
place, an abutment should be built
through which the outlet discharges
its water and the bank will be kept
in a state of preservation. This may
be made of concrete, stone or plank,
and should be a permanent structure.
In some cases where the flow is heavy
and the water would have a tendency
to undermine the wall, it is well to
build an apron on which the force
of the falling water is broken.

There is still another precaution
which should be given due consid-
eration. Frequently small animals,
muskrats, coons, ground hogs and
others, seek refuge in the tile. Here
they are entrapped, and form a dam
to the flowing water. To overcome
such, the outlet should have bars
across the end. These may be quite
small, and close together so that
nothing can get through. A screen
may be fitted over the end, but un-
less it is made of wire, the water
is retarded in its flow. Sometimes the
first tile is threaded with wire. This
forms a good protection.

When all these devices are given
attention, the outlet should remain
in a state of efficiency for years, and
the system, if properly installed,
should give satisfaction.—F. L. For-
guison, O. A. College, Guelph.

DRAINAGE IS IMPORTANT

Some Benefits of a Well Devised
Drainage Plan.

Guesswork is the poorest method to
adopt—Get the Land Levels and
Then Arrange for Tiling — How
to Protect Drainage Outlets.

(Contributed by Ontario Department of
Agriculture, Toronto.)

WHEN a man is about to
erect a building, be it ever
so small, the first thing
he does is to make a plan.

That plan may be on paper or it may
exist only in the mind of the builder,
yet it is a plan. Without a plan to
follow, a builder cannot do good
work. The same is true of tile drain-
age. The man who places a "string"
or "line" of tile in a watercourse,
which traverses his fields, should not
do so without asking himself such
questions as: "Am I putting this tile
in the lowest part?" "Will I be able
to get a satisfactory outlet? How
many acres will this tile drain, and
is it large enough to drain it satis-
factorily? Have I sufficient grade to
drain the holes in the rear fifty?"
If he does not ask himself these ques-
tions he is like a builder without a
plan; he is working in the dark; his
work cannot be efficient. All these
questions the drainage plan answers,
and more.

No matter how small the means
for immediate construction of drains,
or how few the drains which one
is about to install, he should not do
so without having first laid out a
plan of which these drains will be
a part. On rolling land such a plan
is not hard to decide upon, because
the differences in elevation are very
pronounced, and any one who is
familiar with such lands is able to
intelligently plan a system of drains
for them. But where the area is
large and the topography irregular,
or very flat, guesswork is out of
the question. It is then that we must
resort to the tape and the levelling
instrument for reliable information.

A drainage plan shows first of all
the differences in height or elevation
between all parts of the farm over
which the survey is extended. This al-
lows the owner of the land to plan
his own system of drainage. The pos-
session of the levels for all parts of
the farm lays bare the most advan-
tageous routes for tile drains, from a
study of the levels and contours of
a plan it is possible to calculate the
acreage which each main tile must
drain. This information, together
with the fall or grade procurable is
the only true guide to help us decide
upon the size of tile needed in any
given drain. It is only when the plan-
ner has a picture of the whole pro-
ject before him that he can draft an
efficient yet economical plan of drains
for any piece of land.

Future Benefits.—The benefits of
a plan do not end with the comple-
tion of the drainage system. Only
those of us who have tried long and
hard to find a drain, the location of
which was nowhere recorded, know
the value of guidance such as is of-
fered by a plan. When a tile-drained
farm is offered for sale the existence
of a plan of drains adds greatly to
the value of the farm. The plan is
of equal value to both the seller and
buyer. With proper care well-con-
structed tile drains will give good
service for several generations;
therefore for the convenience of our
children and grandchildren it is ne-
cessary to have a plan of our under-
ground drainage work.

There is another way in which a
drainage plan is very helpful to a
farm owner; it is a splendid guide
toward ascertaining the acreage of
any field or part of the farm. Fences
are located on the plan, and the
whole plan drawn to scale, so that
with the aid of a rule it is possible
to measure the area of any part of
the land surveyed. This is of great
assistance in planning a season's
crops as well as in calculating yields
per acre.

The drainage pays; but, before you
start even a small system by all
means secure a plan.—G. Hempel,
O. A. College, Guelph.

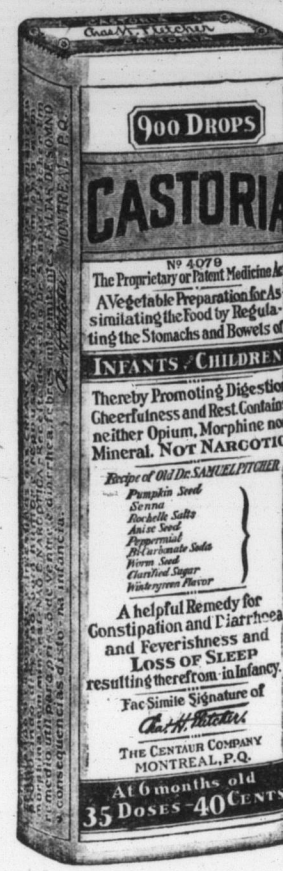

Protecting Drainage Outlets.
