

Smith Form-a-Truck

THIS TRUCK WORKS ON A FARM

THIS Truck does real farm work on the farm of Mr. N. N. Smith, of Birds Hill, Manitoba.

It carries to Winnipeg Wheat or Hogs or Hay or Potatoes—whatever the farm has to sell.

It brings back from the town Bran or Cement or Gasoline—all supplies that the farm needs.

It is a standard one-ton truck, but its regular working load is 3,000 pounds. On good roads it runs rapidly, on bad roads or on steep hills it pulls powerfully. It gets there, it does the work, it carries the load.

Over heavy roads its owner sends it or down the farm lanes as cheerfully as over the best of the road to town. It is a real farm worker and it does not keep other farm workers from their business. Horses stay in the fields. For a man a trip to town, is a matter of a few hours.

This is the kind of hauling that is coming on Western farms.

It is the Smith Form-a-Truck, such as is shown here, that is going to do the work.

Smith Form-a-Truck makes a truck out of any passenger car. Trucks good for working loads from 3,000 pounds for standard size to 6,000 for larger size.

It is the truck that is the solution of the farm hauling problem and United Grain Growers Limited are distributing Smith Form-a-Truck because by it the farmers can get the world's lowest hauling cost, can get it under farm conditions as city owners get it under city conditions.

Prices on Smith Form-a-Truck at Winnipeg are as follows:—

1-Ton Standard	\$535.00
(Capacity 3,000 lbs.)	
1-Ton Standard, reinforced	\$585.00
