a har cutter, sent for one. At the eappointed, an elegantly dressed perserved, and the gentleman sat down ore his dressing case to prepare for operation. The man walked round "client" once or twice, and finally, ing his stand at some distance, attendly scrutinised the gentleman's face he the air of a connoisseur looking at icture. "Well," said the Englishman, patiently, "when are you going to in?" "Pardon me, sir," was the poreply: "I am not the operative, but physiognomist—Adolphe!" he called and a sleeved and aproned barber ered from the hall; "A la Virgil." ith this laconic direction as to the del after which the gentleman's hair as to be aranged, the artist retired.

A school Bill, dated Christmas, 1847, gives us some very curious hints for the treatment of juveniles. A charge of ten shillings per quarter for medicine, tells us the interesting fact, that a child of eight years of age may consume a hundred and twenty pennyworths of salts in twelve weeks, which gives, exactly ten ounces per week, or a fraction less than an ounce and a half per day to the unfortunate infant. The charge of five shilling for hair cutting, within the same period, furnishes the remarkable fact, that the same child may have had his head the same child may have had his head continually under the scissors, yet come home to the bosom of his parents with nt a crop as if he had not undergone the ten cuttings and combings again, which estimating each operation in round numbers at six*pence, he must

LEGERDENAIN.—How to get a whole suit of clothes into a junk bottle: Every time you feel like taking a "horn" drop the price of a "nipper" into the bottle, and take a glass of pure cold water. Repeat this until the bottle is full, then break it and carry the contents to a good tailor, and within a month you will find If encased in a new suit of clothe without any trouble or expense to your-self. The same can be done with hats, boots. &c. We have known a cart load of wood and a barrel of flour transmogri-

fied in a similar manner.

Dr. Jonnson is better known to us than any other man in history. Every thing about his coat, his wig, his figure, his face, his rolling walk, his blinking eye—the outward signs which too clearly marked his approbation of his dinner, his insatiable appetite for fish-sauce and veal pie—with plums; his inextinguisible thirst for tea, his trick of touching the posts as he walked, his mysterious practice of treasuring up orange peel, his morning slumbers, his midnight disputations, his mutterings, his gruntings, his puffings; his vigorous, acute, and sarcastic eloquence; his vehemence, his insolence, his tempestuous rage, are all familiar to us. tuous rage, are all familiar to us.

dress for day or night, where warmth is the purpose, is that which confines around the body sufficient of its own warmth, while it allows escape to the exhalations of the skin. Where the body is allowed to bathe protractedly in its own vapors we must expect an unhealthy effect upon the skin. Where there is too little ventilating escape, insensible perspiration is checked, and something analogous to fever supervenes. Foul tongue, ill taste and lack of morning appetite betray the

A gentleman jocosely observed to a young lady, that he was about to be married, but as his affections were divided between Miss Mary Brickdust and Miss Betsy Primestuff, he was at a loss which to choose. 'I advise you by all means,' said the lady, 'to take Miss Brickdust—you want polishing.'

The fireside is a seminary of infinite importance; it is important because it it is universal, and because the education it bestows, being woren in with the woof of childhood, gives form and color to the texture of life.

Clis.—As the Agent of various Fire Insurance

Companies, I beg to bring under your notice my
PATENT ARTIFICIAL SLATE: This
composition has been upwards of, three years extensively used in New Branswick, Newfoundland and
Prince Edward Island, the Canadas and Nova Scotia,
principally for covering shingled roofs, as you will
perceive by the accompanying circulars of cartifactures
fally its fire proof qualities under most extraordinary
circumstances; so minch so, that I am of opinion that
Fire Insurance Companies should encourage its general
application to all kinds of wood building (where the
color would be no objection to its being used, such as
the back walls of dwellings in the city, out houses,
ware-houses, &c., as well as the roofs) by lowering
the premium of insurance on such buildings as are
covered.

HOLLOWAY'S OINTMENT.

CRIPPLE SETS ASIDE HIS CRUTCHES AF-

TER TEN YEARS SUFFERING.

Copy of a Letter from Mr. Thompson, Chemist, Le verpool, deaded August 20, 1852.

To Professor Hollowax;

Dear Sir.—I am enabled to furnish you with a most extraordinary cure effected by your invaluable Ontment and Pills which has astonished every person acquainted with the sufferer. About 10 years ago, Mr. W. Cummins, of Saltney Street, in this town, was thrown from his horse, whereby he received very serious injuries; he had the best medical advice at the time, and was afterwards an immute of different infirmaries, yoth og row worse, and at length a malignant running alter settled in his hip, which as completely crippled him, that he could not move without crutches for nearly 10 years; recently he began to use your Ointment and Pills, which have now healed the wound, strengthened his limb, and enabled him to dispense with his crutches, so that he can walk with the greatest case, and with renewed health and vigor. (Signed) J. THOMPSON.
