## Domestic Science

The Superintendents of Education have made a wise departure in the institution of an inter-denominational domestic science school in St. John's. To Mr. Burke in particular is due, as was stated yesterday at the demonstration which is reported elsewhere in this issue, the pioneer work of the movement, and in his charge the other Superintendents have left the working out of the scheme. Mr. Burke dealt with the subject in his report for the year 1910, and in his report of last year he states that he has brought the matter under the notice of His Grace Archbishop Howley and of His Lordship Bishop Power, and that they highly approve of the project. The A. P. C. also offers to pay the expenses of a lecturer to give a course of lectures to pupil teachers and others.

As will be seen by a reference to our report, the movement has also received the benediction of His Lordship the Bishop of Newfoundland, the Rev. Dr. Fenwick and the Superintendent of the R. C. Schools of the Diocese of Harbor Grace. There can be no doubt that the taking up of this subject in a practical way and under a fully competent teacher is a step in the right direction. As the Bishop said yesterday it was far better for a woman to know how to cook than to know how to do Algebra.

There is every reason why a girl should have her faculties as well developed at school as a boy, and there is abundant reason why some practical subjects should find a place in the school curriculum, which will call for the cooperative activity of both physical and mental powers. Indeed, there is a serious question whether much of the mental stagnation of pupils in school is not directly due to the repression of the wonderful physical activities of children.

Then, too, there is the utilitarian value of the work of such a school as Miss Wright is conducting which is so obvious that the moral does not need to be laboured.

A feature dwelt upon by Mr. Burke in his remarks was inter-denominational co-operation in the movement. This feature especially appealed to the Rev. Mark Fenwick. His only regret was that the Manual training movement for boys had not been started in the same way.

Mr. Blackall thought there were other classes which could be more efficiently conducted in this way.

Of this there can be little doubt. We would like to see this movement

extended and become the foundation of an inter-denominational Technical School, which could also be used to give teachers the technical and professional part of their training, and which would also serve as a Night School for commercial and industrial training of those who have left school and gone to work. This is the sincere hope of some of the promoters of the movement and of its well-wishers. We hope that the experiment will prove successful and that in the near future it will be extended to our outports.

## "Bachelor of Domestic Science."

The Girl's Own Paper for April urges that the domestic branches of work form the only profession for women that is not woefully overcrowded; it is entirely neglected. The writer says:—

To my mind, the greatest hindrance to educated girls as a whole taking up this work is the absence of that definite status which has been accorded to the trained nurse from the very beginning.

What is needed is that the domestic profession should be placed on as high a plane by the educational authorities as the teaching profession, the medical profession, etc. There ought to be a B. D. Sc. degree (Bachelor of Domestic Science), that should rank on a par with B. Sc. and B. A., or even higher, for it ought to carry a great deal more practical knowledge with it than either of the other degrees.—Reviews of Reviews.

## Supreme Court.

IN Chambers.  
(Before the Chief Justice.)

William G. Dryer and Others vs. The Newfoundland Clothing Factory Ltd.

This was an application on the part of the plaintiff for leave to deliver to the defendants interrogatories, which were put in for the examination of the solicitor or other officer of the Defendant Company.

Kent, K. C., was heard in support, and Mr. Higgins for the defendant company assented, and the matter was ordered accordingly.

## The Star Bank.

Last night was a record-breaker at the Star Bank. The idea has caught on with the members and a large number with their wives and daughters go there every Monday night to put away whatever can be spared during the week. Considering that the bank accepts as low as 20 cents and guarantees absolute safety and secrecy it is not to be wondered at, that the Star Hall is a busy centre for two hours every Monday night.

## Delayed by Large Freight.

The S. S. Stephano, Capt. Clarke, was expected to sail at noon, but owing to taking a large outward cargo of bulk fish, was delayed, and will not get away before 4 or 5 o'clock this evening. The following additional passengers are booked to go: Capt. and Mrs. Fitzpatrick, H. Rendell, J. H. Guzewell, G. Hintz, G. A. Moulton, Capt. Herald, Jas. Moir, Mrs. Dumaney and 15 second class.

The Prospero sails to-morrow for northern ports.

## Forest Fires Increasing.

The fire between Norris' Arm and Lewisporte is increasing in volume and violence to-day. The residents of Norris' Arm and the different lumber companies have men out in the woods fighting it. The Reid Mfd. Co. have no men there, nor have they heard yet of the extent of the damage.

To-day a new fire broke out at Jumper's Brook, between Bishop's Falls and Norris' Arm, and the companies have men also there doing their best to cope with the outbreak.

## Knocks State-Owned Cable.

British P. M. G. Says He's Sure It Would be Unwise Policy.

London, May 21.—Postmaster-General Samuel, in the Commons, threw cold water completely on the State-owned cable scheme. The more he considered it, the more he was convinced it would be an unwise policy. He alluded with gratification to the fact that two resolutions passed by the Imperial conference had already been adopted, viz. cheaper cables and an Imperial scheme of wireless telegraphy. The only other specific resolution dealing with the post office passed by the conference, was one which depended for its action on the Canadian and Australian Governments. It was for provision for British Imperial postal orders, by means of which small sums could be transmitted to various parts of the Empire. The Imperial Conference had passed a resolution with the sanction of the Prime Ministers of Canada and Australia, but he regretted that the Australian Government did not see a way to adopt the system.

Sir George Doughty urged a further reduction in cable rates, and Mr. Amery, M.P., advocated a State cable on strategic grounds, but Mr. Samuel said that in war a State cable could be cut as easily as any other, and most likely would be cut sooner.

## Modest Farmer

WANTS RICH WIDOW.

He Would be Satisfied if She Only Had Three or Four Million Dollars.

Winnipeg, May 23.—While the duties of the immigration commissioner are many, yet it is very doubtful whether he can be called upon or has the ability to secure a wife for a settler, especially when the new-comer demands that his future bride be blessed with a dowry from three to four million dollars. However, J. Bruce Walker, immigration commissioner, has been requested to find in Winnipeg a widow, both fair and the possessor of untold wealth. This extraordinary request was made in the form of a letter, the author being D. N. Timmens, of Monarch, Alta. The following is a copy of the epistle received by the commissioner:—

"I have the honor to let you know by this that I arrived at Monarch, Alta., on March 2, and that I took up a half section of land, 320 acres, at Carleton Place on the first of April. I have to settle on that land on October 1st next, but before going on it I wish to get married. As I am a nobleman and rich, I wish to marry a rich widow of 30 to 35 years of age, with about three or four million dollars. You will do me a great favor if you will give me the address of such a rich widow in Winnipeg."

"Send me the address as soon as possible of such rich widow and I think I can do the rest and marry her. Let me know at the same time how many millions she has."

"Write me as soon as possible, as I am in a hurry. I like better one without children."

## ALLURING ARGUMENT.

Agent—"Like some awnings, mum? We fit and fix 'em cheap."

Housewife—"I don't want awnings. They keep out the sun, and we get little enough sunshine here as it is."

Agent—"You need never use 'em, mum. They'll roll up."—New York Weekly.

## NOT AVAILABLE.

Maud—"Well, dear, have you found your ideal man, yet?"

Kitty—"Yes, but he's in a book."—Boston Evening Transcript.

## American Wins Prize

Melbourne, Australia, May 23.—The first prize in the competition for a design for the federal capital site has been awarded to Walter B. Griffin, of Chicago. The value of the prize is \$7,750.

The s.s. City of Sydney leaves to-morrow for Montreal.

## BIRTH.

## Here and There.

GOOD FISHING.—Passengers by last night's train tell us that around Conception and Trinity Bays there is good fishing.

WANTED 20 SMART BOYS.—Football, Troutling Rods, Troutling Bait, Cricket Bats, The Very Best, given away free. Apply to 62 Prescott St. m29,11.

HOTEL MOVEMENT.—The new hotel question will be taken up again at a meeting in the Board of Trade rooms to-morrow night and the prospectus will be submitted for consideration by the sub-committee.

SALES SATURDAY.—The Bruce which has been at the dock pier since Saturday, has been repainted and overhauled. She will be soon off dock and undergo Canadian inspection for her usual service across Cabot Strait.

ACKNOWLEDGEMENT.—The Superior of Mt. St. Francis begs gratefully to acknowledge per The Very Rev. W. D. Doughty, the sum of one hundred dollars, (\$100.00) from the estate of the late John Collins, Grandy's Point, Placentia west.—adv. 11.

PRIMA DUE.—The S. S. Prima is now fourteen days out from Antwerp to this port and may be expected any hour. She is consigned to Mr. A. H. Murray, and has a general cargo consisting principally of glass and cement. On arrival she will discharge her cargo at the wharf of the Furness Withy Line.

GAME BOARD MEETS.—The Game and Inland Fisheries Board met in the office of the Secretary last night. President Piccott was in the chair and matters in connection with the general work of the Board were dealt with. Wardens are being appointed for the protection of the various salmon and trout rivers.

## To Test New Lifeboat.

On Sunday May 12th, a test was made on the East River, New York, below Blackwell's Island, of a new type of lifeboat, known as the Lundin Seched Lifeboat. The trial, which was carried on by Captain Henry M. Seeley, Supervising Inspector of the U. S. Steamboat Inspection Service in the district, and Captain Charles E. McKay, of the U. S. Army Transport Service, was in every way successful, and Captain Lundin the inventor of the craft, seems to have solved the problem of the seaworthy boat, and one which can be stowed easily. With 65 passengers aboard the boat was rowed easily and rapidly by six men at the oars, and the united efforts of all on board to upset it or dip the gunwale were unsuccessful.

The boat has a decked hull with sides extending above the deck about fifteen inches, and protected by fenders of wood. Folding boards of substantial construction are hinged on the top edges of the sides, and may be raised in a second, automatically locking themselves in an upright position.

Protecting boards are then dropped in the edges, and is ready for lowering. The boat is 28 feet long and has a 9 foot beam, and though built to carry 60 persons, will hold one hundred. The eight watertight compartments are under the thwart and the floor of the boat is 5 inches above water level, with a double bottom under it.

The R. M. S. Carthaginian is due here on Saturday from Liverpool. The s.s. Florizel leaves New York on Saturday for here.

The Governor and Lady Williams will receive at Government House from 3:30 p.m. to 6 p.m. on Monday, the 3rd of June, in honour of the Birthday of His Majesty the King.

If the weather is fine the Reception will be held in the Garden.

F. H. GALE, Capt. A.D.C. may27,m,w,f.s

The Governor will hold a Levee at Government House, on Monday, the 3rd of June, at 11 o'clock a.m., in honour of the Birthday of His Majesty the King.

## Had Good Time

The Highlanders had a good time Monday night when Sergt. Pittman was winged and dined by the band. Mr. Pittman will leave shortly for Montreal. There was an excellent menu served. Before Mr. Pittman left was presented with a set of military brushes and was cordially cheered by every brigade boy present. Proceedings concluded with the National Anthem.

## Railway Traffic

Up to date this year the railway traffic is much larger than up to the same time last year. All excepting trains running to Port aux Basques are filled with people going abroad. It is likely that this year there will be 100 per cent more passengers carried over the railway line than last year.

## By Authority.

His Honour the Deputy Governor in Council has been pleased to appoint Dugald Munn, Esq. (Hr. Grace) to be a Notary Public for the Colony of Newfoundland, to be Surveyor of Lumber.

Dep't of the Col. Secretary.
