Always a Prized Possession

It is a noteworthy fact that Buick owners prize their cars so highly that they are reluctant to part with them even for new Buicks.

They hold for their Buicks the same sincere attachment that they might for any personal belonging which has proven indispensable to their daily comfort or which has contributed vitally to many of their most happy experiences.

Owners retain this life-long affection for Buick not only because Buick dependability and comfort more than satisfy every motoring desire. but because these same quailties find added expression in each succeeding Buick that they buy.
