GESTED.

One effect of the woman's suffrage agitation in England has been to bring about a lively discussion of the subject in the press. The correspondence columns of the big dailies are filled with letters in which arguments are advanced for and against giving to women the right to vote, and there are many who express the belief that the question is one which cannot be much longer ignored by statesmen.

One of the most interesting letters an the subject is that of a correspondent of the Manchester Guardian, who expresses the belief that the movement will not cease, because it urges a reform fundamentally just and in harmony with the whole tendency of modern development, and that it will not succeed, in its object because that object is wrongly defined.

What is needed, this correspondent says, is clearer conception of the esthat every responsible individual has a right to a voice in determining the issues, its publisher; bid fair to hit Double play-Osborn and McConnell. One great difficulty in the way of education is the extreme complexity of the Japanese language. Japanese students today are attempting what is cleverest of them-that is to say, two or three in every hundred. They are trying to learn their own language, which is in reality two languages, Providence49 blended or confused the one with the other, according to the point of view, Toronto 19 and attempting at the same time to learn English and German and to study three technical subjects like law, medi-

But as I understand, the pitcher threw the ball to first (Not merely This was a day marked by more first baseman). Therefore, the runner exciting racing in the main, and at first was forced, but the other two were not forced, as soon as man going to first is out.

You will have noticed that when a contests no less than four fouls ball is knocked to Rossman (with a were committed, in three different man on first) he first relays the ball races, two coming in one event, to second, and thus forces that man, each, and the others in different contests.
