Oriental Touch to This Model From Poret of Paris Problems of the Fair Sex

Poret's sense of ease, grace and novelty has been happily combined in this illustration, just received from Paris, of a one-piece misses' dress, which is equally pleasing when made up for the young matron.

It is a distinctly new idea on middy lines. The bodice and skirt are made

The lines are practically straight without being, in any sense, stiff. the one. The lines are practically straight without fashions.

The skirt is noticeably wider than previous fashions.

The striking feature of the costume is the oriental-locking girdle which the striking feature of the costume is the oriental-locking girdle which the oriental the hips as well as the waist, and serves to belt the hips as well as the waist, and serves to belt broad enough

In the dress.

Self-covered buttons are used as trimming on the broad, low belt; and a broad braid adds firmness to the lower edge of the skirt. Similar trimming, but narrower, is used on the sleeves.

but narrower, is used on the sleeves. The low collar and wide sleeves are finished with plain frilling.

#### Rugs for Camping

Rough, bare floors are rather cheeress even in camp, and yet the summer camper does not care to be bothered with one extra thing to pack up or put away when the bungalow is closed in the fall. Japanese jute rugs said to be helpful.

2. I suppose you mean on the hair? closed in the fall. Japanese jute 1050
are about as cheap as anything on the market, and yet their color and the market, and yet their color and 3. They should reach almost to the pattern do not show the soil like most

rugs in summer camps.

However, the chief advantage of these rugs lies in the fact that they are moth-proof, and so can be left on the floor or just thrown aside in a corner of the camp without fear

any damage to the rug itself.

The Japanese rugs are quite thick, it is rather course. They come in all and the jute has a silky texture, even sizes and in the dark coloring of the Japanese designs.

#### Some Summer Hints

For Prickly Heat.

Give frequent tepid sponge baths with one teaspoonful of bicarbonate of soda to a basin of water, then apply a powder composed of one ounce of talcum, one ounce of powdered cornstarch and two drams of boric acid. A bran bath is often helpful. A pint of bran should be put in a cheese-cloth bag and squeezed about in the bath water until the water looks like a thin gruel. Use a linen shirt under the silk-and-wool band if the body is much irritated.

For lvy Poisoning.

Dissolve one teaspoonful of bicarbonate of soda in a quart of water, wring linen cloths out of this solution and bind on the affected parts, changing often enough to keep the cloths moist. If the trouble is on the face, bathe frequently with this solution. Keep the bowels open by a mild laxative like magnesia.

As this is frequently caused by the child's eating something that does not agree with him, such as fish, strawberries or tomatoes, any one of the articles likely to cause the trouble must be stopped, then the bowels cleared out by caster oil or magnesic likely cause as well. cleared out by castor oil or magnesia and the mixture of rhubarb and soda given, from twenty drops to one teaspoonful according to the age of the child, three times daily after meals, continuing this for four or five days, or even a week. The local itching may be relieved by bathing with blcarbonate of soda water. Plenty of water must be given to drink between Hives are sometimes of rheumatic origin.

#### RELIEF FLOWERS.

Popularity of Italian relief embroidery revives one of the oldest lace stitches of the old world. form of the Brussels net stitch made very closely, and is practically the same as the familiar buttonhole stitch, says the New York Times. We are calling it relief embroidery the flowers made in this stitch are in mired. The foundation slip is of relief, being fastened to the fabric bedark blue satin, with a plain, medium neath only at the centre and at the full skirt. Over this was worn a apexes of the petals. The rest of the tunic of bright green chiffon, emembroidery is solid and in outline with breidered heavily with dull gold and the openwork spaces in punched work. embroidery is solid and in outline with

#### THE BUTTERFLY CRAZE.

There is at present a craze for butterfly effects. The design flutters on parasol tops, on smart vellings, and is worked in wonderful Iridescent effects with thick lips. on the new trimmings. The winged favorite is used also as shoe buckles, brooches, coiffure ornaments and beautiful designs are seen in enamels four hours lifts out every root, branch and stem of corns and warts. Just clean riddance to the old offenders—that's the way Putnam's Painless Corn and Wart Extractor acts. Refuse a substitute preparation for Putnam's thus any color can be added to the diamond's rimmed bow.

For Chafing During Summer Complaint.

Bathe the parts with olive oil—not water—then apply the following salve spread on soft linen: Two drams of cornstarch, two drams of oxide of zinc, thoroughly mixed with one ounce of petroleum. Apply fresh every time the baby is changed.

One little girl's life was made a torment because of the continual effort to keep quiet during school and study time. Finally she was sent to work time. Finally she was sent to work making a garden path for an hour every afternoon. A reward was promevery afternoon are the task was finished, ised her when the task was finished, ised her when the task was finished, it remain on for some minutes, then the baby is changed. learned to concentrate her energy on final rinsing.

Their Features Change.
About the age of eight the baby's features begin to change and the sweet baby look gives away to the water. I know of several babies whose humorous toothless expression. The first teeth drop out about now and the beauty of the second teeth depends greatly, some doctors say, entirely on how the first teeth were cared for. First teeth are often neglected and

allewed to decay. This is entirely wrong. If the first teeth are in bad condition when they fall cut, nine chances out of ten the second teeth will be touched by the same spot of decay and never get a fair start. First teeth should be brushed with care, and Miss Eight-Years-Old can be taught to brush up and down the teeth, not herizontally, and on the inside as well as outside of them. She should have fresh brushes at least once a month and the brushes should
