Chicago, Oct. 2.—Increasing drought damage in Argentina gave a basis today for a fresh advance in wheat prices here. Dispatches from Rosario, in the centre of the dry district, said the effects of the long-continued lack of rain were serious, and that all crops were suffering. Scantiness of receipts at the domestic spring wheat terminals and at Winnipeg tended also to handicap the bulls.

Opening quotations, which ranged from 40% to higher, with December at \$154% 0154%, and May at \$1540154%, were followed by moderate further gains. Chicago, Oct. 2 .- Increasing drought

The new Exchequer bonds, with the additional announcement that applications will be received shortly for amounts of £5 and upward, are still adversely affecting investment stocks, which continued to decline on the stock exchange today. Belief that a portion of the French loan will be offered here was an additional depressing factor. On the other hand, the banks are receiving liberal orders from customers to apply for the new exchequer issue. Japanese bonds and Kaffirs were about the only steady sections.
