OTTAWA, Sept. 21.—The office of the Dominion fuel controller to-day repeats the warning to coal dealers throughout the country that objection will be taken to any advance in the price of coal being made without notification first being sent to the fuel controller. The view of the fuel controller is that the coal dealers had a liberal profit last summer, sufficient to enable them to continue the present prices into the winter and give the smaller users of coal the same price notwithstanding any increase that the mines make at this time.

These Men Will Help You Decide

Are you liable to be selected for service under the Military Service Act? The answer to this question is being made readily available for you. Remember that the first class to be called includes only men between the ages of 20 and 34, both inclusive, who are unmarried or widowers without children, those married after July 6, 1917, being deemed single for the purposes of the Act.

Medical Boards are now being established throughout Canada. These Boards will examine, free of charge and obligation, all men who wish to be examined as to their physical fitness for military service. They will tell you in a very short time whether your physical condition absolves you from the call or makes you liable for selection.

It is important that you obtain this information as soon as possible. A certificate of unfitness from a Medical Board will secure for you freedom from responsibility under the Military Service Act from any Exemption Tribunal. A certificate of fitness will not preclude an appeal for exemption on any ground.

In order that you may be able to plan your future with certainty, visit a Medical Board as soon as possible and find out if you are liable to be selected. Your family and your employer are interested as well as yourself.
