

LETT'S

Solution of the Albuminate of Iron

is a definite chemical compound containing iron in the form in which it is found in the blood. So prepared that it is ready for **immediate** absorption and assimilation.

Par Excellence, the blood producer and proper form in which to administer salts of iron in **Anæmia** and **Chlorosis**. It readily increases the **Red cells** of the blood, raises the percentage of **Hæmoglobin** and markedly improves the character of the **Leucocytes**.

It is very palatable, perfectly bland and will not disturb the most delicate stomach. **It does not blacken the teeth** or stools, and **will not constipate** the bowels or dry up other secretions.

Put up in xvi.-oz. bottles only at **\$1.00** each, or in lots of not less than 1 doz. at wholesale rates.

Physicians' samples sent upon application.
