YOU NOW CAN KNOW THE REASON.—Podophyllin (May Apple or Mandrake) has long been known as an active purgative, and has been much used in some sections of our country, (and is now very generally administered by Physicians in the place of Calomel or Blue Pill for Liver Complaints, &c.) Compound Extract of Colocynth is considered by Dr. Neligan, of Edinburgh, as one of the most generally employed and refer exhaustics. generally employed and safest cathartics in the whole Materia Medica. Extract of Hy-oscyamus given in combination with active cathartics (such as above) corrects their grip-ing qualities without diminishing their ac-tivity. Vide Neligan's Materia Medica. All the above highly valuable remedial elements are with others largely used in the manufacture of the Shoshonees (Indian) Vegetable Restorative Pills.—No wonder they are ahead of all other Pills, as a family medicine. 5-9 d

The New York Express says the ladies might have their earrings of some practical value, especially in travelling, if, for instance, they would wear a good sized valise in one ear, and an ordinary lunch basket in the other.

A few days since the marshal at Milwaukee received a telegram directing him to arrest "a girl with a green dress on." He followed his too general instructions by arresting twentytwo of them, and then did not get the right

Old "stove pipe" hats may yet become valuable. A Philadelphia hatter, recently established at Madras, has written for a large consignment of them, for the use of the natives'

NITED STATES PATENTS. HIGHLY IMPORTANT TO CANADIAN IN-VENTORS.

We have this morning received intelligence from Washington that Congress, now in Session, will repeal the liberal Patent Law passed last Session in favor of Canadian Inventors. This action is in consequence of the Government of Canada refusing to reciprocate. Inventors in Canada wishing to obtain United States Patents, under the existing low fee, should apply immediately to us to get the Patents through before the change in the Law, which will prevent Patents being granted to Canadians on any terms.

DR. WHEELER'S COMPOUND ELIXIR OF PHOSPHATES AND CALISAYA.

THERE is no diseased condition of the body in which Dr. Wheeler's Compound Elixir of Phosphates and Calisaya may not be used with positive benefit. Being a Chemical Food and Nutritive Tonic, it acts physiologically in the same manner as our diet. It perfects Digestion, Assimilation, and the formation of Healthy Blood. It sustains the vital forces by supplying the waste constantly going on, of nerve and musele, as the result of mental and physical exertion, enabling mind and body to undergo great labour without fatigue. Its action in building up constitutions broken down with Wasting Chronic Diseases, by fast living and bad habits, is truly extraordinary, its effect being immediate in energizing all the organs of the body. Phosphates being absolutely essential to cell formation and the growth of tissues, must for all time be Nature's great restorative and vitalizer.

Sold by all Druggists at \$1.

PROSPECTUS.

THE MONTBEAL WAREHOUSING COMPANY.

Incorporated under 28th Vic., Cap 48.

AUTHORIZED CAPITAL,.....\$1,400,000 PROPOSED ISSUE,..... 600,000

DIRECTORS FOR 1871-72.

SIR HUGH ALLAN, President.

THOMAS CRAMP, Esq., Vice-President. CHARLES J. BRYDGES, Esq. Edwin H. King, Esq. Hon. Henry Starnes.

Bankers, The Merchants' Bank of Canada. Solicitor, Hon. J. J. C. Abbott, Q.C., D.C.L. Brokers, Messrs. Macdougall & Davidson.

THIS COMPANY was organized in 1869 by a few gentlemen for the purpose of giving greater facilities and security to the holders of Warehouse Receipts, and increased accommodation for the storage of goods.

This increased security has been attained, partly by the terms of its charter, which enacts that the simple handing over of the Company's Receipt constitutes an actual delivery of the property represented by it, and partly by reason of the Company confining itself to its business as Warehousemen, being neither dealers in nor manufacturers of the goods committed to its care.

committed to its care.

But the Company has been unable to provide storage room as fast as was wanted. The whole of its first year was taken up in strengthening and renovating the Wellington Street Stores, and this work was still incomplete when the fire of June, 1870, occurred, which consumed half the premises, including the machinery for handling grain. The Directors at once proceeded to re-erect the burnt portion, and took advantage of the occasion to more than double its size, and greatly to improve its machinery. These new premises have now been in active and satisfactory operation for rather more than six months, and, in point of situation, stability, and facilities for doing a miscellaneous business, are probably unsurpassed by any similar warehouse in America.

Advantage was then taken of the extension of the

Advantage was then taken of the extension of the railway track to the wharves last summer to lay a siding along the Company's working reservation on Wellington Street, and at the same time a piece of land leased from the Government was covered by a large Flour Shed, with a view to provide additional accommodation for the increased business expected from this connection.

But all this has proved insufficient. Throughout the autumn, and even up to the present time, goods offered on storage have had to be refused or sent to other warehouses.

The Directors have therefore felt constrained to go on, and further extension on Wellington Street being impossible, they have recently purchased at a moderate price from Messrs. Grant. Hall & Co.. the well-known Royal Mills and Warehouses,—certainly the best and most improvable site on the south side of the Canal. the Canal.

The Company's business having thus extended far beyond the intentions of its promoters, the Directors are of opinion that it should now have a subscribed capital commensurate with the value of its property, and that all its customers, as well as the public generally, should have an opportunity of taking shares in it.

Notwithstanding the drawbacks arising from the suspension of business and the rebuilding and renewing of the stores, the earnings of the past three years have proved fairly remunerative, the dividends paid having exceeded Ten per centum per annum on its paid-up capital, a moderate amount having been reserved,—a return somewhat larger than is usual from investments in Real Property.

It is now proposed to re-organize the Company with a capital of \$600,000, in 12,000 shares of \$50 each. The proprietors retain 6,000 shares: and 6,000 shares are offered for public subscription.

offered for public subscription.

The terms of subscription will be that Ten percentum of the amount subscribed shall be paid on allotment, and Ten per centum on each of the first days of the months of April, May, June, and July, next ensuing—being Fifty per centum in all, which will suffice to pay off the mortgage referred to below, to meet the first half of the purchase-money of the Royal Mills property, and to provide some additional "plant" required for next season's work. Further calls, not exceeding Ten per centum each, to be at the discretion of the then Directors, on their giving not less than thirty days notice of each call.

The present proprietors transfer their Wellington

The present proprietors transfer their Wellington Street property as it now stands (together with their entire business) in exchange for \$300.000 of paid-up stock; there is on it a mortgage of \$60.000, due in August next, and a ground rent due to Government of \$700 per annum. The Royal Mills property will be transferred at cost price, \$125,000; it has a ground rent due to Government of \$400 per annum.

The Storage capacity of these premises is-

Bushels Barrels Grain. Flour. 850,000 100,000

And it is in contemplation to increase the latter (the cost of such increase being provided for in the present issue of stock) by...... 150,000 60,000 In all......1,000,000 160,000

As above stated, the dividends paid by the Company during the time it has been in operation have averaged over Ten per cent. per annum, and though the Directors are not prepared with any guarantee for the future, they look with much confidence to the maintenance and enlargement of their business, while, as the basis of this Company is real estate most advantageously situated, the prospective in-

crease of all such property is an important element in a calculation of future results. Applications for Stock may be entered in the Subscription Book at the Office of the Company's Brokers, and allotments will be made by the Directors pro rata on the amount of each subscriber's

By order of the Directors

THE DOMINION TELEGRAPH INSTITUTE. 89 ST. JAMES STREET, MONTREAL, P. Q.

GEORGE E. DESBARATS,

Proprietor. Established for the purpose of qualifying Operators for the new Telegraph Lines now building throughout the Dominion and the

building throughout the Dominion and the United States.

This Institution having been established three years, may now be considered a permanent College. Its rapid growth and prosperity are due to the demands of the Telegraph community, and the great success which has attended the Proprietor is due simply to the able manner in which the system has been conveyed to the Pupils by the Professors attached to the Institute.

The rapid development and usefulness of the Electric Telegraph, and the consequent ever-increasing demand for First-Class Operators render the opening of Colleges for instruction a positive necessity. Telegraphic Superintendents view this movement as one made in the right direction. Commercial Colleges have, to some extent assumed the responsibility of teaching in this, as well as in other branches of business education. The knowledge of Telegraphy cained in this manner has always been looked upon as being second rate. So much so that the Colleges in Chicago, Milwaukee, Buffalo, New York, &c., have discontinued the practice of Teaching Telegraphy, and recommend the Telegraph Institute as the proper place to acquire this highly interesting, scientific and profitable art.

The prospects for Young Men and Ladies to study the system of Telegraphy could not be better than at present, and we call upon all who wish to engage in a pleasant and lucrative employment, to qualify themselves as Operators on the Lines of Telegraphy. At first salaries of \$30 a month may be secured: after two years' experience on the lines, from \$50 to \$50 a month can be commanded; while in the United States from \$60 to \$120 per month are paid. The possession of a knowledge of Telegraphy is especially open to Ladies; in fact, they are the favorites as operators both in England and America, commanding higher wages, as compared with other employments, than men, while they have the natural facility for acquiring the system sooner. A fair knowledge of reading and writing are the only qualifications necessary, and any person of ordi

THE DUTIES OF AN OPERATOR.

montake down a message at the rate of from 25 to 30 words a minute.

THE DUTIES OF AN OPERATOR.

There is no trade or profession which requires so small an amount of labour, and at the same time where the employee has the same amount of freedom and independence, being at all times master of the instrument over which he presides, generally in an office by himself, without either foreman or master, merely to take and despatch messages. The usual hours of attendance required are from 10 to 12 hours per day, less the usual hours for meals. Operators are not required to work on Sudays. The Institute is fitted up in a most complete and practical manner, with all the usual fixtures, &c., of a regular Telegraph office on a large scale. Messages of every description. Train news, arrivals and departures, Market Reports and Cable messages are sent and received, as daily practised on the lines. Individual instruction is given to each pupil, according to his capacity of learning the science. Neither pains nor expense is spared to qualify the students for important offices, in the shortest possible time. Students may commence their studies at any time, and continue at the College until they are proficient operators, without any further charge. There are no vacations. Hours of attendance, from 9 A.M. to noon, and from L.30 to 6 P.M. The time occupied in learning averages fifteen weeks; but this, of course, depends principally on the capacity of the pupil for instruction. Some pupils who are now on the lines completed their course of study in from five to eight weeks.

The terms for the full course of instruction are Thirty Dollars. There are no extra expenses, as all necessary materials, instruments, &c., are furnished to each student.

In cases of broken communication, the repairs will be conducted by a Professor of Telegraphy, under the eyes of the Students; so that a really practical knowledge may be attained in every branch of the Science of Telegraphy alone is taught, and is also the only one connected with an out door c

regular service.

An "Evening class" has been especially opened for students who cannot attend during the day.

Ladies have the opportunity of studying in a separate class.

GEORGE E. DESBARATS, Proprietor.
