

THE REPRESSIVE POLICY.

Salisbury Induces in a Feeble Attack upon Mr. Gladstone and his Followers.

Republiates the Word Coriolan—Mr. Gladstone's Attachment for America and Colonial Sympathy with the Irish Cause—Morley Buldoizes—Gladstone—The Parnellites Indignant.

LONDON, April 20.—Lord Salisbury, in an address before the Primrose League at Albert Palace last night, said the low satisfaction expressed during the Eastern Holiday by the Opposition had failed, and the Government course was his country's vast machine, pursued in Ireland, and against which the facing Government intended to struggle with all the resources of the State.

FARM AND GARDEN.

GENERAL AGRICULTURAL NOTES.

Plants do better when watered often, but copiously.

Snap seeds is a splendid fertilizer for flowering plants.

With a good home-made hotbed, the construction of which any woman can at least superintend, and proper seeds, the battle for a floral display is half won.

Lucerne is a valuable leguminous plant that thrives in good soils of a fine calcareous nature.

A Western inventor claims that prairie grass, ground into a pulp with corn stalks and pressed into blocks, makes an excellent substitute for wood and coal.

The sulky or riding plough, on which the ploughman is carried around the field while the work is done, revolutionizes all the old ideas about ploughing.

Eggs intended for hatching should not be over two weeks old.

Just here, we will say to those who complain of receiving no eggs, to change the food by giving a goodly supply of wheat once a day.

Milk may be seasoned just as you would can fruit. Bring your milk to the boiling point and fill your jars to the brim with it; then shut airtight.

Michigan has passed a law against the adulteration of honey. Iowa has prohibited dealing in diseased hogs.

South Carolina has passed a severe special law punishing the stealing of vegetables and garden produce.

The soundness of a log of timber may be ascertained by placing the ear close to one end of it, while another person delivers a succession of smart blows with a hammer or mallet upon the opposite end.

One of the difficulties in growing wool in far away localities is that the quality of the wool deteriorates.

As a rule, milk is richer in the fall and poorer in the spring.

It is a pleasure to some to train certain kinds of bushes into standards, so they may form miniature trees.

ing them perfectly air tight. As soon as the eggs have been collected the jars are placed in hot water for some time and left until the air in them has been thoroughly heated. The jars having been heated, the eggs are wrapped up in paper to prevent them knocking together, and placed in a warm receptacle, their pointed ends being uppermost. The jars are immediately closed up, and then, and not until then, are removed from the hot water.

The following principles, says Langensh, the eminent bee keeper, underlie, and govern profitable bee keeping and honey producing:— 1. Bees gathered with honey never volunteer an attack.

2. Bees may always be made passive by inducing them to accept of liquid sweets, or by drumming on their hives, till themselves with honey and lose all disposition to sting, especially if the motion jars their comb.

3. In districts where forage is abundant only for a short period, the largest yield of honey will be secured by a very moderate increase of managing brood.

4. Queenless colonies, unless supplied with a queen, will inevitably dwindle away or be destroyed by the bees, or by robbers.

5. The formation of new colonies should ordinarily be confined to the season when bees are accumulating honey; and if this or any other operation must be performed when forage is scarce the greatest precaution should be used to prevent robbing.

6. The absence of a profitable bee keeping is contained in this golden rule:—Keep your stock strong. If you cannot succeed in doing this the more money you invest in bees the heavier will your losses; while if your stocks are strong you will show that you are a bee master as well as a bee keeper.

7. The essence of a profitable bee keeping is contained in this golden rule:—Keep your stock strong.

8. The formation of new colonies should ordinarily be confined to the season when bees are accumulating honey; and if this or any other operation must be performed when forage is scarce the greatest precaution should be used to prevent robbing.

9. The absence of a profitable bee keeping is contained in this golden rule:—Keep your stock strong.

10. The formation of new colonies should ordinarily be confined to the season when bees are accumulating honey; and if this or any other operation must be performed when forage is scarce the greatest precaution should be used to prevent robbing.

11. The absence of a profitable bee keeping is contained in this golden rule:—Keep your stock strong.

CARTER'S LITTLE LIVER PILLS.

CURE SICK HEADACHE.

Headache, yet Carter's Little Liver Pills are equally valuable in Constipation, curing and preventing this annoying complaint, while they also correct all disorders of the stomach, regulate the liver, and soothe the bowels.

ACHE.

Is the name of so many lives that here is where we make our great boast. Our pills cure it while others do not.

Illustrative Sample Free. SELF-PRESERVATION.

HEAL THYSELF! Do not expend hundreds of dollars for advertised patent medicines at a dollar a bottle, and trounce your system with nauseous slops that poison the blood, but purchase the Great and Standard Medical Work, entitled SELF-PRESERVATION.

Three hundred pages, substantial binding. Contains more than one hundred invaluable prescriptions, embracing all the vegetable remedies in the Pharmacopoeia, for all forms of chronic and acute diseases, besides being a Standard Scientific and Popular Medical Treatise, a Household Physician in fact. Price only \$1 by mail, postpaid, sealed in plain wrapper.

ILLUSTRATIVE SAMPLE FREE TO ALL, young and middle aged men, for the next ninety days. Send now or cut this out, for you may never see it again. Address Dr. W. H. PARKER, & Bulfinch St., Boston, Mass.

BUCKEYE BELL FOUNDRY. MEENELLY BELL COMPANY.

The Finest Grade of Church Bell. Greatest Expense. Largest Trade. Illustrated Catalogue mailed free.

McShane Bell Foundry. "25 Years in the Poultry Yard".

How to feed for Eggs. How to prevent HOG AND POULTRY CHOLERA, GAFER and HOPE. I wrote it as a system of practical HOG and POULTRY keeping.

HAYWARDS YELLOW OIL. CURES RHEUMATISM.

FREEMAN'S WORM POWDERS. Are pleasant to take. Contain their own purgative. Is a safe, sure, and effectual destroyer of worms in Children or Adults.

PERFECTLY RELIABLE ARTICLE OF HOUSEHOLD USE. COOK'S FRIEND BAKING POWDER.

It is a preparation of PURE and HEALTHY ingredients, used for the purpose of RAISING and SHORTENING, calculated to do the BEST WORK at LEAST possible COST.

TEACHER WANTED—FOR S. S. No. 6. Mintoque and Wicklow, a Teacher (Male or Female) holding a Second or Third Class Certificate. Salary \$20 per month.

Canada Province of Quebec. DISTRICT OF MONTREAL. Superior Court. Notice is hereby given that Dame Marie Albina Corbelle, of the Parish of St. Leonard de Port Maurice, wife of Leon Gagnon, of the same parish, farmer, has instituted an action for separation as to bed and board against her husband.

L.S.L. CAPITAL PRIZE, \$150,000.

UNPRECEDENTED ATTRACTION! OVER HALF A MILLION DISTRIBUTED.

Louisiana State Lottery Company. Incorporated in 1885 for 25 years by the Legislature, for Educational and Charitable purposes.

Capital Prize, \$150,000. Notice—Tickets are Ten Dollars only.

ALLAN LINE.

1886—Winter Arrangements—1887. This Company's Lines are composed of the following double-engined, Clyde-built Iron Steamships.

Table with columns: Vessel, Tonnage, Commanders.
