Graphite knee orthosis

Company Summary

Karl Hager Limb & Brace Ltd., founded in 1971, designs, manufactures and markets across North America a line of prosthetics, orthotics and custom-made orthopedic products. The company's lightweight graphite knee orthosis provides medial, lateral, anterior and posterior stability and controls excessive rotation as well as hyperextension. Currently, the company is researching more efficient production techniques and conducting an extensive market analysis of its products.

Products/Services

Wheelchair lift and transfer system

Company Summary

Kel-Vec-Bec Ltd. was established in 1979 to research, develop, manufacture and market an automatic wheelchair lift and transfer system for full-size sport utility vehicles. The lift is custom built into each vehicle at the company's manufacturing facility in Ontario. The device raises the wheelchair occupant to the elevation of the vehicle and sliding sideways, places the wheelchair in the driving position.
