Trade was active in all the different classes, owing to the large number of buyers and a short run, all the leading abattoirs and wholesale butchers being abattoirs and wholesale butchers being represented on the market.

And, besides these, there were several outside points, such as Montreal and Hamilton, that had buyers in attendance, but owing to higher prices did not operate very heavily.

Business opened up early in the day and continued active until all effectives were cleaned up, which was before the moon hour.

Cattle prices advanced fully for per cwt. the market closing without a frm tone, and some of the buyers stated to The World that prices were fully 40c up. But the majority of the delers reported that 25c advance was a fair quotation.

Water Escaping From Break in Big Pipe, Boiled by G. T. R. Steam

The Tellowetone Geysers are back numbers and the Banff Hot Springs fade into insignificance when the citizens of Toronto view their own little hot springs created in the railway yards at the foot of Peter-street, by the breaking of one of the small water mains, and the subsequent boiling of the water by the steam pipes which pass over it from the Grand Trunk can-hearting plant.

The medical health officer was accustomed to advise the citizens to boil their drinking water, but if we could only have all the water heated in this way, we would not only have billed drinking water to drink, but we would have to rise in our wrath in the early hours of the morning and curse the cook for not having hot water for our bath. Truly wonders never cease in this fair city of ours.

The break that occurred Sunday evening has not inconvenienced the railroads up to the prestint time, but it is causing the city waterworks department a whole lot of worry to determine a way of repairing it. The steam pipes that lead from the plant that is used to heat the passenger cars are laid just over the top of the main was turned off, these steam pipes immediately heated the water left in hole where the break occurred to a boiling point.

The hole caused by the break is getting quite large and is spreading constantly owing to the action of the holling water. The only way out of the difficulty at the present time is to have the Grand Trunk shut down their steam plant, which would cause a lot of inconvenience, as it is the only means they have of heating their massenger coaches. A large force of men were kent going trying to fill up the hole all day y priday, but little was accomplished owing to the action of the water.

THE CRY OF THE CANADIAN WEST.

WINNIPEG, Jan. 1.—(Special.)—At last the Canadian west is bursting its mysterious bands that have crippled public action in regard to unfair and extontionate ratilway charges—freights, passenger and telegraphs—that have prevailed, and now the cities and towns, farmers and dealers are demanding action on the part of the government and the railway commission. Equally strong is the movement against the insufficiency of the railways and their equipment to move the crops. There is a cry coming from the west that will arouse the east to action and to redress.
