FALL CULTIVATION FOR WEED CONTROL	HARVESTING AND STORING VEGETABLES	The success for Cale-1
Necessary.	While vegetables have been har- ested continuously in many gardens of Canada since radishes and spinach vere ready for use in early spring, he time has come when the bulk of he crop must be gathered to escape of sap into the head. If the cellar	the employed in producing nubbins he quality than heretofore this season, would be required to grow full ears. ranging in price from 50c to \$1.10 per low. The more bushels of corn to the acre, six-quart basket, and 75c to \$1.75 per low.
the plowing of the land in the fall a desirable as a part of the regular reach of the farm, since it enables the round to be got into proper condition of the seed in spring consideration of the seed in spring consideration.	As beans discolor and mould very eadly, it is important to dry them is soon as possible, and to keep them lry. They should be spread out thiny under cover, and turned every two or three days until quite dry. If it	the labor required to grow each bushel. To save labor during the preparation of the ground, and the planting, cultivation, and harvesting of the crop in relation to the quantity of corn grown, the wise farmer will are significantly firmer, selling at 40c to 60c per six-quart, and 55c to 51.25 per 11-qt.;
grave. But it is perhaps of even greater im- rtance as a means of keeping weeds check. In the case of perennial k	ore they are thoroly ripe they can be hung up outside until dry. There will be many potatoes which will not ripen before the plants are dilled by the frost. If the fully-	two years' seed supply. He will not make seed gathering a merely incidental operation, connected with harvesting or shucking, but will devote this whole attention to the selection of the best ears as they grow in the
the frost will serve as a consider- e check to the weeds in cases are they are not killed outright.	frown green specimens are picked be- ore being frozen, and each specimen trapped in paper and stored in closed coxes, they will be found, from tests ande at the Experimental Farm, to ipen better than by exposing their to the sun. Even if put into closed	has to contend with. By thus using his time this fall he will have the labor of many men all next season. In other words, says the department, the stalk of corn that produced well under ordinary field conditions, in market this season. Bartletts, as Hiscott Bros, have been shipping to Stronach & Sons right along, and yesterday Will Ferminger shipped from Henry Knight's orchard to the Union Fruit & Produce, Ltd., some of the best quality Bartletts seen on the market this season.
re readily accomplished where the und has been pulverized by the and snow of winter. the case of annual weeds, these of two classes from the point of very of their life history. One group a	men, they ripen well. Frequently cauliflowers are just be- rinning to head when it becomes ne- lessary tto harvest them owing to se- ere frosts. If the plants are pulled separate from the rest and used fit	over by to transmit high yielding ability to its seed. Where field seed selection results in doubling the acre yield, the result is practically equivalent to cutting down by one-half the labor required to produce the crop. McWilliam & Everist, Limited, Soid peaches at 50c to \$1.10 per six-quart basket, and 85c to \$1.75 per 11-quart basket, an odd one at \$2: plums_at 50c to be result in peaches at 50c to \$1.25 per 11-quart; the peaches at 50c per six-quart and 90c to \$1 per 11-quart; grapes at 40c to 50c per six-quart, and a grapes at 40c to 50c per six-quart and a grapes at 40c to 50c per six-quart and a grapes at 40c to 51 per 11-quart; grapes at 40c to 51 per 11-quart; grapes at 40c to \$1.25 per 11-quart basket, and \$2.25 plums_at 50c to \$1.75 per 11-quart basket, and \$2.25 plums_at 50c to \$1.75 per 11-quart basket, and \$2.25 plums_at 50c to \$1.25 per 11-quart basket, and \$2.25 plums_at 50c to \$1.25 per 11-quart basket, and \$2.25 plums_at 50c to \$1.25 per 11-quart basket, and \$2.25 plums_at 50c to \$1.25 per 11-quart basket, and \$2.25 plums_at 50c to \$1.25 per 11-quart; peaches at 50c to \$1.25 per
de will germinate, and this holds v deven if the conditions with re- f to moisture and temperature are	eloping, and one can have cauliflower should be dry when they are stored or some weeks. Brussels sprouts can keep onions dry, spread this liso be replanted in this way. Both of these vegetable may however he should be replanted in this way.	The Ravages of Peach Canker. In passing thru the peach orchards of Niagara Peninsula, or elsewhere in Ontario where peaches are grown one age of the peach orchards orc
mination can be delayed for sev- lyears if the seeds are buried to a siderable depth in the soil. This true of such species as wild oats wild mustard. Each time the sur- of the ground is disturbed some	Maberly Sept.	constantly meets with large, dark gummy lesions on the trunks or limbs of the trees. This diseased condition of the branches was formerly given the name of gummosis" on account of the gum exudations which are so regular to the gummy lesions on the trunks or limbs of the trees. This diseased condition quart, and \$1.10 to \$1.65 per 11-quart; or gummy lesions on the trunks or limbs of the trees. This diseased condition quart, and \$1.10 to \$1.65 per 11-quart; or gummy lesions on the trunks or limbs of the trees. This diseased condition quart, put to \$1.25 per 11-quart; or gummy lesions on the trunks or limbs of the trees. This diseased condition quart; plums at 75c to \$1 per 11-quart; or gummy lesions on the trunks or limbs of the trees. This diseased condition quart; plums at 75c to \$1.25 per 11-quart; or gummy lesions on the trunks or limbs of the trees. This diseased condition quart plums at 75c to \$1.25 per 11-quart; or gummy lesions on the trunks or limbs of the per six-quart, and \$1.10 to \$1.65 per 11-quart; or gummy lesions of the trees.
into the soil in the meantime, the mid will eventually become clear of another group of annual species on as winter annuals the seeds.	Madoc Oct. 1	study of its nature indicates that this disease clearly belongs to the type of affection known as canker, for which according to W. A.
