

- 47.—MALE 47. *Myodegeneration of Heart*; cor bovinum; atheroma of coronaries; general anasarca; right hydrothorax; pulmonary embolism with infarction; healing infarct of spleen; acute parenchymatous nephritis; congested organs; left old pleural adhesions; right reducible inguinal hernia; accessory spleens; patent foramen ovale. No cultures taken. 55.—
- 48.—MALE 3. *Right Broncho-Pneumonia*, following operation; septicæmia; general hyperplasia of lymph glands; cloudy organs; focal necroses in liver; ascariasis. Agar cultures from spleen, liver, heart blood and operation wound gave staphylococci; pericardium and mesenteric gland, sterile. 56.—
- 49.—MALE 80. *Bilateral Suppurative Pyelonephritis*; hypertrophy of prostate; acute cystitis; vesical calculus; false passage of urethra; catarrhal enteritis; atheroma of aorta; mitral, aortic and tricuspid valves; brown atrophy of heart; emphysema of lungs; obsolescent tuberculosis of right lung; bilateral reducible inguinal hernia; patent foramen ovale. Agar cultures from heart blood and spleen, sterile; from peritoneal cavity, *B. coli*. 57.—
- 50.—MALE 48. *Chronic Interstitial Nephritis*; uræmia; acute necrosing cystitis; sialodochitis pancreatica purulenta; caseous tuberculosis of epididymes; obsolescent tuberculosis of right lung; local acute fibrinous peritonitis; atheroma of aorta; ankylosis of right hip joint; leucoderma; bilateral old pleural adhesions; accessory spleen; patent foramen ovale. No cultures. 58.—
- 51.—FEMALE 25. *Lieno-Medullary Leukæmia*; slight hyperplasia of lymphatic glands; splenic tumour; puriform appearance of bone marrow; infarction of left lung and spleen; chronic parenchymatous nephritis; verrucose mitral endocarditis; old perisplenitis; left old pleural adhesions; cystic ovaries. No cultures. 59.—
- 52.—FEMALE 56. *Atrophic Cirrhosis of Liver*; general anasarca; ascites; right hydrothorax; enlarged mesenteric glands; lymph in omentum: compression of right lung; fibrosis and fatty infiltration of pancreas; chronic interstitial nephritis; general arterio-sclerosis of medium-sized vessels; aneurysm of right renal artery; thrombi in auricles; infarction of spleen and left kidney; old perihepatitis and perisplenitis; bilateral old pleural adhesions; omental adhesions; adenoma of thyroid; cystic ovaries. Agar and broth cultures from the spleen, kidney, liver, mesenteric glands, ascitic fluid and heart blood gave the diplococcus form of the *B. coli*; the bile, negative. 60.—
- 53.—MALE 58. *Pernicious Anæmia*; dilatatio cordis; fatty degeneration of heart and kidneys; acute follicular and diphtheritic enteritis; atheroma of aortic valves; latent tuberculosis of left lung; bilateral old pleural adhesions. Cultures from heart blood gave staphylococci; from liver and spleen, sterile. 61.—
- 54.—FEMALE 55. *Chronic Fibroid Tuberculosis of Lungs*; bronchiectasis, caseous bronchitis; catarrhal gastritis and enteritis; ulcerative duodenitis; fatty heart; cloudy organs; cholelithiasis; bile cysts of liver; Liebermeister's grooves; atheroma of aorta; old perihepatitis; old omental adhesions; bilateral 62.— 63.—
