feb 12 tf GOLD 7-30 LOAN.

A profitable and secure Investment. THE Northern Pacific Railroad Companyoffer to the public an investment security which

combines the ready negotiability, the conveni-ence, and the high credit of a first-class Rail-road Bond, with the solidity and safety of a Real Estate Mortgage on Land worth at least twice the amount loaned.

Traffic. As officially reported, the gross earn ngs of the present Pacific Railroad (Union and Central) for 1871, the second year of through business, (December earnings estimated) reach Seventeen Millions and a Quarter. Of this, 65-per cent. is from Local business, and, it is stated.

fully 55 per cent, or nearly Nine and a Half Millions, are net over operating expenses An equal traffic on the Northern Pacific Road will pay a divid nd of more than 91/2 per cent its total cost. With its great and unquestion advantages in distance, grades, climate and tri-butary fertile country, the Northern Pacific is assured of a vast and profitable business from the outset, with a large increase for the future. The Value of Land Grants. The average price at which the twenty-six leading Land-grant Railroads have thus far sold their lands, is \$7.04 per acre—the highest average of any grant being \$13 98, and the lowest \$3.07. With few excepion, the average selling price has steadily in creased from year to year. The lands of the Northern Pacific Road are admitted, by all who have seen them, to be better and more salable than those of most other grants, but, sold at the general average of \$7,04 per acre, they will yield more than \$161,000 per mile of road—more than three times the possible cost of construction and equipment; or, at the lowest average of and

Railroad Lands, as shown by actual sales to ern Parific R ilroad Bonds. Construction. The road is now completed across Minnesota, (255 miles); work is progresncross Minnesota, (255 miles); work is progressing westward through Dakota, and 65 miles are under construction on the Pacific coast. Including purchased lines, the Northern Pacific Company now has under its management 575 miles of finished track. Contracts are let for the construction of 635 miles more, to be finished before the close of 1872.

The 7.30 Gold Bonds. The first mortgage hands of this company, which, after full investi-

bonds of this company, which, after full investi-gation, we strongly recommend as a reliable and unusually profitable investment, and which now stand among the solid and favorite securities of the country, have the following leading features; the country, have the following leading reactives:

1. They are exempt from United States tax:
the Principal and Interest are payable in gold—
the principal in 30 years, and the interest semiannually at the rate of 73-10 per cent. per
annum, Denominations, from \$100 to \$0,000,
Present selling price—par and accrued interest in United States currency at pres nt rate of gold (109) these bonds yield 8 per cent gold

2. The bonds are a first and only Mertgage on the Road, its Equipments and Earnings, and also on a Land Grant which on the completion of the Road will average 23,000 acres to each John Armstrong & Co. mile of track,
3. They are at all times receivable at 10 per cert, premium (1.10), in payment or exchange for the Company's Land at market prices—a

for the Company's Land at market prices—a provision which practically gives the holder the power of freclosure at will.

4. The proceeds of all sales of Land are required to be devoted by the Trustees of the bondhold rs. (Messrs. Jay Cooke and J. Edgar Trumpagn). as a Sinking Fund is the procedure. Thompson), as a Sinking Fund to the purchase and cancellation of the first mortgage bonds, or temporarily to the payments of interest thereon if necessary.

Exchanging 5 20s. In view of the ability and

fixed policy of the Government to call in its 5-20s and substitute a low-interest bond,— \$140.000,000 having been called in for cancellation since September 1st-many holders of 5-20s are exchanging them for Northern Pacifics, thus adding to their principal the present premium on Government Bonds, and increasing their yearly interest income nearly one third. All marketable stocks and bonds will be received at current prices in exchange for Northern Pacific Seven-Thirties without exense to the investor.
