## Pays for Itself

**A**NY one of over 75,000 users will tell you that Delco-Light pays for itself.

*In money.*

They will tell you that the pleasure and comfort of Delco-Light cost you nothing.

Delco-Light does work on the farm. Saves time for more productive things. Its electric power will, in most cases, save enough time to pay for the complete Delco-Light plant in three years.

The electric light you get free.

**C**HORES are „non-productive work. Cut down chore time and you can do things worth money to you. Wm. Schneekloth says the electric power from his Delco-Light plant saves him 8½ hours a week on the churn, separator and washing machine alone—over 40 working days in a year. Think of the money he can make in those forty days.

On the Helms farm at Belleville they use Delco-Light power for the chores—in milking and feeding stock, in pumping water, in ironing and washing—and save 19 hours a week or about three months of one man's work in the year. Here's a hired man's work for three months which Delco-Light does. The cost of operating Delco-Light is less than the cost of oil for lamp.

But operating the small machinery around the farm is only a part of the work which Delco-Light does for you. Take the question of pumping water; with Delco-Light you can have water under pressure at taps anywhere on the farm. You can water stock easily and quickly. You can have hot and cold water in the house. S. W. Cooke and Son of Maysville, have a big herd of Holsteins. Delco-Light has pumped the water and done the milking for three years. They figure that their saving is not less than \$1,800. As Mr. Cooke says, they could pretty nearly afford a new Delco-Light plant every year. And remember this saving does not include the convenience and comfort and saving of electric lights.

J. H. Lackey raises Polled Jerseys and Poland China Hogs. He, also, needs a lot of water. His Delco-Light outfit enables him to get along without two men he formerly hired.

**A**ROUND THE HOUSE there is a great big saving of time and work for your wife—time she can very well use for her chickens or her garden or her dressmaking. A. F. Hinnekamp tells us that Delco-Light saves his wife 416 hours of housework a year by operating an electric iron, a vacuum sweeper and a washing machine. Besides—no lamps to clean, no matches to use, no danger of fire, lots of light.

C. F. Tressin adds in the time saved from cleaning lamps and makes a total of 547 hours a year. Think of all the things your wife could do with that extra seven weeks. And then you have electric light. You can't know the joy and comfort of electric light till you have experienced it. Just press a button and release a flood of bright, clean, safe light. No matches. No lamps. No danger. Delco-Light gives four times as much light from a gallon of coal oil as a lamp gives.

**D**ELCO-LIGHT is a complete electric light and power plant, easy to install and easy to care for. It will give twenty-four-hour-a-day electric light and power service.

Delco-Light is direct-connected. There are no belts to slip, break or be replaced.

It is self-kranking. Pressing down a lever starts the engine.

It is air-cooled. There is no water to carry, to freeze or to boil away.

There is only one place to put oil.

A simple mixing valve regulates the fuel supply. There is no complicated carburetor.)

Ball and roller bearings cut down friction to a minimum.

Long-life batteries mean economy.

You need to know more about Delco-Light. We have fully illustrated literature showing Delco-Light in operation. Write your nearest distributor for it.

Throughout this advertisement we have quoted from letters received from Delco-Light users. Each of these letters is accompanied by an affidavit. We have prepared a folder reproducing some of these letters, and with photographs of some farms where Delco-Light is used. Your nearest distributor will be glad to send this book to you.
