Eggs as They Are

THERE is only one kind of egg in demand for the highest class of trade,—Specials. The average 30-dozen case of eggs that comes in from the country, grades out about as follows:

as follows:
Specials, none; Extras, 4½ doz., 18%; No. 1's, 9 doz., 30%; No. 2's 10½ doz., 35%; Cracked and dirty, 4½ doz., 18%; Bad (unfit for food) 1½ doz., 3%.

493 007, 1977, 113 doz, 570, 113 doz, 570, 113 analysis was announced in connection with the poultry display of the Live Stock Branch at the recent Guelph Winter Fair. It indicates big room for improvement in the quality of country eggs.

Easily Constructed Trap Nest

THE two diagrams herewith will give an idea of the construction of the simple trap nest that is being advo-cated by the Poultry Depart-ment of Mac-donald College. The nest has

ments. The rear compartment. The door is made in the type of a hollow cylinder and is covered with a wire of fine mesh. It is balanced in the first compartment. As the hen goes into the sec-

two

ond compartment her back touches

ond compartment her back touches the back of the quarter-vilinder door throwing it off its balance so that it closes. The hen of course must remain within until released.

The main structure of the nest is a rectangular box 14 inches wide, 12 inches high and 24 inches e.e..

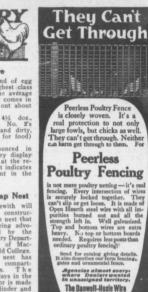

Other details in the construction may e gotten from the diagrams pub lished herewith.

The Diseases of Poultry

CONSTANT source of loss in the poultry yard are the discass which occasionally play havoe with both chicks and laying birds. So wide apread are the losses through poultry diseases that it is safe to say that considerably more than 80 per cent. of the correspondence of those engaged in poultry work in the agricultural colleges and experimental stations relates to poultry diseases.

The latest addition to the many books that have been written informations. CONSTANT source of loss in

The latest addition to the many books that have been written informing poultry men on the recognition, cure and future prevention of disease, is entitled "Diseases of Poultry" and is edited by three of the best known poultry men in America,—Raymond Pean Frank M. Surface, Raymond Fean Frank M. Surface, and the surface of the best form of the surface of the best form of the surface of the best form of the surface of the surf Agricultural Experiment Station, a station that has probably conducted more constructive experimental work with poultry than all other stations combined. This book is published by the MacMillan Company of Canada and may be had through Farm and Dairy at the regular publication rate of \$2. It covers every phase of the subject exhaustively in \$42 pages of printed matter.
