

Roofing Right

These Tools Are Plenty

Is Easy Work

With

"OSHAWA" Galvanized STEEL SHINGLES

Put them on with no tools but a hammer and tinner's shears,—can't go wrong. They lock on all four sides, are self-draining and water-shedding on any roof with three or more inches pitch to the foot. Make buildings fire-proof, weatherproof and proof against lightning. Cost least in the long run. Made of 28-gauge toughened sheet steel—only one quality used and that the best—bent cold and double-galvanized. Last longer with no painting than any other metal shingles heavily-

painted. Guaranteed in every way until 1932. Ought to last a century. Cheap as wood shingles in first cost; far cheaper in the long run. "Oshawa" Galvanized Steel Shingles cost only \$4.50 a square, 10 ft. x 10 ft. Tell us the area of any roof and hear our tempting offer for covering it with the cheapest roof you can really afford to buy. Let us send you FREE booklet about this roofing question—tells some things you may not know.

Oshawa Galvanized Steel Shingles are GUARANTEED in every way for Twenty-Five Years Ought to Last a Century

Farm for Sale.

THE farm property of the late James Fair, Clinton, Ont., comprising part of lot 24, con. 1, Hullett (now in Clinton); south half lot 25 and lot 24, con. 2, Hullett, excepting 90 acres at the north-east corner of lot 24; 10 acres of the south half of lot 25, con. 2, Hullett; 7 acres of lot 35, con. 15, Goderich Township, and 3 1/2 acres of lot 1, Huron Road con., Goderich Township (now in Clinton); containing in all 214 1/2 acres; will be offered for sale at public auction at the Town Hall, Clinton, on WED., the 6th MARCH, 1907, by D. Dickson, Auctioneer. This farm property makes one of the most valuable and desirable properties for mixed farming to be found in the County of Huron, consisting of arable and pasture lands, with good supplies of water. There are erected on the premises two good frame dwelling houses and four barns in good state of repair. The property is well fenced and drained, and the soil is in excellent condition. There are 25 acres of fall wheat, and all fall plowing is done. The soil is a clay loam. Terms: Immediate possession can be given; 10 per cent. of the purchase money down, and balance in 30 days without interest. The executors reserve the right to make one bid. Particulars may be had on application to the undersigned.

Anything published supplied. It will SAVE you MONEY, TIME, and it reduces the risk of non-delivery to a minimum.

Stone Was the Strongest Fence 100 Years Ago

The "Frost" is the Strongest Fence today

One Hundred Years Ago

the picturesque stone fence was the strongest fence that could be built. But the scarcity of stone and its prohibitive cost—not to mention the length of time necessary to construct one—make the stone fence a luxury which few of us feel like indulging in.

But as far as strength and years of service are concerned, a worthy successor is found in the Frost Wire Fence. It is the strongest fence constructed today. It rivals a stone fence in the years of service it will give.

Unlike the stone fence, the Frost Fence is not constructed at a prohibitive cost. It is really a necessity instead of a luxury.

You need the Frost Fence on your farm because it will improve the appearance of your estate—increase largely the value of your property. You need the Frost Fence because it will keep horses, cattle and pigs absolutely confined in the fields encircled by it. It holds them prisoners the same as a stone wall would. They cannot break through or root under it.

Notice that the lateral wires on the Frost Fence are of a special grade No. 9 hard steel coiled wire, heavily galvanized. Any grade of coiled wire will expand, but the only kind we know of which will unfailingly contract is this special grade we are using on Frost Fence—the kind that always keeps Frost Fence taut.

Look at the stays on the Frost Fence. How rigid and straight they hold the fence! They are made of No. 7 hard steel wire—not the weak, flimsy No. 9, No. 12 or No. 13 soft wires used as stays on many fences.

See the difference between a Frost galvanized lock and others. Unlike others, the Frost Lock is the strongest, most unyielding part of the fence—not the weakest. And it practically welds the lateral wires to the stays where they cross each other, which assures a perfect distribution of any strain or enormous pressure that may occur—adds years to the life of the fence.

Contrast the appearance of the Frost Fence with other fence which has been up for the same number of years. You'll find the difference all in favor of the Frost.

Truly the Frost Fence is the strongest fence built to-day—the most solid kind of an investment. If you would like to know more about Frost Fence write for our Free Catalogue, which explains it in detail.
