# Ask these Men if they ever saw better Barns

FARMERS can now buy better barns than they ever saw before—Steel Truss barns of iron and steel. They can put them up in days with a few helpers, where it used to take weeks and months—and a big gang. They can get rid of the old clumsy wooden frame that filled the inside space with beams and timbers. They can forget half their worries, because Steel Truss Barns are fire-proof, lightning-proof, and weather-proof.

This puts barn building on a modern basis. And we leave it to the men who have built on this plan, to say how it carries out all our claims.

But here is the best part of this big new idea. The Steel Truss barn—the barn you would gladly pay a big price to own—costs less than perishable wood.

These Steel Trusses of Double-Angle Steel make the most rigid barn construction known to man

## Steel Truss Barns

(Patented in Canada and the United States)

These barns are built complete in our factories. We send you a whole barn. There is nothing for you to provide, because we ship everything complete—Steel Trusses, corrugated iron-covering, and all the lumber, and there's not a piece of wood in the whole job that one man cannot handle. The Steel Trusses come ready to put in place. Doors are fitted with all the hardware, and are ready to hang. Bird-proof track is supplied. Windows are of metal and wired-glass, and are built into the sheets of corrugated iron. They are as easy to put in place as any other sheet of iron.

The Steel Truss Barns have large, circular ventilators of galvanized iron—and the best bayfork outfit money can buy. Cornices, ridges and eaves, roof and sides are all the best grade of galvanized iron.

To land a barn on your farm in such shape as this is going to save you many a dollar in labor, and an endless amount of time and trouble. And, remember, no wood shows anywhere on this barn. Once a Steel Truss Barn is built, there is no cost for repairs—no paint bills, no rotting sills or shingles. Figure that saving when you think about your new barn.

Eight factories are ready to send you one of these barns any size you want—and the very day your order reaches us.

We know that men will want to know a lot about this great new barn idea, and we are ready to answer questions and send out full information explaining the whole thing clearly. Do not hesitate to write us about it. Tear out the coupon and mail it to-day.

Write for special booklets recently issued, one on Fanning Mills and one on Threshers' Supplies, including oils, greases, belting and hose.

# PEORIA

## The Small Tractor with the Big Pull

The light, scientific, general utility power tractor has come to stay. It is the salvation of our farmers. Takes the place of 2 sturdy horses and is **USED ONLY WHEN WORKING**. Reduces labor and other costs, and increases yields. Uses the **ONLY** cheap fuel.

A Pillar of Support wherever used. 3,000 lbs. 5-20 H.P. Speed 2 to 3 miles per hour.

**Kerosene** Figure the saving in fuel costs alone as compared with gasoline. The proportion is two to one in favor of kerosene.

# \$1,050

F.O.B. WINNIPEG

**Unequaled Value** You demand **BEST** of the tractor you buy. It must be a tractor that has **MADE GOOD** in the field and at the belt; a tractor that is simple yet wholly efficient, easy-to-get-at and built to last; a tractor with a 4-cylinder, slow speed, heavy duty motor; a tractor that is of light weight, that will get right up close to the load—and **PULL**. The tractor that will do all these things and the tractor **YOU** want is the "PEORIA." Self-steering Attachment free.

The "Peoria" will be demonstrated at Brandon.
