

RENOLD PATENT SILENT CHAIN

250 H.P. Renold Silent Chain driving a hoist

What a Cobalt User Thinks

Cobalt, Ont., May 18, 1914.
Messrs. Jones & Glassco,
Montreal.

Dear Sirs:—

Replying to your favor of the 6th re your Renold Silent Chain, we have found this Chain Drive to be eminently satisfactory in every respect.

We have a 12-inch rubber belt on a 50 H.P. motor running beside a 60 H.P. motor driving Stamp Batteries with your Chain Drive.

A comparison of these two drives shows a saving of approximately \$20.00 since September, 1911, in repair parts, while the time spent on the Chain Drive has been less than on the belt.

We also have the convenience on the short space required by your drive as compared with the longer drive required for the same H. P. in Belting, which is essential in many instances and particularly in ours.

We now have three of these large drives and with none of them have we had any trouble, and all the chains are in as good condition to-day as when purchased.

Yours truly,

The above comes from a prominent Cobalt Mining Co (name on application) and is signed by the Manager.
