

Mothers' Help.

Every weary mother finds in Surprise Soap those qualities which rob wash day of its terrors. It does the work in half the time of other soaps; it makes the clothes clean and wholesome; it allows the housewife plenty of time to attend to other important duties. Surprise Soap contributes more to the sum total of domestic happiness than any other article that enters the household. For best results, follow the directions on the wrapper.

St. Croix Soap Mfg. Co.
ST. STEPHEN, N. B.

**\$1,000
REWARD**

OFFERED FOR ANY MACHINE
that will do as great range of work and do
it as easily and as well as can be done on the
DAVIS
Vertical Feed Sewing Machine.

This offer has been before the public for
the past two years. IT HAS NOT BEEN
CLAIMED, proving that the Davis Vertical
Feed is
THE BEST ON EARTH.
DAVIS SEWING MACHINE CO.
DAYTON, OHIO.

The growth of this institution during the last two years has been wonderful. The attendance has been doubled on account of the thorough course of training which we give. One of our young men is now drawing a salary of \$1,500 a year; another \$1,000; others from \$400 to \$800. Within the last month two of our students have gone direct from the College to positions paying \$500 a year. WE QUALIFY OUR STUDENTS TO FILL THE BEST POSITIONS.

Young people are foolish to spend the best part of their lives learning Latin, French and the dead languages, when a few months spent in our Commercial or Shorthand Department will fit them to earn salaries like the above.

Eighty-seven per cent. of all our students who have written on the examinations of the Business Educators' Association of Canada this year have been successful.

H. T. GOUGH, Principal.
St. Thomas, Ont.

Relieve those Inflamed Eyes!
Pond's Extract

Reduced one-half with pure soft water, applied frequently with dropper or eye cap, the congestion will be removed and the pain and inflammation instantly relieved.

CAUTION:—Avoid dangerous, irritating White Hazel preparations represented to be "the same as" Pond's Extract which easily cause and generally destroy "wood alcohol" is a deadly poison.

Minard's Liniment Cures Colds, etc.

FEATHERED FREAKS.

BIRDS WITHOUT WINGS AND BIRDS WITHOUT SONG.

The Penguin is a Bird That Walks and Swims, but Does Not Fly—A Bird That Can Run Faster Than the Swiftest Horse—The Tailor Bird.

Birds without wings are found in New Zealand and Australia. Kiwi is the name of one species. Beautiful mats are made of the feathers of the white variety, but it takes ten years and more to collect enough feathers to make even a small mat which would sell for about \$150.

Birds without song belong to Hawaii. In Honolulu one sees a bird about the size of the robin, an independent sort of fellow, that walks about like a chicken, instead of hopping like a well trained bird of the United States, and it has no song.

A bird that walks and swims, but does not fly, is the penguin. No nests are made by penguins, but the one egg laid at a time by the mother is carried about under her absurd little wing or under her leg.

The largest of flight birds is the California vulture or condor, measuring from tip to tip 9½ to 10 feet and exceeding considerably in size the true condor of South America. The bird lays but one egg each season—large, oval, ash green in color and deeply mottled, so distinctive in appearance that it cannot be confounded with any other.

The California condor is rapidly approaching extinction and museums all over the world are eager to secure living specimens. It is believed that there is only one in captivity.

Another large bird is the rhinoceros bird, which is about the size of a turkey. One recently shot on the island of Java had in its crop a rim from a small telescope and three brass buttons, evidently belonging to a British soldier's uniform.

A bird which is swifter than a horse is the road runner of the southwest. Its allies are the ground cuckoo, the hoard bird and the snake killer, snakes being a favorite diet. In northern Mexico, western Texas and southern Colorado and California it is found. The bird measures about two feet from tip to tip and is a dull brown in color. Its two legs are only about ten inches long, but neither horses with their powerful legs nor electric machines are in it for swiftness when it comes to running.

Most curious are the sewing or tailor birds of India—little yellow things not much larger than one's thumb. To escape falling a prey to snakes and monkeys the tailor bird picks up a dead leaf and flies up into a high tree, and with a fiber for a thread and its bill for a needle sews the leaf on to a green one hanging from the tree. The sides are sewed up, an opening being left at the top. That a nest is swinging in the tree so snake or monkey or even man would suspect.

Many a regiment cannot compare in perfection of movement with the flight of the curlews of Florida winging their way to their feeding grounds miles away, all in uniform lines in unbroken perfection. The curlews are dainty and charming birds to see, some pink, some white.

Birds in flight often lose their bearings, being blown aside from their course by the wind. In this case they are as badly off as a mariner without a compass in a strange sea on a starless night.

All very young birds, by a wise provision of nature, are entirely without fear until they are able to fly. The reason of the delayed development of fear is that, being unable to fly, the birds would struggle and fall from their nests at every noise and be killed. Suddenly, almost in a day, the birds develop the sense of fear, when their feathers are enough grown so that they can fly.

It is always a source of wonder to arctic explorers to find such quantities of singing birds within the arctic circle. They are abundant beyond belief. But the immense crop of cranberries, crowberries and cloudberry accounts for the presence of the birds.

A stick of wood seven inches long and a quarter of an inch in diameter was once taken from a wren's nest. It is very singular that so small and delicate a bird should use such rough material with which to construct its nest. If an eagle should use material proportioned to its size, its nest would be made up of fence rails and small saw logs.

The extraordinary situations in which nests are found occasionally almost give one the impression that birds must be endowed with a sense of humor. For instance, a wren built its nest upon a scarecrow, a dead sparrow, and a farmer had hung up his frightened away winged ravagers of his crop. In the pocket of an old jacket hanging in a barn a bird, also a wren, made its nest, when discovered contained five eggs. It was a robin that raised a young family in a church pew and a robin that built its nest in the organ pipes of a church. Places of worship have always been favorite building places for birds.

Consideration.
"My wife is very considerate," said the newly married man. "She is always buying me neckties and colored shirts."
"And I suppose you are considerate and generous in your turn."
"Yes, I wouldn't hurt her feelings for the world. I wear 'em."

The manuscripts of the fifteenth and sixteenth centuries are in many cases almost illegible on account of the fading of the ink. At that time the lamp-black inks passed out of use and chemical inks became popular.

Poor Girl, Pity Her.

Growing! Yes, into weakness, but not strength. Studies a plenty of them. Tired, of course she is, and weak, too. Does not eat enough, and digests far less than enough. This condition is so frequent, but how seldom noticed, even by fond parents. Give her Ferrerozine, her cheeks and lips grow ruddy, her step elastic, her spirit buoyant. All this simply the result of eating and digesting enough, making blood, and thereby strengthening the nerve and brain power. Ferrerozine gives a woman's strength to weak girls. Your daughter or wife needs Ferrerozine. Get it to-day from McCall & Co.

A woman's esteem is almost priceless, but it may cost you her love.

Hay Fever Can Be Prevented.

Don't seek other times. Hay Fever Season, don't destroy your stomach and nerves by drugs—prevent the disease. Hay Fever is caused by germs that float about in the air and finally find lodgment in your throat and nose. Medicine won't reach them there, but Cattarhoxone will. Cattarhoxone is sure death to germs. Start now to use Cattarhoxone. Inhale it into the throat, lungs and nasal passages and bronchial tubes; it goes wherever the air you breathe goes, and it will prevent and cure Hay Fever. Endorsed by not less than one thousand doctors in Canada and U. S. Sent to any address for \$1.00. Forwarded to Polson & Co., Hartford, Conn., U. S., or Kingston, Ont.

It is not the height some men attain that makes them giddy—it is looking down with contempt on the crowd beneath them.

When a boy turns his bulging pocket inside out we marvel at the quantity and variety of articles he has stowed away. Odd lengths of string, marbles, a nail, hickory-nuts, an apple, and many more articles are garnered by this "snapper up of unconsidered trifles." We think the collection it is, but do we ever think of the variety and miscellany of the substances we put into the pocket of our stomach? There's the apple and the nut, and things besides quite as indigestible as brass nails and with no more food value than so many marbles. And yet we wonder that the stomach breaks down under the strain of careless eating and irregular meals it can be perfectly and permanently restored to health and strength by the use of Doctor Pierce's Golden Medical Discovery. The action of this medicine on the stomach and other organs of digestion and nutrition is so marked, that relief from disease is at once experienced, and the stomach, liver, eruptions and other symptoms of a diseased stomach are quickly cured. Whenever the use of a laxative is indicated, use Dr. Pierce's Pleasant Pellets. They act in harmony with the "Discovery" and assist its action by purging the bowels of food accumulations.

A small boy's idea of forgiving an injury inflicted by another boy is to lick him first and forgive him afterward.

Active Man Wanted

To read this advertisement and then give Putnam's Painless Corn Extract a trial. It never fails to cure. Acts in twenty-four hours and causes neither pain nor discomfort. Putnam's Corn Extract extracts corns. It is the best.

Probably there is nothing so uncertain as a sure thing.

Pain in the Joints

may be muscular or rheumatic. The joints are hard to get at, and it requires a powerful, reliable remedy to reach the affected parts. Polson's Nervine exactly meets the requirements, for it is both powerful and penetrating. The pain is expelled as if by magic, for one drop of Nervine equals in strength five drops of other remedies. You won't often call the doctor if Nervine is in the house. Price 25 cents.

The man who is never idle has no time to be mean.

HIS OWN FREE WILL.

Dear Sirs,—I cannot speak too highly of the excellence of MINARD'S LINIMENT. It is THE remedy in my household for burns, sprains, etc., and we would not be without it.

It is truly a wonderful medicine.

JOHN A. MACDONALD,
Publisher Arnprior Chronicle.

A man judges a woman's heart by her face; a woman judges a man's face by his heart.

HUNDREDS OF OPINIONS agree upon the fact that Pain-Killer has alleviated more pain than any one medicine. Unequalled for rheumatism and dysentery. Avoid substitutes, there is but one Pain-Killer, Perry Davis'. 25c. and 50c.

Umbrellas are rarely seen in Poyta, Peru. It is the driest spot on earth. The average interval between two showers of rain is seven years.

For pimples, blotches, bad complexion, Hood's Sarsaparilla is the medicine to take—it has established this fact.

What has become of the old fashioned woman who made her children's nightgowns out of flour sacks?—Atchison Globe.

Keep Minard's Liniment in the House.

Minard's Liniment Cures Distemper.

POOR WAY TO ECONOMIZE.

Mistakes Often Made by Women Who Try the Wrong Expenses.

"It is most difficult to economize, and the most difficult part of it is to know in what direction to practice economy," said the wise woman. "Often those who do it will carry their economy to too great an extreme. The right way to do it is to get along without extras, and use just what is necessary for everyday comfort. It does not mean that there should not be enough, nor any deprivation of necessary comforts."

"There are women who when they economize will do so at the wrong end. She comes to the conclusion that whenever she doesn't buy anything or cuts off an item of expense she is economizing. She will attend to the grocer's bill. That is well, but sometimes she will expend 20 cents' worth of time and strength to save 5 cents. Then the same woman may economize on her luncheon. She will convince herself that eating a midday meal is a mere habit, and will dispense with it. She finds it all the easier to do so because her husband is not home at that meal, and, of course, she does not want him to see her without enough to eat. She thinks that he needs more food than she does."

"The woman who practices this sort of economy will find that the deprivation impoverishes herself and her children mentally and physically. Often, in the long run, it is more expensive in actual cash, for the doctor has to be called in."

Value of Old Newspapers.

"Dear me," sighed the perplexed housewife, "I don't know what to do with the stacks and stacks of old newspapers which accumulate at our house."

"Well, don't throw them away," counseled her friend, "for they are of more value than you would think at first glance. I have found so very many uses to which I can put them in my home that I make the men folks save every scrap."

"In the first place," she continued, "old newspapers dipped in cold water will clean windows almost as well as hot water, soap and cloths, and will not injure the hands one-half as much. Besides, for polishing mirrors there is nothing better than a newspaper which has been crumpled and rolled about in the hands until it is as soft as fine leather."

"After the cooking is over I make our girl crush some old newspapers in her hands and rub the top and sides of the range. This removes the grease quickly and keeps the range in excellent condition if done often."

"Every morning we rub our hair brushes with a pad of newspapers. This removes the dust and keeps the brushes clean and healthy. Also, it conduces to their long life and utility. "Tearing old newspapers into shreds of a given length is an employment which I find amuses my children greatly, and keeps them out of mischief. What possible use can I find for the shreds? Why, a great many. They can be put into washing ticks, and, if frequently changed, make a good comfortable bed for a small child. They are also excellent for packing fragile summer things away, as good as excellent and practically cost one nothing. Perishable fruit if laid away in boxes surrounded by sheet after sheet of old newspaper will last almost indefinitely."

"As a substitute for paper felt under carpets the old newspapers come in handy, and one may have as thick a covering of them on the floors as one wishes, by simply saving up for a few weeks."

"These are only a few of the uses to which I put our old newspapers, and all the things I do with them, and of every month, in the Masonic Hall, Fifth St., at 7.30 p.m. Visiting brethren heartily welcomed."

Teach a Child to Think.

Frobel's "Mother Play" book is full of the richest suggestions for teaching the every day life of the nursery can be made to yield up its treasures of oil and wine, goodness and truth, for both baby and mothers. He shows very clearly there that while it is easy to keep in sympathy with child-nature, and for many mothers to provide for the varying ceaseless activities, yet to really understand the child and end of this activity and earnest study of the human mind is also needed. The mother must learn that thought and feeling, as well as nerve and muscle have their pulsations, their rhythms, their periods of greater or less activity. She must learn that to try to work against these laws is but "kicking against the bricks." She will learn that just as there is seed time and harvest, and the work of the one period cannot be done except in that period, so the child cannot be made to take on certain stages of mind and heart. To take up certain studies when he has not yet reached the time in which such mental or heart nourishment is demanded is to block the wheels to a true, logical, orderly development of all the faculties. She will learn that a child's interests cannot be ignored and other interests foreign to his present stage of growth substituted for his own. She will study books like Frobel's "The Study of the Child," to find a true physical basis for education, and then strive to gain a clearer, larger view of all these psychological questions which bear on mental development. To this will be added a true knowledge of the principles which make for a better spiritual being. It is not hard to do all this if you will look at life from the child's standpoint, giving him your own loving sympathetic sympathy.—Woman's Home Companion.

CUBES CREATE CONFIDENCE

That is Why Dr. Chase's Kidney-Liver Pills Have Won the Confidence of the People of this Continent—read These Letters.

Dr. Chase's Kidney-Liver Pills have the largest sale in Canada of any treatment recommended for diseases of the kidneys. They have won the confidence of the people by actually curing the ailments for which they are intended, and are known in nearly every home in the land. Scores of hundreds of people could write just such letters as these that follow:

Mr. James Clark, Concession, Prince Edward County, states: "Eleven years ago I was taken with pains in my back, settling in my hips and extending up my spine. The pain was very severe and at times almost unbearable, and many days I was unable to do an hour's work. I was cured by Dr. Chase's Kidney-Liver Pills, and I also regained my usual weight, 190 pounds. I cannot say too much in favor of Dr. Chase's Kidney-Liver Pills, which have done so much for me. I have recommended them to a number of my friends and have never met with one case where they did not meet with good success. My daughter, Mrs. Charles Phillips, has also been cured of a severe stomach trouble by the use of these pills."

Mr. Geo. Cummings, Barrie, Ont., one of the best-known engineers on the G. T. R., and whose name is between Toronto and Barrie, writes: "For years I suffered from kidney disease brought on by railroad life. The doctors called it 'railroad kidney,' but could give me no permanent relief. A friend recommended Dr. Chase's Kidney-Liver Pills, saying they had cured him. A few boxes cured me, putting an end to the dreadful pains in the back and greatly strengthening the kidneys. I am a well man to-day, thanks to Dr. Chase."

There is no uncertainty, no experiment, about taking Dr. Chase's Kidney-Liver Pills. They have cured such a variety of cases, and have been so thoroughly tested during the past quarter of a century that you can be absolutely sure of being benefited by their use. If you have been disappointed with other remedies you will all the more appreciate the genuineness of this sterling remedy of Dr. Chase. One pill a dose, 25 cents a box, at all dealers, or Edmanson, Bates & Co., Toronto.

DR. WM. R. HALL—Office, Rooms 1, 2, 9 and 10, Victoria Block, corner of Fifth and King streets. Office hours from 10 to 12 a.m., 2 to 4 p.m. and 7 to 8 p.m. Office telephone 280 B. Residence telephone 173.
