King George Shot Well.

No Sooner Had a Tiger Broken Cover
Than He Hit the Dust—A Princely
Collection of Wild Animals.

London, Jan. 20.—Jacob Hood, artist for the Graphic, who had special permission to make sketches of King George's shooting expedition in Nepal, accompanies the drawings he sends to his paper with a letter, in the course of which he writes:

"The Maharajah of Nepal and his three sons spared no trouble and expense to give all a good time during our ten days' visit as his guest in his tiger infested jungles. There were two camps, in each of which some days were spent, which were furnished with every comfort, including electric lights.

"His Majesty shot altogether thirty-seven tigers; he has been shooting remarkably well, and it is not often

A WONDERFUL DISCOVERY.
This is the age of reason, and experiment, when all nature's secrets are being unlocked by the hand of science. Science has made great strides during the past century, and among the by no means least important discoveries in medicine comes that of

THERAPION.
The preparation is unquestionably one of the most genuine and reliable Patent Medicines ever introduced, and has, we understand, been used in the Continental Hospitals by Kienrich, Rostan, Robert, Volkmann, Mousnier, the well-known Ch. de la Roche, and indeed by all who are regarded as authorities in such matters, including the celebrated Lallemand and Roux, by whom it was some time since uniformly adopted, and that it is worthy the attention of those who require such a remedy we think there is no doubt. From the time of its introduction the preparation has taken into the world of medicine a place of its own, and is now being used by all who are interested in the cure of the diseases which it is so effectively remedied. It is a remedy of a powerful nature, and is so effective that it is able to expel from the system without the aid, or even the knowledge, of a second party, the poisons of acquired or inherited disease in all their protean forms, and to leave the patient in a state of perfect health.

THE NEW FRENCH REMEDY
THERAPION
Which may certainly rank with it, if not take precedence of it, many of the discoveries of our day, about which no little ostentation and noise have been made, and the extensive and ever-increasing demand that has been created for this medicine, when every introduced appears to prove that it is destined to cast into oblivion all those questionable remedies that were formerly the sole reliance of medical men. Therapion may be obtained of the principal chemists and druggists throughout the world. *Prepared by Dr. J. Lallemand, Roux, Paris.*

Therapion may now also be obtained in Dragee (Tasteless) form.

that he had to give a second barrel. From an artist's point of view, this was to be regretted, as I have seen no excitement of a tiger charging on an elephant or trying to pull a sportsman out of his howdah. No sooner had his stripes broken cover than he bit the dust, as the saying is, without the chance of biting anything or anyone else.

"Nineteen rhinos also fell; they showed more fight, as there are only two places in their thick hides in which a bullet may bring death, and when wounded only they are apt to charge. Christmas Day, after service in a tent, a long line of the Maharajah's servants brought around costly presents for every one of us and elaborate Christmas cards from himself and one from each of his sons.

"To the King the Maharajah's present was a truly princely collection of all the wild animals of the country in cages, some of them very rare. They were carried into camp by coolies in their cages and placed in three lines. One of the most difficult to capture was a klang or wild ass from the borders of Tibet. A snow leopard, different sorts of bears, and various kinds of deer from the Lake Shou, with antlers like the red deer, to the little home deer and musk deer; every sort of bird and fishes, dead of course, were represented, and baskets of every fruit and vegetable known completed the gift."

Has Large Mail.

The Corinthian which is due here this afternoon will bring a large mail as the P. M. G. ordered all the American and Canadian mails held at Sydney to be despatched to Halifax for the ship. An accumulation of mail matter at Halifax will also come forward, and the Post Office staff will have a busy time upon the ship's arrival.

GETTING BETTER.—Capt. Nicholas, of H. M. Customs, who had been ill the past two weeks, is now on the mending hand, and his friends say he will soon be able to get out.

VINARD'S LINIMENT CURES DIS-
TAMPER.

The Tritonia Jammed.

For two days past the S. S. Tritonia, Capt. H. Dawe, coal laden to the A. N. D. Co., has been outside of Botwood trying to force through the ice into the harbour. The Bay and River of Exploits are both thickly covered with ice and the ship can make but very little headway. Men are using dynamite to break the ice, but much can't be done in this way. The Tritonia last year had her bows strengthened and properly fitted for contending with ice, but it is a tough job for iron boats to get through here where the ice is closed by the land on all sides. Men from Botwood went on board the ship yesterday and reported that she had made very little progress. She might get up to Exploits Island, in the mouth of the Bay. She left Glasgow for here on January 20th, and had a fine run out.

HEALTH RESTORED TO THIS FAMILY

Wife's experience with Dr. Chase's
Nerve Food led to husband's cure.

"Since childhood I was afflicted with biliousness and sick headache," writes Mr. A. K. Van Wyck, Park Hill, Ont., "and as all the doctors' medicines and prescriptions failed to do me any permanent good, I had lost faith in all medicines. It was by accident that I came to use Dr. Chase's Nerve Food, for it had been recommended for Mrs. Van Wyck and did her so much good that she wished me to try it.

"I did so, and was surprised at the results. It is now three years since I discontinued the medicine and I have not had an attack of the old trouble. I hope that others may benefit by my experience."

The cure effected by Dr. Chase's Nerve Food are lasting because it builds up the system and removes the cause of trouble. 50 cents a box, 6 for \$2.50, at all druggists, or Edmanston, Bates & Co., Toronto.

At the City Hall

Mayor and full Board present at last evening's meeting.

The Gas Co.'s taxes will be collected as heretofore in spite of the representations of Mr. W. H. Rennie.

Mr. J. J. Duff, who has a skating rink on George Street, which up to this time the Council forbade opening, sent in a note saying that the huge pile of snow that had fallen on the roof of the building lately without making it sag an inch all the past week ought to be a sufficient proof that there was no danger of its collapsing. He said that he was quite ready to still further strengthen it and to act on the suggestion of the Council. Architect McDonald had been called in by him to inspect the building, reported that the trusses were strong enough to support 80 lbs. per square foot, and that the walls were capable of sustaining the roof. Mr. Duff asked for a special test. The question was referred to the City Engineer.

Wm. Banks of Ottawa applied to the Council for an advertisement. The Secretary will inform him that there is nothing doing just now. J. J. Neville, Secretary of the Truckmen's Union, sent in a complaint re the "gully" streets and that several cabmen had to suspend driving. He will be informed that everything possible has been done. With reference to the meeting to consider the cabmen's tariff, Mr. Neville will be informed that it will take place next week.

In reply to J. P. Blackwood re renting the land at Fleming Street from the Methodist Church Committee, Cochrane Street, the Council will inform him that they will take the place for three years at \$200 a year. Mr. Blackwood wants an arbitration called to decide about damages to this land by Council, otherwise he will advise his clients to go into court. The Council is of the opinion still that there is nothing to warrant an arbitration.

Walter Duffett will be given a share of harness patronage. Mr. J. Fencel will be allowed to improve his cottage. Rennie's Mill Road.

F. Sawyer's application for a job in the Council office was filed. Residents of Bond Street, Bannerman Street and Flavin Street will be ordered to keep their taps from running.

J. C. Barter's plan of house for P. Hanley, King's Road, was approved. H. B. Chafe, for Whitten's estate, asked for \$100 rental for property on the South Side from Jan. 2nd to Dec. 30th. The Council knows nothing about this.

The Engineer's report was submitted re clearing the snow off the streets. The cost was not given. After passing the pay rolls the meeting closed.

Cowboy's Day.

How the Dashing Rider of the Plains
Is Occupied in Spring.

A brief description of the work of the Alberta cowboys is given in a recent article in Toronto Saturday Night. Let us suppose it is a spring round-up for branding calves. At three o'clock in the morning or soon after, before the stars are faint in the sky, the cook calls out the crew, some ten or twelve cowboys and the foreman. After a hasty breakfast on flapjacks and coffee the riding horses are caught for the morning's work. These ponies have been herded overnight by the "night-hawk" or "night wrangler," relieved during the day by the ordinary "wrangler." There are a hundred or more in the herd, eight or nine to each man. Fed only on grass, the ponies need always a couple of days' rest after each half-day's ride, so these long "strings" of horses are necessary. When fresh horses are to be caught the "cavvy" or herd is crowded into a temporary corral constructed of lariat ropes tied to a wagon and held taut by the cowboys. There they are lassoed by the foreman.

The early morning mount is the most exciting experience of the day. It is cold, the horses feel fresh, and the "mean" ones do their best to unseat their riders. Sometimes half a dozen broncos are seen bucking at the same moment. Occasionally, amidst the laughter of his comrades, a rider is thrown, but commonly the ponies are soon subdued and the little band of horsemen canter off in search of cattle. When they have reached the district which they are going to work they separate into little groups of two or three and scour the country for cattle. By eight o'clock a herd of a thousand or more may be gathered. From this herd are "cut out" or separated all the cows with calves at heel. Before eleven o'clock this second herd will be complete and the punchers will move down to camp again for dinner.

In the afternoon the cows and calves are driven into a long corral. A fire is built, branding irons are heated, the little calves are lassoed by the heels and dragged bawling with fright to the blaze. There is a great cloud of smoke, a smell of singed hair and yet louder bawling as each lit-

Evening Telegram Fashion Plates.

The Home Dressmaker should keep a Catalogue Scrap Book of our Pattern Cuts. These will be found very useful to refer to from time to time.

8074.—A POPULAR AND FETTERING
HOUSE GOWN.

Ladies' One or Two Piece House Dress, With Seven Gore Skirt, and Sleeve in Either of Two Lengths.

Blue chambray was used to make this design, with trimming of striped blue chambray. The fronts are crossed to effect the pretty side closing and are finished with an insert that is very smart. The front gore shows tucks at the seams. The pattern is cut in 6 sizes: 32, 34, 36, 38, 40 and 42 inches bust measure. It requires 6 yards of 44 inch material for the 36 inch size. A pattern of this illustration mailed to any address on receipt of 10c. in silver or stamps.

Suitable materials for any of these patterns can be procured from AYRE & SONS, Ltd. Samples on request. Mention pattern number. Mail orders promptly attended to.

9133.—A Dainty Little Frock.

Child's Yoke Dress With or Without Tucks and Ruffles.

Lawn, nainsook, dimity, mull or similar fabrics are suitable for garments of this style, with embroidery, lace or tucking for the yoke. The ruffle may be of embroidery or lace. The pattern is cut in 4 sizes: 6 months, 1, 2 and 3 years. It requires 2 1/2 yards of 36 inch material for the 3 year size.

A pattern of this illustration mailed to any address on receipt of 10c. in silver or stamps.

BRASS and IRON BEDS.

Most magnificent display of all Brass and Iron Bedsteads in the City.
Unparalleled values and unprecedented showing.

It is worth while just to see the beauty and variety of these Beds. In no store will be found the number of different designs now being displayed on our second floor.

U. S. Picture and Portrait Co.
Complete House Furnishers

REID NEWFOUNDLAND COMPANY.

Is your house really lighted from top to bottom or do you still have to take a candle or lamp when you go to the attic or cellar at night?

A great many people who have electricity in the rest of the house have no light in the cellar or attic because it is seldom needed; but, when you do need it, you need it badly.

One Incandescent Lamp set in a Holophone Reflector will give sufficient light for the darkest cellar or attic. Holophone Reflectors are especially adapted to lighting places of this sort as they control the light rays so that every ray is utilized. Wouldn't it be a convenience if you could turn a switch and light your cellar or attic before entering? That means an end to dangerous matches and flames—it means that you no longer need stumble against misplaced boxes and bark your shins in the dark.

We would like to tell you more about electric lighting and more about the wonderful light-saving Holophone Reflectors. May we send a representative to see you?
