HOW EYESTRAIN CAUSES EYE DISEASES.

Eyestrain is the first cause of most eye diseases. It produces irritation and congestion and a consequent general weakness of all the nerves and muscles of the eye. In this way any eye disease, such as Cataract, Optic Nerve Paralysis, Ulcers, Glaucoma, Granulated Lids, etc., may be produced. Any of these diseases, if neglected, may result in blindness. The best time to treat the eye diseases is in the "eyestrain stage." If you are having any trouble whatever with your eyes, no matter how slight, consult us.
