"from hand to mouth." It is the city trade building being still active, Wh ch still absorbs the attention of producers or large merchants. Some sizes of native pine, for example, 2 -inch good and $10 \times 12$ inch stock, are becoming scarce. British Columbia shingles are easier; everything else on the list appears to be on the upward trend according to outside advices. The almost wonderful demand from builders in the city, however, continues, and the keen competition to fill it makes the market almost a buyers' one. We quote dressing pine $\$ 32$ to $\$ 35$ per -M ; common stock boards, $\$ 26$ to $\$ 30$; cull stocks, $\$ 20$; cull sidings, $\$ 17.50$; Southern pine dimension timber from $\$ 30$ to 45 , according to size and grade; finished Southern pine according to thickness and width, $\$ 30$ to $\$ 40$.
