THE SELF-EVIDENT STANDARD

"It is self-evident that the best standard by which to measure the milk of infants is the standard of the infant's natural food—breast milk." "The composition of average breast milk is well known, and any food which differs widely from its proportions, with very little for its weight against it, must be condensed."

—*Journal of the American Medical Association*, August, 1907.

Milk prepared with the **NEO-TOGENIC POWDER** conforms in all respects to the accepted standard of infant food—normal, a healthy mother's milk.

There is no means available to put precisely into practice a infant's diet, and that is why the **NEO-TOGENIC MILK POWDER** for preparing fresh cow's milk.

—*Tablets and specimens sent up on request.*
