In one of Dr. Ayer's lectures lie states hat Chemistry confers more practical bene-te on manking, then any other science, yet fom no other source could more be so eas, y obtained. The arts and economics which chemistry would teach, if more thoroughly and generally studied, would peedily exercise a most beneficient influence. He freely confesses that he is inince. He freely confesses that he is inromedies, and advises that the practical apdication of chemistry to medicine, the arts, manufactures, and agriculture be enjoined upon our colleges and schools.—Wrights-Prop. PROF. PHILO HOLMES Writes: "Chemistry and medicine have been made subservient to all diseases wheh flesh is heir to, yet how little has science done toward improving our porsonal appearance. Recently I have in-restigated a scientific preparation which has some before the public, but which has been in use many years, called Hall's Vegetable Scillan Hair Renewer. It cures ll drases of the scalp, and allays all that beat and initation, and furnishes a nutri-Live principle by which the hair is nourished and supported, and by its remedial has fallen out, and restores it to its natural solor when gray. The old in appearance are made young again.

ELECTRICITY! THOMAS' EXCELSION EC-LECTRIC OIL!—WORTH TEN TIMES ITS ZEIGHT IN GOLD.—Pain cannot stay where it is used. It is the cheapest medicine over made. One dose cures common sore hroat. One bottle has cured bronchitis. Fifty cent's worth has cured an old standing cough. It positively cures catarrh, asthma, and croup. Fifty conts' worth has cured crick in the back, and the saine cuantity lame back of eight years' standing. The following are extracts from a few of the many letters that have been received from different parts of Canada, which, we think, should be sufficient to satisfy the most skeptical: J. Collard of Sparta, On-fario, writes, "Send me 6 doz. Dr. Thomas' Eclectric Oil, have sold all I had from you and want more now; its cures are truly wonderful." Wm. Maguire, of Franklin, writes, "I have sold all the agent laft, it acts like a charm—it was slow first, but takes splendidly now." Cole, of Iona, writes, "Please forward 6 doz. Thomas' Eclectric Oil, I am nearly doz. Thomas' Eclectric Oil, I am nearly out, not any cquals it. It is highly resemmented by those who have used it."

J. Bedford, Thamesville, writes—"Send at once a further supply of Eclectric Oil, I have only a bottle left. I never saw-anything sell so well and give such general satisfaction." J. Thompson, Woodward, writes—"Set dime some more Eclectric Oil.

I have sold entirely out. Nothing taken wittes— Set dine some more Eclectric Oil. I have sold entirely out. Nothing takes like it." Miller & Reed, Ulverton. P. Don't Forget the Pastor.

At this season of the year, when men's arts are o apt too move them to deeds o kindnoss, it is eminently proper that Chris-ian's recall the Apostolic injunction, "Re-nember them which have the rule over ou, who have spoken unto you the word f. God." Few, if any persons enter the ninistry for its pecuniary compensation. Nor is there any thing more harrassing to he feelings of a high-toned pastor than seeng, or even suspecting, that he is regarded y his congregation as a more hireling ne who for so much money requiers so that he growth of such a suspicion when the ople of his charge, by little acts of preserved and governor indicate that they and gonerosity, indicate that they nsider themselves bound to him net rely by the obligation they have as-ned to contribute to his support, but also the higher sentiments of graticule, teem, and affection. This they can do at that time as the present, when gifts are ing lavishly bestowed, by sending him ino desirable expression of their feelings ward him as their spiritual instructor and templar. A REPRESENTATIVE & CHAMPION OF AMERICAN ART TASTE! respectus for 1875-Eighth Year.

THE ALDINE

The ART JOURNAL of America. ISSUED MONTHLY.

"A Magnificent Conception WondOrfully carried out."

The necessity of a popular modium for the representation of the productions of our great artists has always been recognized, and many attempts have been made to neet the land. The successive failures which so invariably followed each attempt in this country to establish an art ournal, did not prove the indifference of the people of Almorfea to the claims of high art. So, soon as a proper appreciation of the want and an ability to meet it were shown, the public at once railied with ontusiasm to its support, and the result was a great artistic and counnereist triumph. THE ALDINE.

THE ALDINE, while issued with all the regularity, has none of the temporary or timely interest characteristic of ordinary periodicals. It is an elegant miscoliancy of pure, light and graceful literature; an' a collection of pictures, the rarest spacimens of artistic-skill, in black and white. Although each succeeding number affords a fresh pleasure to its friends, the real value and beauty of THE ALDINE will be most appreciated after it is found up at the close of the year. While other publications may claim superior cheapness, as compared with rivals of a similar class, THE ALDINE is a unique and original conception—alone and unapproached—absolutely without competition in price or character. The possessor of a complete volume can not duplicare the quantity of fine paper and engrevings in any other shape or number of volues for the intestificate; and then there is the chromo, besides!

The lattional foature of THE ALDINE must be taken in no narrow sense. Tho art is cosmopolitate. While THE ALDINE is a strictly American institution, it does not confine itself entirely if the repreductions of the most note of more inspective at taste, one that will discrimitate only on grounds of intrinsic merit. Thus, while placing before the putrons of THE ALDINE, as a leading characterists, attention will always be given to specimes from foreignmastors, giving subscribers all the pleasure and instruction obtainable where the scope of the work confines

Ayer's Cherry Pectoral.

For Diseases of the Throat and Lungs, such as Coughs, Colds, Whooping Cough, Bronchitis, Asthma, and Consumption.

Among the great discoveries of modern

Among the great discoveries of modern science, few are of more real value to and Lungs. A vast trial of its virtues, the surely and effectually control them. The testimony of our best citizens, of all classes, establishes the fact, that Cherry Pectoral will and does relieve and cure the afflicting disorders of the Throat and Lungs beyond any other medicine. The most dangerous affections of the Pulmonary Organs yield to its power; and cases of Consumption, cured by this preparation, are publically known, so remarkable as hardly to be believed, were they not proven beyond dispute. As a remedy it is adequate, on which the public may rely for full protection. By curing Coughs, the forerunners of more serious disease, it saves unnumbered lives, and an amount of suffering not to be computed. It challenges trial, and convinces the most sceptical. Every family should keep it on inand as a protection against the early and unperceived attack of Pulmonary Affections, which are easily met at first, but which become incurable, and too often fatal, if neglected. Tender lungs need this defence; and it is unwise to be without it. As a safeguard to children, amid the distressing diseases which beset the Throat and Chest of childhood, Cherry Pectoral is invaluable; for, by its timely use, multitudes are rescued from premature graves, and saved to the love and affection centred on them. It nots speedily and surely against ordinary colds, securing sound and health-restoring sleep. No one will suffer troublesome Influenza and painful Bronchitits, when they know how easily they can be cured.

Originally the product of long, laborious, and successful chemical investigation, no cost or to la is spared in making every bottle in the utmost possible perfection. It may be confi
