1.—How are nouns classified?

2.—What is a Verb? How is the passive voice formed?

Translate into French.—What is a successful druggist? A short and concise answer is, a man who has made money by his business and at the same time enjoys the confidence, esteem and respect of his fellow-citizens.

Translate into English.—Cependant une profession qui donne de tels résultats mérite assurément la sollicitude d'un gouvernement éclairé. Nous nous berçons de l'espérance qu'un jour prochain elle l'obtiendra.

GEOGRAPHIE.

1.—Qu'est-ce qu'un volcan? Donnez les noms des plus célèbres.

2.—Par quel fleuve et dans quel lac le Lac Supérieur se décharge-t-il?

3.—Quelle est la capitale de la Colombie Anglaise et où est-elle située?

4.—Donnez les noms des principales villes des côtes de l'Angleterre et où elles sont situées.

5.—Quels sont les noms des chaînes de Montagnes en France?

LATIN.

1.—Hoc praelio trans Rhenum nuntiatio, Suevi qui ad ripas Rheni venerant, domum reverti ceperunt: quos Ubii, qui proximi Rhenum incolunt, perterritos insequuti, magnum ex his numerum occiderunt. Caesar, una aestate duobus maximis bellis confectis, maturius paulo, quam tempus anni postulabat, in hiberna in Sequanos Exercitum deduxit: hibernis Labienum praeposuit: ipse in ceteriorem Galliam ad conventus agendos profectus est.

2.—Écrivez deux noms (à part les noms propres) qui se trouvent dans le morceau à traduire.

3.—Écrivez les principales parties de l'un des trois verbes dans le morceau choisi.

4.—Donnez les nombres et les temps de venerant, deduxit, profectus est.

5.—Écrivez au complet le présent et le futur des temps de l'indicatif du verbe "esse" etc.

HISTOIRE.

1.—Donnez les dates des guerres entre l'Angleterre et les États-Unis; quels rois étaient sur le trône d'Angleterre à ces diverses périodes.

2.—Donnez les noms des premiers voyageurs Français au Canada qui ont essayé de fonder des colonies.

3.—Quelle était la "compagnie des cents associés" et quelle ministre de la couronne française l'a organisée?

4.—Quels étaient les principales exportations sous le régime français?

5.—Donnez la date de la division de l'ancienne Province de Québec en Haut et Bas Canada et le nom du gouverneur de ce temps-là.

Pharmaceutical Examinations.

The quarterly preliminary examinations of the Pharmaceutical association of the Province of Québec, for candidates entering the study of pharmacy, was held in the lecture room of the Montreal College of Pharmacy, on Jan. 8th. Nineteen candidates presented themselves for examination in Latin, French, English, geography, arithmetic and history, the candidates being required to make at least fifty per cent. on all subjects and at least sixty per cent. on the maximum number of points which is 1,000. The names of the successful candidates are as follows, in their order of merit: S. Comtois, S. J. Martin, F. L. Woolley, J. C. A. Bates, W. Bedard, J. V. Levesque, Miss R. A. N. Parkin, J. D. Patterson, E. Brodeur, A. Goyette, T. E. Huot, Sam. Duncan. The examiners were Messrs. Wm. S. Kerry, A. E. Duberger and W. H. Chapman. The next examination will be held on the 2nd of April.

CHLOROFORM OINTMENT.

In a paper read at the recent meeting of German Physicists and Physicians, Mr. Kittl suggested that, as such applications owe their efficacy to the slow evaporation of the chloroform, thicker media than the oil generally used should be employed, so as to prolong the action of the chloroform.

For three or four years he has made ointments according to the subjoined formula, and they have been used with good results by medical men.

Chloroform..... 1 part (by weight).
Wax..... 1 "
Lard..... 2½ to 3 parts "

This is generally used for rheumatic affections. A harder salve is made with the same proportion of wax and chloroform, but with 1½, 1½, and 2 parts of lard. The way to make the ointment is to melt the lard and wax in a stoppered bottle, and when cold stir in the chloroform with a spatula. The ointment is applied to the affected part on lint.—*American Druggist*.

TREATMENT OF INGROWN NAIL.—Dr. Parckhauer moistens the surface of the deceased nail with a lukewarm forty per cent. solution of caustic potash, and then scrapes off the softened upper layers with a sharp edged piece of glass. After a second application of the potash solution, the scraping is continued until the nail is as thin as a sheet of paper. It is then lifted up from the soft parts with forceps, and the deceased parts are excised. The operation, which is unattended with hemorrhage, has been uniformly successful in the author's hands.—*International Journal of Surgery*, October, 1890.

Orexin, as an appetizer in the hands of Martin, has not fulfilled the predictions of Penzoldt.

Kerry, Watson & Co., WHOLESALE DRUGGISTS, 351 St. Paul St., MONTREAL.
