

PUBLICATIONS.

The Gutta Percha & Rubber Manufacturing Company, Toronto, have issued a very attractive catalogue devoted to "Maltese Cross" interlocking rubber tiling. On page 14, 15 and 16 are reproductions of photographs taken in the rotunda and main hallways of the Queen's Hotel, Toronto, where 4,000 square feet of rubber tiling was laid, the colors chosen being red male tiles and white female tiles. The various color effects in which the tiling is made are reproduced in the catalogue, which possesses many features of interest to architects and owners. The Gutta Percha & Rubber Manufacturing Company's "Maltese Cross" rubber tiling is made of a special composition of rubber vulcanized to a certain degree of firmness, just sufficient to give slightly to the pressure of the foot. It is made in two shapes and a variety of colors.
