NEW YORK, April 24.—The stock market developed an unlooked-for strength in the latter half of today's session, closing with an almost buoyant note under the lead of U. S. Steel. The stock became the dominant feature, gaining two points to the accompaniment of rumors that the case of the government against the company would soon be decided on reasonable terms.
In the early part of the session, leading shares were more or less neglected, interest again shifting to "war" issues, the metal shares and Mexican Petroleum. Coppers held their prominence through a few of the well-priced issues, making new price records. Mexican Petroleum also looks all Mexico, making a net gain of 4 1/2 points on confirmation of a report that the company had entered into a very advantageous selling agreement with leading British interests.

PETROLEUM STILL BIG LOCAL TRADER
Slight Reaction Saturday — Smelters Had Another Gain.
Petroleum remained the feature of the local market Saturday. Traders say the upward movement has only begun, but Saturday's prices do not concur with the general feeling of the market. The stock closed off to 10.00, but recovered in the late trading to 10.20.

LESS ACTIVITY ON MINING EXCHANGE
Attention Directed Mostly to Smaller Stocks on Saturday.
Saturday's mining market was comparatively quiet. Most of the favorites of the week were irregular. Attention was directed largely to some of the so-called "cats and dogs," and several stocks that have been lying dormant for some time came to life.

NEW YORK BANKS
NEW YORK, April 24.—The statement of the actual condition of clearing house banks and trust companies shows that they had \$171,044,850 reserve in excess of legal requirements. This is an increase of \$12,977,050 over last week.

LONDON STOCK EXCHANGE
LONDON, April 24.—Money and discount rates were steady today. The market was buoyant, with many bills being absorbed Monday by the call for the war loan.
