

the 1990s, the number of people in the world who are under 15 years of age is expected to increase from 1.1 billion to 1.5 billion, and the number of people aged 65 and over is expected to increase from 300 million to 600 million.

As a result of these demographic changes, the number of people in the world who are in the working age group (15-64 years) is expected to increase from 3.5 billion to 4.5 billion. This increase in the working age population is expected to be the largest since the beginning of the 20th century.

At the same time, the number of people in the world who are in the dependent age group (under 15 and 65 and over) is expected to increase from 1.4 billion to 2.1 billion. This increase in the dependent population is expected to be the largest since the beginning of the 20th century.

As a result of these demographic changes, the number of people in the world who are in the dependent age group is expected to increase from 40% to 46% of the total population. This increase in the dependent population is expected to be the largest since the beginning of the 20th century.

As a result of these demographic changes, the number of people in the world who are in the dependent age group is expected to increase from 40% to 46% of the total population. This increase in the dependent population is expected to be the largest since the beginning of the 20th century.

As a result of these demographic changes, the number of people in the world who are in the dependent age group is expected to increase from 40% to 46% of the total population. This increase in the dependent population is expected to be the largest since the beginning of the 20th century.

As a result of these demographic changes, the number of people in the world who are in the dependent age group is expected to increase from 40% to 46% of the total population. This increase in the dependent population is expected to be the largest since the beginning of the 20th century.

As a result of these demographic changes, the number of people in the world who are in the dependent age group is expected to increase from 40% to 46% of the total population. This increase in the dependent population is expected to be the largest since the beginning of the 20th century.
