## "Pneumonia"

Pneumonia is nothing more or less than "Lung Fever, ' or as it used to be called "Infia.nmation of the Lungs" and the results come entirely from a local source; such as taking a violent cold.

There is more or less difficulty in breathing: a cough, at first dry, but soon accompanied by raising a thick, sticky, rusty-colored matter, composed of mixture of phlegm and blood.

There is only one way to prevent Pneumonia, and that is to cure the cold just as soon as it appears. Dr. Wood's Norway Pine Syrup will do this quickly and effectively.

Mrs. G. W. Bowman, Pattullo, Ont. writes: "Three years ago I caught a cold which ended in a severe attack of Pneuwhich enced in a severe attack of Pneumonia. Since that time, at the beginning of each winter, I seem to catch cold very easily. I have been so hoarse that I was unable to speak loud enough to be heard across the room. Last winter, however, a friend advised me to try Dr. Wood's Norway Pine Syrup, saving that helped her. I bought a bottle and before it was half used I was completely cured. I also find it a good medicine for the children when they have colda."

Dr. Wood's Norway Pine Syrup is pur up in a yellow wrapper; three pine trees the trade mark; the price 25 cents.
